Online Managing Extreme Climate Through Insurance:

New Perspectives for Environmental Policies Through Behavioral Economics Frank Beckenbach, Walter Kahlenborn, 2015-09-25 This book presents essential insights on environmental policy derived from behavioral economics. The authors demonstrate the potential of behavioral economics to drive environmental protection and to generate concrete proposals for the efficient design of policy instruments. Moreover, detailed recommendations on how to use nudges and related instruments to move industry and society toward a sustainable course are presented. This book addresses the needs of environmental economists, behavioral economists, and environmental policymakers, as well as all readers interested in the intersection between behavioral economics and environmental policy. Bridging Science And Policy Implication For Managing Climate Extremes Hong-sang Jung, Bin Wang, 2017-12-19 Since 1980, the number of climate-related disasters has been greatly increased globally. Scientific consensus based on the IPCC fifth report suggested that global warming would bring more intense and frequent extreme climate events. These climate-related disasters hinder the achievement of sustainable economic growth and prosperity by disrupting supply chains, impeding production, destroying infrastructure, and necessitating high-cost rebuilding and recovery. To mitigate the climate extreme risks and possible losses, it is essential to maximize the utilization of scientific outputs and to share best practices in disaster risk management. Aligned with such purposes, Asia Pacific Economic Cooperation (APEC) Climate Center (APCC) hosts the APEC Climate Symposium (APCS) every year. APCS focused on drought prediction and management in 2013, climate extremes and hydrological disaster in 2014, and efficient use of climate information for disaster risk management in 2015. This book aims to compile some of the important results from the latest research in climate extreme prediction and services and its application studies, with a focus on climate extremes such as typhoons, droughts, and floods based on the APCS presentations during 2013-2015. **Seek Higher Ground** Tim Palmer, 2024-04-02 Pairing in-depth journalism with historical perspectives, this book makes a compelling case for a natural solution to the growing problem of flooding. With *Seek Higher Ground*, environmental writer and former land use planner Tim Palmer explores the legacy of flooding in America, taking a fresh look at the emerging climatic, economic, and ecological realities of our rivers and communities. Global warming is forecast to sharply intensify flooding, and this book urges that we reduce future damage in the most effective, efficient, and equitable ways possible. Through historical narrative, rigorous reporting, and decades of vivid personal experience, Palmer details how our society's approach to flood control has been infamously inadequate and chronically counterproductive. He builds a powerful argument for both the protection of floodplain open space and for programs that help people voluntarily relocate their homes away from high-water hazards. Only by recognizing the indomitable forces of nature and adapting to them can we thrive in the challenging climate to come. The Price of Climate Change Michael Curley, 2021-09-12 *The Price of Climate Change: Sustainable Financial Mechanisms* presents a summary of the effects of global warming with specific emphasis on what these phenomena will cost and the price

we must pay for trying to mitigate these processes Some of these mitigation strategies include reducing our use of carbon by converting to non carbon energy sources such as solar wind and nuclear or lower carbon sources such as natural gas The book examines the financial implications of society adapting to the effects of climate change including rising sea levels extreme weather events and desertification Further it addresses the costs to make buildings more resilient to climate change such as flood considerations improving durability against severe weather bolstering insulation and more Sources of funding for any type of environmental projects including those for climate change mitigation are also examined These include governmental budgets at the federal state and local levels international development banks international capital markets and private funds Features Addresses global climate change issues from the standpoints of mitigation adaptation and resilience and the funding mechanisms for each Describes different types of energy sources as well as their respective costs including nuclear solar natural gas and more Examines the effects of agriculture on climate change as well as the potential ways it can be used to help mitigate the issue The book s straightforward approach will serve as a useful guide and reference for practicing professionals and can also be appreciated by the general public interested in climate change issues and mitigation strategies

Christopher B. Field,Vicente Barros,Thomas F. Stocker,Qin Dahe,2012-05-28 This Intergovernmental Panel on Climate Change Special Report IPCC SREX explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation Extreme weather and climate events interacting with exposed and vulnerable human and natural systems can lead to disasters Changes in the frequency and severity of the physical events affect disaster risk but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability Some types of extreme weather and climate events have increased in frequency or magnitude but populations and assets at risk have also increased with consequences for disaster risk Opportunities for managing risks of weather and climate related disasters exist or can be developed at any scale local to international Prepared following strict IPCC procedures SREX is an invaluable assessment for anyone interested in climate extremes environmental disasters and adaptation to climate change including policymakers the private sector and academic researchers Managing Risk in Agriculture Ashok K. Mishra,Subal C. Kumbhakar,Gudbrand Lien,2023-10-02 The book addresses and documents farmers risks in developing and emerging economies It draws lessons from experimental economics on measuring risk preferences attitudes gender differences in managing risks and risk management strategies in countries across Africa and Asia It argues policy makers especially in emerging economies need a better understanding of farmers attitudes toward risk and choices of risk management strategies when designing policies to support production agriculture The book includes chapters on three themes understanding risk attitudes and preferences using experimental economics to measure risk preferences and risk management strategies and understanding climate

change risk and risk management The book critically examines the currently held beliefs about risk preference attitudes and empirical estimation of risk management strategies emphasizing developing and emerging economies DEE This book is ideal for students and researchers in universities and research organizations who conduct applied research on public policy community development and rural development and will also be of interest to policy makers in those fields

Insuring Against Climate Change Nikolas Scherer,2020-02-19 This book provides one of the first systematic in depth studies on regional catastrophe risk pools It explores the various goals of these new financial instruments illustrating how they function on a conceptual technical and practical level and reconstructs their political genesis With climate related disasters increasing in frequency and severity Insuring Against Climate Change explores how affected countries especially those in the Global South have increasingly turned to innovative index insurance instruments as demonstrated by the creation of the Caribbean Catastrophic Risk Insurance Facility CCRIF the African Risk Capacity ARC and the Pacific Catastrophe Risk Assessment and Financing Initiative Facility PCRAFI Facility Scherer scrutinizes the formation of this trend exploring comparatively the goals characteristics and histories of these tools and argues that their attractiveness rests more on political than economic benefits and is in fact more supply than demand driven Making a significant contribution to current debates on the opportunities and limitations of what are sometimes described as indirect climate risk insurance this book will be of great interest to political scientists with an interest in insurance instruments and climate related disaster management politics as well as to practitioners working in the insurance finance and the development sectors
