**Bizarre Bioethics** Henk A.M.J. ten Have, 2022-03-01 The focus of bioethical debates on exceptional cases neglects the underlying values like justice and community that would lend to a broader more well rounded understanding of today s world Discussions of ethical problems in health care too often concentrate on exceptional cases Bioethical controversies triggered by experimental drugs gene edited babies or life extension are understandably fascinating they showcase the power of medical science and technology while addressing anxieties concerning health disease suffering and death However the focus on rare individual cases in the media spotlight turns attention away from more pressing ethical issues that impact global populations such as access to health care safe food and water and the prevention of emerging infectious diseases In *Bizarre Bioethics* Henk A M J ten Have argues that this focus on bizarre cases leads to bizarre bioethics with a narrow agenda for ethical debate In other words although these extreme cases are undeniably real they present a limited and skewed view of everyday moral reality This focus also assumes that individuals are rational decision makers so that the role of feelings and emotions can be downgraded Larger questions related to justice solidarity community meaning and ambiguity are not appreciated Such questions used to be posed by philosophical and theological traditions but they have been exorcised and marginalized in the development of bioethics Science ten Have writes is not a value free endeavor that provides facts and evidence it is driven by underlying value perspectives that are often based on metaphors and world views from philosophical and theological traditions Drawing on a rich analysis of the literature ten Have explains how bioethical discussion can be enriched by these metaphors and develops a broader approach that critically delves into the imaginative world views that determine understanding of the world and human existence Examining the roles of the metaphors of ghosts monsters pilgrims prophets and relics ten Have illustrates how science and medicine are animated by imaginations that fuel the search for hope salvation healing and a predictable future *Bizarre Bioethics* invites students researchers policymakers and teachers interested in ethics and health care to think about the value perspectives on health and disease today

Garrett, 2024-11-13 We all feel unfairness deeply when treated in rash ways We expect and the law requires that government officials take fairness seriously giving notice and an opportunity to be heard before taking our rights away That is why the U.S. Constitution commands twice that no one shall be deprived of life liberty or property without due process of law Yet in overheated debates people argue that others do not deserve any presumption of innocence In courtrooms and colleges police stations and jails restaurants and libraries print and online the democratic value of due process is up for grabs Why is process under so much pressure Brandon Garrett exposes widening fault lines One division lies within our own attitudes and he explores why we are tempted to put desired outcomes before fair process Another lies in government as judges adopt toothless due process rules People are trapped in debt for unpaid traffic fines sheriffs seize and forfeit belongings algorithms suspend teachers employment officials use flawed data to cancel healthcare and magistrates order arrestees jailed because they cannot pay cash bail Meanwhile the rise of AI threatens what remains of due process with black box technology To fight against such unfairness lawyers try to challenge unjust systems researchers demonstrate why such processes are so counterproductive and lawmakers try to enact new protections Common ground matters now more than ever to mend
