**Fiction and Representation** Zoltán Vecsey, 2019-06-17 One of the basic insights of the book is that there is a notion of non-relational linguistic representation which can fruitfully be employed in a systematic approach to literary fiction This notion allows us to develop an improved understanding of the ontological nature of fictional entities A related insight is that the customary distinction between extra-fictional and intra-fictional contexts has only a secondary theoretical importance This distinction plays a central role in nearly all contemporary theories of literary fiction There is a tendency among researchers to take it as obvious that the contrast between these two types of contexts is crucial for understanding the boundary that divides fiction from non-fiction Seen from the perspective of non-relational representation the key question is rather how representational networks come into being and how consumers of literary texts can and do engage with these networks As a whole the book provides for the first time a comprehensive artefactualist account of the nature of fictional entities

Puntel answers the primordial question of philosophy Why is there Being at all and not absolutely nothing Considering the history of philosophy from Parmenides through to Heidegger and beyond Puntel charges philosophy with persistently failing to adequately confront the question of Being In response Puntel sets out a systematic philosophy to rival Hegel's Science of Logic and Whitehead's Process and Reality In two parts the book first surveys the history of Western philosophy through the theoretical framework of Structural Systematic Philosophy SSP which unites continental philosophy's comprehensiveness with the precision and linguistic rigor of the analytic tradition Analysing all of the major stages in the forgetfulness of Being in Western philosophy Puntel establishes a dialogue with a vast number of thinkers and movements in the history of philosophy including Plato Aquinas Duns Scotus Francisco Suarez

Christian Wolff Leibniz Hegel Nietzsche Heidegger Sartre W O Quine Peter van Inwagen Kit Fine Alexius Meinong and Jean Luc Marion The second part develops the methodical question of a systematic theory of Being Puntel sets out a universal metaphysics introducing concepts of world existence and types of beings Moreover he examines the plurality of possible worlds the disclosure of Being and modern philosophies of subjectivity since Kant including the analytic philosophies of Robert Brandom and Ernst Tugendhat The book culminates in a theory of Being and explains the relation of Being to the concept of God Being and Nothing is the third in Puntel s trilogy comprising Structure and Being 2008 and Being and God 2011 and is a book that will appeal to all those with an interest in the history of philosophy continental philosophy theology and analytic philosophy

[Divine Simplicity and the Triune Identity](#) Jonathan M. Platter, 2021-07-05 There has been a recent revival of interest in the doctrine of divine simplicity in systematic and philosophical theology following decades of intense reflection on the tri personhood of the Christian God While recent studies have produced a greater appreciation of patristic and scholastic theologies they have not yet engaged in dialogue with proponents of the trinitarian revival that emerged in the latter half of the twentieth century in anything other than polemical terms This book offers a theological defense of the doctrine of divine simplicity through careful reading of both exemplary historical theologians and Robert W Jenson an important American contributor to the trinitarian revival After tracing continuities and discontinuities amongst select historical theologians the book approaches Jenson with a multivalent account of divine simplicity The result is a more nuanced interpretation of Jenson s theology an account of divine simplicity that responds to perceived problems and new constructive proposals for divine simplicity in trinitarian theology

**The Philosophical Foundations of Ecological Civilization** Arran Gare, 2016-08-05 The global

ecological crisis is the greatest challenge humanity has ever had to confront and humanity is failing The triumph of the neo liberal agenda together with a debauched scientism has reduced nature and people to nothing but raw materials instruments and consumers to be efficiently managed in a global market dominated by corporate managers media moguls and technocrats The arts and the humanities have been devalued genuine science has been crippled and the quest for autonomy and democracy undermined The resultant trajectory towards global ecological destruction appears inexorable and neither governments nor environmental movements have significantly altered this or indeed seem able to The Philosophical Foundations of Ecological Civilization is a wide ranging and scholarly analysis of this failure This book reframes the dynamics of the debate beyond the discourses of economics politics and techno science Reviving natural philosophy to align science with the humanities it offers the categories required to reform our modes of existence and our institutions so that we augment rather than undermine the life of the ecosystems of which we are part From this philosophical foundation the author puts forth a manifesto for transforming our culture into one which could provide an effective global environmental movement and provide the foundations for a global ecological civilization     Eva Picardi on Language, Analysis and History Annalisa Coliva, Paolo Leonardi, Sebastiano Moruzzi, 2018-09-06 The volume honours Eva Picardi her philosophical views and interests as well as her teaching collecting eighteen essays some by former students of hers some by colleagues with whom she discussed and interacted The themes of the volume encompass topics ranging from foundational and historical issues in the philosophy of language and the philosophy of logic and mathematics as well as issues related to the recent debates on rationality naturalism and the contextual aspects of meaning The volume is split into three sections one on Gottlob Frege s work in philosophy of language and logic taking into account also its historical dimension one on Donald s Davidson s work and one on the contextualism literalism dispute about meaning and on naturalist research programmes such as Chomsky s

**Impossible Worlds** Francesco Berto, Mark Jago, 2019 The latter half of the 20     **Legal Validity and Soft Law** Pauline Westerman, Jaap Hage, Stephan Kirste, Anne Ruth Mackor, 2018-12-05 This book features essays that investigate the nature of legal validity from the point of view of different traditions and disciplines Validity is a fascinating and elusive characteristic of law that in itself deserves to be explored but further investigation is made more acute and necessary by the production nowadays of soft law products of regulation such as declarations self regulatory codes and standardization norms These types of rules may not exhibit the characteristics of formal law and may lack full formal validity but yet may have a very real impact on people s lives The essays focus on the structural properties of hard and soft legal phenomena and the basis of their validity Some propose to redefine validity to allow for multiple concepts instead of one and or to allow for a gradual concept of validity Others seek to analyze the new situation by linking it to familiar historical debates and well established theories of law In addition coverage looks at the functions of validity itself The discussion considers both international law as well as domestic law arrangements What does it mean to say that something is valid Should we discard validity as the determining

aspect of law If so what does this mean for our concept of law Should we differentiate between kinds of validity Or can we say that rules can be more or less valid After reading this book practitioners scholars and students will have a nuanced understanding of these questions and more Chapter 6 is available open access under a Creative Commons Attribution 4.0 International License via [link.springer.com](https://link.springer.com)

**Meaning in the Brain** Giosue Baggio, 2018-07-24 An argument that the meaning of written or auditory linguistic signals is not derived from the input but results from the brain's internal construction process When we read a text or listen to speech meaning seems to be given to us instantaneously as if it were part of the input In *Meaning in the Brain* Giosue Baggio explains that this is an illusion created by the tremendous speed at which sensory systems and systems for meaning and grammar operate in the brain Meaning Baggio argues is not derived from input but results from the brain's internal construction process With this book Baggio offers the first integrated multilevel theory of semantics in the brain describing how meaning is generated during language comprehension production and acquisition Baggio's theory draws on recent advances in formal semantics and pragmatics including vector space semantics discourse representation theory and signaling game theory It is designed to explain a growing body of experimental results on semantic processing that have accumulated in the absence of a unifying theory since the introduction of electrophysiology and neuroimaging methods Baggio argues that there is evidence for the existence of three semantic systems in the brain relational semantics interpretive semantics and evolutionary semantics and he discusses each in turn developing neural theories of meaning for all three Moreover in the course of his argument Baggio addresses several long standing issues in the neuroscience of language including the role of compositionality as a principle of meaning construction in the brain the role of sensory motor processes in language comprehension and the neural and evolutionary links among meaning consciousness sociality and action
