Internet Dating Chris Beasley,Mary Holmes,2021-05-16 Internet Dating deals primarily with the experiences of UK and Australian daters examining their online accounts to see what kinds of narratives norms emotions and chemistry shape their dating Has the emergence and growth of internet dating changed the dating landscape for the better Most commentators popular and academic ask whether online dating is more efficient for individuals than offline dating We prefer a socio political perspective In particular the book illustrates the extent to which internet dating can advance gender and sexual equality Drawing on the voices of internet daters themselves we show that internet dating reveals how social change often arises in the unassuming everyday and familiar We also pay attention to often ignored older daters and include consideration of daters in Africa Scandinavia South America Asia and the Middle East Throughout we explore the pitfalls and pleasures of men and women daters navigating unconventional directions towards more equitable social relations *Online Dating as A Strategic Game* Maurice Kwok-to Choi,Kwok-bun Chan,2013-12-03 Based on a study using online ethnography as the major research method this book explains why and how men in Hong Kong use QQ an online instant messenger to chase women in mainland China especially in the neighboring city of Shenzhen Chasing women through QQ is a reciprocal exchange process during which the resources to be exchanged in the interaction are not negotiated Rather the men provide resources to the

women hoping for rewards in return that are not guaranteed This characteristic of the exchange makes men who chase women through QQ very strategic in their action They try to maximize the rewards and minimize the costs by adopting myriad strategies such as constructing an attractive online identity by strategic self presentation The role of emotions in the exchange process is also examined Men learn the emotional norms through the online forum but sometimes it is difficult for them to control their emotions some men fall in love when they are not supposed to As it happens they have failed to calculate the costs and rewards rationally in that they may provide too many resources to the women without getting enough rewards in return This book provides original insights into the thought processes motivations desires anxieties and risks of Hong Kong men seeking short term sexual relations with women on the mainland These insights are highly relevant to our understanding of the quickly evolving use of social media a phenomenon of worldwide importance and deep implications
