Online Book War Drugs Sport Organizational Legitimacy:

The War on Drugs in Sport Vanessa McDermott, 2015-10-23 This book is an innovative and compelling work that develops a modified moral panic model illustrated by the drugs in sport debate Drawing on Max Weber's work on moral authority and legitimacy McDermott argues that doping scandals create a crisis of legitimacy for sport governing bodies and other elite groups This crisis leads to a moral panic where the issue at stake for elite groups is perceptions of their organizational legitimacy The book highlights the role of the media as a site where claims to legitimacy are made and contested contributing to the social construction of a moral panic The book explores the way regulatory responses in this case anti doping policies in sport reflect the interests of elite groups and the impact of those responses on individuals or folk devils The War on Drugs in Sport makes a key contribution to moral panic theory by adapting Goode and Ben Yehuda's moral panic model to capture the diversity of interests and complex relationships between elite groups The difference between this book and others in the field is its application of a new theoretical perspective supported by well researched empirical evidence

Detecting Doping in Sport Stephen Moston, Terry Engelberg, 2016-11-10 The book explores the changing landscape of anti doping investigations which now largely centre on the collection of intelligence about doping through processes such as surveillance interviews with witnesses and interrogation of athletes It examines why and how investigative processes hitherto typically reserved for serious crimes have been co-opted by anti doping agencies into a situation where their potential for harm has received little or no critical consideration This book highlights the opportunities and threats inherent in adopting new investigative processes It is expected that many of the same problems that have engulfed forensic investigations over the last two decades such as miscarriages of justice are likely to surface in future anti doping investigations Drawing on empirical research and theory from a range of disciplines including forensic psychology criminology policing law sports management and policy studies this book fills a scholarly vacuum on the investigation of doping through non biological detection methods
