Industrial Collaboration in Nazi-Occupied Europe Hans Otto Frøland, Mats Ingulstad, Jonas Scherner, 2016-09-22 This book brings together leading experts to assess how and whether the Nazis were successful in fostering collaboration to secure the resources they required during World War II These studies of the occupation regimes in Norway and Western Europe reveal that the Nazis developed highly sophisticated instruments of exploitation beyond oppression and looting The authors highlight that in comparison to the heavy manufacturing industries of Western Europe Norway could provide many raw materials that the German war machine desperately needed such as aluminium nickel molybdenum and fish These chapters demonstrate that the Nazis provided incentives to foster economic collaboration hoping that these would make every mine factory and smelter produce at its highest level of capacity All readers will learn about the unique part of Norwegian economic collaboration during this period and discover the rich context of economic collaboration across Europe during World War II

The Purge of Dutch Quislings Henry L. Mason, 2012-12-06 This study is based on research which I conducted in the Netherlands in 1948 and 1949 In addition I was able to rely on experiences and impressions of the 1944-1946 period when I was stationed in the Low Countries as a United States Army Military Intelligence Officer In my description of Dutch purge measures I have attempted to be as unbiased a judge as possible whenever I was unable to arrive at a definite conclusion I contented myself with describing the opposing points of view I am quite aware that this attitude of neutrality may be criticized not only by many ex-Resistance men who have become disgusted with the alleged

softness of the purge but also by many others who appear equally dismayed about its severity For purposes of comparison readers who are familiar with action against collaborators in other countries such as France Italy or the Balkans may note that the Dutch purge was not dominated by considerations of party politics All Dutchme employers and workers Protestants and Catholics Conservatives and Socialists had been united in their resistance against the enemy Consequently disagreements about purge measures did not follow class religious or party lines The few Dutch Commu nists had never been able to dominate the Resistance neither were they able to exploit the purge for their purposes Thus in Holland problems of collaboration and purge could be studied in their purest form without consideration of other factors Catalogue of books, periodical sets and pamphlets on general and local History of the Netherlands Martinus Nijhoff,2013-04-17 **European Encounters** Carlos Reijnen,Marleen Rensen,2014-04-20 European Encounters explores the making and remaking of ideas of Europe between 1914 and 1945 as a result of intellectual encounters and intellectual exchange Against the background of the first half of the twentieth century European intellectuals feverishly chased new and uncharted territories most often across national borders Their encounters with other intellectuals or ideas cultures concepts and practices produced new understandings of Europe and triggered projects for Europe s future West European writers turned to Russian literature Catholic politicians from Northern Europe embraced corporatist and fascist solutions from Mediterranean Europe scientist pointed at science and their network as sources of peace and reconciliation and others committed themselves to the European federalism of the Pan Europa Movement This volume unravels the encounters and exchanges that lie at the roots of this attempt at rethinking Europe *The Three Voyages of William Barents: To the Arctic Regions (1594-1596)* Gerrit de Veer,2011-01-01 The three voyages undertaken by the Dutch towards the close of the sixteenth century with a view to the discovery of a north east passage to China are deservedly placed among the most remarkable exploits of that enterprising nation while the ten months residence of the adventurous seamen at the furthest extremity of the inhospitable region of Novaya Zemlya within little more than fourteen degrees of the North Pole and their homeward voyage of upwards of seventeen hundred geographical miles in two small open boats are events full of romantic interest The republication by the Hakluyt Society of the narrative of these three voyages is most appropriate at this particular juncture when public attention is so painfully absorbed by apprehensions as to the fate of Franklin and his companions At all times would this work be read with interest as giving in plain and simple language which vouches for its truth the first account of a forced winter residence in the Arctic Regions patiently and resolutely endured and successfully terminated but at the present moment it acquires a far deeper importance from its representation faint perhaps and wholly inadequate to the reality of the hardships which must have been undergone by our missing countrymen happy if some of them shall have survived like Gerrit de Veer to tell the tale of their sufferings and of their final deliverance from their long captivity In adverting to the causes which led to these three expeditions it would be quite superfluous to enter upon the general history of Arctic discovery All that is requisite for the

proper elucidation of the present subject is an investigation of the actual state of our knowledge respecting the precise field of the labours of our Dutch navigators previously to the date of their adventurous undertaking Three centuries have now elapsed since the first attempt was made to discover a north east passage to China and India The circumstances under which this took place cannot be better detailed than in the words of Clement Adams in his account of the newe Nauigation and discouerie of the kingdome of Muscouia by the north east in the yeere 1553 which is printed by Hakluyt in the first volume of his Principal Navigations At what time our marchants perceiued the commodities and wares of England to bee in small request with the countreys and people about vs and neere vnto vs and that those marchandizes which strangers in the time and memorie of our auncesters did earnestly seeke and desire were nowe neglected and the price thereof abated although by vs carried to their owne portes and all forreine marchandises in great accompt and their prises wonderfully raised certaine graue citizens of London and men of great wisdom and carefull for the good of their countrey began to thinke with themselves howe this mischiefe might be remedied Neither was a remedie as it then appeared wanting to their desires for the auoyding of so great an inconuenience for seeing that the wealth of the Spaniards and Portingales by the discouerie and search of newe trades and countreys was marueilously increased supposing the same to be a course and meane for them also to obtaine the like they thereupon resolved upon a newe and strange nauigation And whereas at the same time one Sebastian Cabota 1 a man in those dayes very renowned happened to bee in London they began first of all to deale and consult diligently with him and after much speech and conference together it was at last concluded that three shippes should bee prepared and furnished out for the search and discouerie of the northerne part of the world to open a way and passage to our men for trauaile to newe and vnknown kingdomes And whereas many things seemed necessary to bee regarded in this so hard and difficult a matter they first make choyse of certaine graue and wise persons in maner of a senate or companie which should lay their heads together and giue their iudgements and prouide things requisite and profitable for all occasions by this companie it was thought expedient that a certaine summe of money should publicuely bee collected to serue for the furnishing of so many shippes And lest any priuate man should bee too much oppressed and charged a course was taken that euery man willing to be of the societie should disburse the portion of twentie and five pounds a piece so that in short time by this meanes the summe of sixe thousand pounds being gathered the three shippes were bought the most part whereof they prouided to be newly built and trimmed

Occupied Economies Hein A.M. Klemann, Sergei Kudryashov, 2013-05-09 What were the consequences of the German occupation for the economy of occupied Europe After Germany conquered major parts of the European continent it was faced with a choice between plundering the suppressed countries and using their economies to supply its needs The choices made not only differed from country to country but also changed over the course of the war Individual leaders the economic needs of the Reich the military situation struggles between governors of occupied countries and Berlin officials and finally racism all had an impact on the outcome In some countries the emphasis was placed on

production for German warfare which kept these economies functioning New research presented for the first time in this book shows that as a consequence the economic setback in these areas was limited and therefore post war recovery was relatively easy However in other countries plundering was more characteristic resulting in partisan activity a collapse of normal society and a dramatic destruction not only of the economy but in some countries of a substantial proportion of the labour force In these countries post war recovery was almost impossible *The Kuyper Center Review, Volume 4* Gordon Graham, John Bowlin, 2014-04-20 This volume of essays is a new step by the Abraham Kuyper Center for Public Theology at Princeton Theological Seminary to stimulate new work in the broad area of Reformed theology and public life The contributions here deal largely with political themes some contemporary some historical Visser 't Hooft, 1900-1985 Jurjen Zeilstra, 2025-10-01 God's diplomat the pope of the ecumenical movement but also an acerbic theologian and a difficult person this is how journalists characterised Willem Adolf Visser t Hooft 1900 1985 He was one of the best known Dutch theologians outside the Netherlands and he left his mark on the world church Even at an early age he made profound efforts in support of international ecumenical youth and student organisations Dutch Student Christian Movement YMCA and World Student Christian Federation He led the World Council of Churches during its formative stages from 1938 and after its formal establishment in 1948 became its first general secretary serving until 1966 To Visser t Hooft the unity of the church was both an article of faith and a pragmatic organisation of church influence in a disunited world
