Online Media Revolution Politics Egypt Journalism:

    Online Journalism in Africa Hayes Mawindi Mabweazara,Okoth Fred Mudhai,Jason Whittaker,2014-01-21 Very little is known about how African journalists are forging new ways to practise their profession on the web Against this backdrop this volume provides contextually rooted discussions of trends practices and emerging cultures of web based journalism s across the continent offering a comprehensive research tool that can both stand the test of time as well as offer researchers particularly those in the economically developed Global North models for cross cultural comparative research The essays here deploy either a wide range of evidence or adopt a case study approach to engage with contemporary developments in African online journalism This book thus makes up for the gap in cross cultural studies that seek to understand online journalism in all its complexities **The Political Economy of Egyptian Media** Maher Hamoud,2023-06-01 This book critically analyses the hegemony of Egypt s business and military elites and the private media they own or control Arguing that this hegemony requires the exercise of power to maintain consent under changing conditions such as the 2011 uprising and the 2013 military coup the book answers the central question of why and how Egypt s ruling elites control the media Situated within the interdisciplinary domain of critical political economy CPE the book focuses on popular privately owned newspapers and TV channels and their ownership using a qualitative approach involving fifteen interviews conducted over seven years with key actors and experts in the Egyptian media landscape for unprecedented insight As the first book on the political economy of Egyptian media The Political Economy of Egyptian Media serves as a case study and a country profile and will be of appeal to scholars and experts of Middle Eastern studies political sciences media and the political economy of communication among others **Histories of Digital Journalism** Tamas Tofalvy,Igor Vobič,2024-11-11 Building on the momentum of the recent historical turn in digital media and Internet studies this volume explores how digital journalism has developed from a historical perspective With contributions from established and emerging scholars from Europe Asia South and North America the book investigates not only how established journalistic systems transformed in the early days of digital but how the structural technological and cultural changes induced by digitization have reconfigured the trajectory of journalism The book argues in support of three main claims The first is that emphasis should be given to the plurality of histories instead of one single digital journalism history thereby acknowledging the complexities interactions of social relations cultural traditions power configurations and technological changes that have shaped journalism and digitization The second is the decentralization and decolonization of digital journalism histories The third refers to the need to highlight and demonstrate the idea that the evolution of digital journalism should be viewed as the co construction of the social and technological realms With theoretical and methodological reflections on historicizing digital journalism along with original case studies or comparative inquiries into the phenomena over the decades long digital revolution of journalism this volume will shape the nascent field of digital journalism history and start a global critical exchange of various approaches to and

aspects of historicizing digital journalism As such it will interest scholars and students of digital journalism journalism history digital media Internet studies and technology studies   **Egyptian Revolution 2.0** M. el-Nawawy,S. Khamis,2016-04-30 This book sheds light on the growing phenomenon of cyberactivism in the Arab world with a special focus on the Egyptian political blogosphere and its role in paving the way to democratization and socio political change in Egypt which culminated in Egypt s historical popular revolution   Digital Technologies and the Evolving African Newsroom Hayes Mabweazara,2016-04-14 African newsrooms are experiencing the disruptive impact of new digital technologies on the way they generate and disseminate news Indeed newsrooms are being forced to adapt in various ways and there are clear dimensions of localized creativity and adaptations by journalists to the digital revolution In the same way the influences of digitization Internet and social media are changing the informational needs of readers including how they engage with news These developments nonetheless remain on the margins of mainstream journalism research very few researchers have sought to qualitatively capture the implications of developments in digital technologies on the routine practices of African journalists especially in their natural habitat the newsroom In this light this edited volume interrogates the changing ecology of newsmaking in Africa in the context of rapid technological changes in newsrooms as well as in the wider social context of news production It brings together six contributions drawn from five countries Egypt Mozambique South Africa Nigeria and Zimbabwe to explore practices challenges and professional normative dilemmas emerging with the adoption and appropriation of new technologies While the studies point to dimensions of localised new technology appropriations as defined by the complex socio political structures in which African journalists operate they are not rigidly confined to Africa They are expressly in dialogue with theoretical observations largely emerging from Western scholarship In this sense the book goes beyond simply mainstreaming African perspectives it engages directly with dominant theoretical observations and offers a point of departure for developing what could loosely be branded as an African digital journalism epistemology This book was originally published as a special issue of Digital Journalism   **Handbook of Applied Journalism** Leon Barkho,Jairo Alfonso Lugo-Ocando,Sadia Jamil,2024-02-21 This authoritative handbook looks at the entire news cycle and provides a bridge between the theoretical and academic study of journalism and its actual contemporary practice The book s main merit is that it brings theory and practice together with contributors discussing these issues from different perspectives in a way that scholars students and practitioners can find useful in the study of journalism The handbook is also unique as it undertakes an international scope across regions and cultures both from the West and the Global South while providing an overview which balances the over emphasis on content in most academic approaches to journalism The book is divided into four major parts 1 Conceptual foundations 2 Interlink between journalism as scholarship and journalism as practice 3 Regions and cultures and 4 The practitioner world The first two sections lay down the foundation for section 3 which provides an overview of journalism practice in different regions and cultures Section 4 includes contributions by practitioners

in which they attempt to respond to some of the issues raised in preceding sections This handbook will appeal to academics practitioners and professionals alike who are interested in a better understanding of the academic study of journalism and its actual contemporary practice **Arab Digital Journalism** Noha Mellor,2022-11-30 Responding to urgent calls to de westernise Media and Journalism Studies and shed light on local agencies this book examines digital journalistic practices in the Arab region exploring how Arab journalists understand their roles and how digital technologies in Arab newsrooms are used to influence public opinion Drawing on dozens of articles penned by Arab media professionals and scholars supplemented with informal conversations with journalists this book reviews the historical development of digital journalism in the region and individual journalists perceptions of this development While technology has provided a new platform for citizens and powerful agents to exchange views this text examines how it has simultaneously allowed Arab states and authorities to conduct surveillance on journalists curtail the rise of citizen journalism and maintain offline hierarchal forms of political economic and cultural powers Mellor also explores how digital technology serves to cement Western hegemony of the information world order with Arab media organisations and audiences judged to be mere recipients rather than producers of such information Arab Digital Journalism offers an important contribution to the emerging field of digital journalism in the Global South and is a valuable resource for students and researchers interested in media journalism communication and development studies *Transformations in Egyptian Journalism* Naomi Sakr,2013-01-22 Egypt s revolutionary uprising in 2011 raised important questions about the kind of journalism that would be viable in the country s changing political dynamics Suddenly the output of bloggers online radio and social media news operations which had all formed part of the groundswell of action against dictatorship and repression posed an explicit challenge to journalists in state run and commercial media companies who were more directly subject to government controls As different interest groups struggle over the country s future Naomi Sakr considers emerging visions of journalism in Egypt In this book she charts recent transformations in Egyptian journalism exploring diverse approaches to converged media and the place of participatory cross media networks in expanding and developing the country s body of professional journalists She analyses journalists initiatives for restructuring publicly owned media and securing a safe and open environment in which to work

Handbook of Research on Political Activism in the Information Age Solo, Ashu M. Radsch,2016-09-23 This compelling book explores how Egyptian bloggers used citizen journalism and cyberactivism to chip away at the state s monopoly on information and recalibrate the power dynamics between an authoritarian regime and its citizens When the Arab uprisings broke out in early 2011 and ousted entrenched leaders across the region social media and the Internet were widely credited with playing a role particularly when the Egyptian government shut down the Internet and mobile phone networks in an attempt to stave off the unrest there But what these reports missed were the years of grassroots organizing digital activism and political awareness raising that laid the groundwork for this revolutionary change Radsch argues that Egyptian bloggers created new social movements using blogging and social media often at significant personal risk so that less than a decade after the information revolution came to Egypt they successfully mobilized the overthrow of the state and its president   **The Digital Divide** Massimo Ragnedda,Glenn W. Muschert,2013-06-19 This book provides an in depth comparative analysis of inequality and the stratification of the digital sphere Grounded in classical sociological theories of inequality as well as empirical evidence this book defines the digital divide as the unequal access and utility of internet communications technologies and explores how it has the potential to replicate existing social inequalities as well as create new forms of stratification The Digital Divide examines how various demographic and socio economic factors including income education age and gender as well as infrastructure products and services affect how the internet is used and accessed Comprised of six parts the first section examines theories of the digital divide and then looks in turn at Highly developed nations and regions including the USA the EU and Japan Emerging large powers Brazil China India Russia Eastern European countries Estonia Romania Serbia Arab and Middle Eastern nations Egypt Iran Israel Under studied areas East and Central Asia Latin America and sub Saharan Africa Providing an interwoven analysis of the international inequalities in internet usage and access this important work offers a comprehensive approach to studying the digital divide around the globe It is an important resource for academic and students in sociology social policy communication studies media studies and all those interested in the questions and issues around social inequality   **Information Technology for Peace and Security** Christian Reuter,2024-10-31 Technological and scientific progress especially the rapid development in information technology IT and artificial intelligence AI plays a crucial role regarding questions of peace and security This textbook
