Nationalist Politics And Everyday Ethnicity In A Transylvanian Town:

Nationalist Politics and Everyday Ethnicity in a Transylvanian Town Rogers Brubaker, 2006 Cluj Napoca in Transylvania is now part of Romania but was once a Hungarian town and still retains many ethnic Hungarians This book examines nationalist politics in Cluj Transylvania and the wider region and also the more fluid terrain on which ethnicity and nationhood are experienced and understood in everyday life

Nationalist Politics and Everyday Ethnicity in a Transylvanian Town, 2006 **Nationalist Politics and Everyday Ethnicity in a Transylvanian Town** Rogers Brubaker, Margit Feischmidt, Jon Fox, Liana Grancea, 2018-06-05 Situated on the geographic margins of two nations yet imagined as central to each Transylvania has long been a site of nationalist struggles Since the fall of communism these struggles have been particularly intense in Cluj Transylvania's cultural and political center Yet heated nationalist rhetoric has evoked only muted popular response The citizens of Cluj the Romanian speaking majority and the Hungarian speaking minority have been largely indifferent to the nationalist claims made in their names Based on seven years of field research this book examines not only the sharply polarized fields of nationalist politics in Cluj Transylvania and the wider region but also the more fluid terrain on which ethnicity and nationhood are experienced enacted and understood in everyday life In doing so the book addresses fundamental questions about ethnicity where it is when it matters and how it works Bridging conventional divisions of academic labor Rogers Brubaker and his collaborators employ perspectives seldom found together historical and ethnographic institutional and interactional political and experiential Further developing the argument of Brubaker's groundbreaking *Ethnicity without Groups* the book demonstrates that it is ultimately in and through everyday experience as much as in political contestation or cultural articulation that ethnicity and nationhood are produced and reproduced as basic categories of social and political life

Nationalist Entrepreneurs and Territorial Disputes in Northeast Asia Jiun Bang, 2025-09-24 This book explores how nationalism surrounding territorial sovereignty requires a domestic nationalist ecosystem aka the Nationalist Industrial Complex to sustain public interest It focuses on nationalist entrepreneurs representing local merchants who commodify nationalism by building businesses that explicitly incorporate elements of territorial sovereignty protection e.g. food and apparel with the insignia of a disputed territory The author argues that this mundane everyday activity of commodification co-constitutes public interest surrounding territorial sovereignty and explains why nationalism might be more contingent than permanent Despite its prevalence the commodification of nationalism is one of the most under explored areas This fresh insight on how everyday nationalism can influence ordinary people's understanding of or attention to nationalistic issues will be of interest to scholars and students of East Asian international relations nationalism security studies area studies and comparative politics

Workers and Nationalism Jakub S. Beneš, 2017 This book tells the story of how nationalism spread among industrial workers in central Europe in the twentieth century addressing the far reaching effects including the democratization of Austrian politics the collapse of internationalist

socialist solidarity before World War I and the twentieth century triumph of Social Democracy in much of Europe

Theories of Nationalism Umut Ozkirimli, 2017-09-16 This widely used and highly acclaimed text provides a comprehensive and balanced introduction to the main theoretical perspectives on nationalism The 3rd edition has been revised and updated throughout and includes a new chapter on the practical outworking of theory in the contemporary politics of nationalism

Nationalism and National Identities Martin Bulmer, John Solomos, 2014-01-02 Nationalism and nationalist ideas are a major force in the contemporary world This volume brings together original papers from a number of countries dealing both with theories and case studies of particular national contexts Taken together these papers shed light on the processes through which nationalist sentiments and ideas are articulated and given social and political meaning in specific situations They cover a broad range of different kinds of nationalist movements and ideologies using a variety of theoretical perspectives and based on varying empirical methodologies The cases covered include a comparison of Bosnia Herzegovina and the North Caucasus the role of religion in nationalist sentiment in Spain ethnicity and nationalism in Turkey Basque nationalism the Basque diaspora across the Atlantic the patrimonial state and inter ethnic conflict in Nigeria and nationalist movements in Uzbekistan and Tajikistan Though this is the empirical focus all chapters raise relevant theoretical questions and challenge differing approaches to the phenomenon of nationalism in the social sciences This book was originally published as a special issue of *Ethnic and Racial Studies*

Ethnic Boundaries in Turkish Politics Zeki Sarigil, 2018-09-04 The Kurdish Movement in Turkey's growing alliance with Islam One of the fault lines of Turkish politics traditionally has been the divide between religious and secular movements However as Zeki Sarigil argues the secular Kurdish movement in Turkey has increasingly become aligned with Islam As a result Islam has become part of the movement's political discourse strategies and actions *Ethnic Boundaries in Turkish Politics* traces the evolving relations between the leftist secular Kurdish movement and Islam from an apathetic and/or antagonistic attitude in the 1970s and 1980s to an increasingly Islam friendly approach in the 1990s to an attitude of accommodation and the rise of Kurdish Islamic synthesis in the early 2000s Based on 104 interviews in several provinces in Turkey primarily Ankara Diyarbakir Istanbul and Tunceli between 2011 and 2015 as well as ethnographic data public opinion surveys and statements from the Kurdistan Workers Party PKK and Kurdish leaders Sarigil shows how the secular Kurdish movement increasingly has been endorsing Islam and Islamic actors The reasons for this Islamic opening are global national and local Sarigil demonstrates that a group of strategic and ideological factors have encouraged and/or forced Kurdish leaders to redraw symbolic and social boundaries of the movement Namely with the end of the Cold War support for Marxist ideas collapsed creating increasingly more favorable responses towards religion In addition the movement's need to expand its social basis and popularity electoral politics and legitimacy struggles against rival political actors were other major factors which triggered the Kurdish movement's boundary expansion i.e. its Islamic opening The study also shows that the Kurdish boundary making was not without any tension or

contestation The boundary expansion by Kurdish ethnopolitical elites triggered both internal and external boundary contestations The movement's embrace of Islam on a more widespread level has major ramifications for politics in Turkey and in the region Ethnic Boundaries in Turkish Politics has important insight into the PKK modern Turkish and Islamic societies and highlights the increasing role of Islam in global politics **The Political Anthropology of Ethnic and Religious Minorities** Arpad Szakolczai, Agnes Horvath, Attila Z. Papp, 2018-12-07 This book presents some arguments for why a political anthropological perspective can be particularly helpful for understanding the connected political and cultural challenges and opportunities posed by the situation of ethnic and religious minorities The first chapter shortly introduces the major anthropological concepts used including liminality trickster imitation and schismogenesis concepts that are used together with approaches of historical sociology and genealogy especially concerning the rise and fall of empires and their lasting impact The conceptual framework suggested here is particularly helpful for understanding how marginal places can become liminal appearing suddenly at the center of political attention The introduction also shows the manner in which minority existence can problematize the depersonalizing tendencies of modern globalization Subsequent chapters demonstrate how the described political anthropological conceptual framework can be used in certain European regions and in the case of certain ethnic and religious minority and each illustrates that instead of charismatic leaders trickster politicians are emerging and increasingly dominate through the public sphere the space of modern politics emptied of real presence The chapters in this book were originally published as a special issue of Nationalism and Ethnic Politics **Ethnic Politics and Conflict/Violence** Erika Forsberg, Jóhanna K. Birnir, Christian Davenport, 2018-10-18 Ethnicity is one of the most salient and enduring topics of social science not least with regard to its potential link to political conflict violence Despite or perhaps because of the concept's significant use all too seldom has the field paused to consider the state of our knowledge For example how do we define and conceive of ethnicity within the context of political conflict What do we really know about the causal determinants of ethnic conflict What has been the most useful development within this literature and why This volume comprises reflections from an international range of prominent political scientists all engaged in the study of ethnicity and conflict violence They attempt to synthesize what the field does and does not know with regard to ethnic conflict as well as draw out the research directions for the immediate future in unique and interesting ways This book was originally published as a special issue of the journal Ethnopolitics **The Foundations of Ethnic Politics** Henry E. Hale, 2008-06-30 Despite implicating ethnicity in everything from civil war to economic failure researchers seldom consult psychological research when addressing the most basic question What is ethnicity The result is a radical scholarly divide generating contradictory recommendations for solving ethnic conflict Research into how the human brain actually works demands a revision of existing schools of thought Hale argues ethnic identity is a cognitive uncertainty reduction device with special capacity to exacerbate but not cause collective action problems This produces a new general theory of ethnic conflict that can improve

both understanding and practice A deep study of separatism in the USSR and CIS demonstrates the theory's potential mobilizing evidence from elite interviews three local languages and mass surveys The outcome significantly reinterprets nationalism's role in CIS relations and the USSR's breakup which turns out to have been a far more contingent event than commonly recognized

De-Commemoration Sarah Gensburger, Jenny Wüstenberg, 2023-10-13 In the wake of recent protests against police violence and racism calls to dismantle problematic memorials have reverberated around the globe This is not a new phenomenon however nor is it limited to the Western world De Commemoration focuses on the concept of de commemoration as it relates to remembrance Drawing on research from experts on memory dynamics across various disciplines this extensive collection seeks to make sense of the current state of de commemoration as it transforms contemporary societies around the world

Ethnic Diversity and the Nation State David Smith, John Hiden, 2012-05-23 This book explores a largely forgotten legacy of multicultural political thought and practice from within Eastern Europe and examines its relevance to post Cold War debates on state and nationhood Featuring a Preface by former UK Home Secretary Charles Clarke it weaves theory and practice to challenge established understandings of the nation state Eastern Europe is still too often viewed through the prism of ethnic conflict which overlooks the region's positive contribution to modern debates on the political management of ethno cultural diversity and towards the construction of a united Europe beyond the nation state Based on extensive archival research in Estonia Latvia Germany Russia as well as the League of Nations Archive in Geneva this book explores this neglected multicultural legacy and assesses its significance in the post Cold War era which has seen the reappearance of national cultural autonomy laws in several states of Eastern Europe *Ethnic Diversity and the Nation State* is invaluable reading for students and scholars of political science history sociology and European studies and also for policy makers and others interested in minority rights and ethnic conflict regulation

Ethnic Minorities and Politics in Post-Socialist Southeastern Europe Sabrina P. Ramet, Marko Valenta, 2016-09-22 Southeast European politics cannot be understood without considering ethnic minorities This book is a comprehensive introduction to ethnic political parties

Romania and the Quest for European Identity Cristian Cercel, 2019-03-15 Exploring the largely positive representations of Romanian Germans predominating in post 1989 Romanian society this book shows that the underlying reasons for German prestige are strongly connected with Romania's endeavors to become European The election in 2014 of Klaus Iohannis as Romania's president was hailed as evidence that the country chose a European future that Iohannis belonged to Romania's tiny German minority was also considered to have played a part in his success Cercel argues that representations of Germans in Romania descendants of twelfth century and eighteenth century colonists become actually a symbolic resource for asserting but also questioning Romania's European identity Such representations link Romania's much desired European belonging with German presence whilst German absence is interpreted as a sign of veering away from Europe Investigating this case of discursive self colonization and this apparent symbolic embrace of the German Other in

Romania the book offers a critical study of the discourses associated with Romania's postcommunist Europeanization to contribute a better understanding of contemporary West East relationships in the European context This fresh and insightful approach will interest postgraduates and scholars interested in Central Eastern and Southeastern Europe and in German minorities outside Germany It should also appeal to scholars of memory studies and those interested in the study of otherness in general

National Belonging and Everyday Life M. Skey, 2011-10-25 This book analyses the current debates around national identity and multiculturalism by addressing three key questions why do so many people treat as common sense the idea that they live in and belong to nations And why and for whom might this idea be significant notably in an era of increasing global uncertainty

Ethnic Struggle, Coexistence, and Democratization in Eastern Europe Sherrill Stroschein, 2012-05-28 Argues that protest by ethnic Hungarians in Romania and Slovakia brought about policy changes and integrated Hungarian minorities into the democratic process

Constructing Grievance Elise Giuliano, 2011-03-15 Demands for national independence among ethnic minorities around the world suggest the power of nationalism Contemporary nationalist movements can quickly attract fervent followings but they can just as rapidly lose support In *Constructing Grievance* Elise Giuliano asks why people with ethnic identities throw their support behind nationalism in some cases but remain quiescent in others Popular support for nationalism Giuliano contends is often fleeting It develops as part of the process of political mobilization a process that itself transforms the meaning of ethnic identity She compares sixteen ethnic republics of the Russian Federation where nationalist mobilization varied widely during the early 1990s despite a common Soviet inheritance Drawing on field research in the republic of Tatarstan socioeconomic statistical data and a comparative discourse analysis of local newspapers Giuliano argues that people respond to nationalist leaders after developing a group grievance Ethnic grievances however are not simply present or absent among a given population based on societal conditions Instead they develop out of the interaction between people's lived experiences and the specific messages that nationalist entrepreneurs put forward concerning ethnic group disadvantage In Russia Giuliano shows ethnic grievances developed rapidly in certain republics in the late Soviet era when messages articulated by nationalist leaders about ethnic inequality in local labor markets resonated with people's experience of growing job insecurity in a contracting economy In other republics however where nationalist leaders focused on articulating other issues such as cultural and language problems facing the ethnic group group grievances failed to develop and popular support for nationalism stalled People with ethnic identities Giuliano concludes do not form political interest groups primed to support ethnic politicians and movements for national secession

The Politics of Good Neighbourhood Béla Filep, 2016-10-04 Analyzing neighbourly relations in multicultural societies this book develops a concept of good neighbourhood and argues that cultural capital in various forms is the determining variable in building good neighbourly relations This work breaks new ground by offering a conceptual integration of different mutually interdependent forms of capital intercultural capital cross cultural social capital

and multicultural capital These forms of capital are linked to different educational and cultural policies of the state as well as to civil society involvement at different levels of implementation Grounded in extensive fieldwork the book not only provides critical insights into neighbourly relations in culturally diverse border regions of East Central Europe but the concept developed through a rich theoretical base can be usefully adapted and widely applied to other contexts Scholars and graduate level students in geography international relations political science social anthropology and sociology as well as policy practitioners with an interest in the negotiation of coexistence minority issues and social and political cohesion in multicultural societies will find this an illuminating read The Palgrave Encyclopedia of Peace and Conflict Studies Oliver P.
