

## II. EFFECT OF FUNDAMENTAL RIGHTS: (2) HORIZONTAL

- Fundamental rights used (mostly by courts) to determine the entitlements and obligations of private parties against each other

### **Direct horizontal effect:**

- Remedy (e.g. damages, injunction) directly descends from fundamental rights
- Private party directly bound by fundam. right

### **Indirect horizontal effect:**

- Fund. right → interpretation of private law
- Private party not directly bound by fund. right

The European Union as Guardian of Internet Privacy Hielke Hijmans, 2016-09-06 This book examines the role of the EU in ensuring privacy and data protection on the internet It describes and demonstrates the importance of privacy and data protection for our democracies and how the enjoyment of these rights is challenged by particularly big data and mass surveillance The book takes the perspective of the EU mandate under Article 16 TFEU It analyses the contributions of the specific actors and roles within the EU framework the judiciary the EU legislator the independent supervisory authorities the cooperation mechanisms of these authorities as well as the EU as actor in the external domain Article 16 TFEU enables the Court of the Justice of the EU to play its role as

constitutional court and to set high standards for fundamental rights protection It obliges the European Parliament and the Council to lay down legislation that encompasses all processing of personal data It confirms control by independent supervisory authorities as an essential element of data protection and it gives the EU a strong mandate to act in the global arena The analysis shows that EU powers can be successfully used in a legitimate and effective manner and that this subject could be a success story for the EU in times of widespread euroskepsis It demonstrates that the Member States remain important players in ensuring privacy and data protection In order to be a success story the key stakeholders should be prepared to go the extra mile so it is argued in the book The book is based on academic research for which the author received a double doctorate at the University of Amsterdam and the Vrije Universiteit Brussels It builds on a long inside experience within the European institutions as well as within the community of data protection and data protection authorities It is a must read in a time where the setting of EU privacy and data protection is changing dramatically not only as a result of the rapidly evolving information society but also because of important legal developments such as the entry into force of the General Data Protection Regulation This book will appeal to all those who are in some way involved in making this regulation work It will also appeal to people interested in the institutional framework of the European Union and in the role of the Union of promoting fundamental rights also in the wider world Research Handbook on EU Internet Law Andrej

Savin, Jan Trzaskowski, 2023-10-06 The Internet has brought about unprecedented changes to modern life creating a connected society but also radically opening up the question of how to design and apply legal rules in a digital world This thoroughly revised second edition provides an updated exploration of the latest developments and controversies in European Internet law **The Financial Crisis in Constitutional Perspective** Poul F Kjaer, Gunther Teubner, Alberto

Febbrajo, 2011-07-27 This volume presents the first thorough sociologically informed legal analysis of the financial crisis which unfolded in 2008 It combines a multitude of theoretically informed analyses of the causes dynamics and reactions to the crisis and contextualises these within the general structural transformations characterising contemporary society It furthermore explores the constitutional implications of the crisis and suggests concrete changes to the constitutional set up of contemporary society Although the question of individual responsibility is of crucial importance the central idea animating the volume is that the crisis cannot be reduced to a mere failure of risk perception and management for which individual and collective actors within and outside of financial organisations are responsible The 2008 crisis should rather be understood as a symptom of far deeper structural transformations For example contemporary society is characterised by massive accelerations in the speed with which societal processes are reproduced as well as radical expansions in the level of globalisation These transformations have however been asymmetrical in nature insofar as the economic system has outpaced its legal and political counterparts The future capability of legal and political systems to influence economic reproduction processes is therefore conditioned by equally radical transformations of their respective operational forms and self

understanding Potentially the 2008 crisis therefore has far reaching constitutional implications Publishers' Rights and Copyright Law Michalina Kowala, 2025-06-30 This book assesses the related rights of press publishers in the context of access to information and media pluralism Discussing Art 15 of the Directive EU 2019 790 of 17 April 2019 the book looks to create balance between publishers rights and both the protection of freedom of expression and freedom of information With the rise of AI and an increasing interest on internet users right to access information the book focuses on online platforms and the dissemination of information as well as on the legal challenges posed by the use of AI to produce and disseminate news Using the French transposition of Art 15 as a case study and referring to its implementation in numerous Member States the book discusses the broad picture of publishers protection across Europe and even further as international case studies in Australia and Canada are also discussed The book will be of interest to researchers in the field of media law EU law copyright law and freedom of information

**The Right to Erasure in Eu Data Protection Law** Postdoctoral Researcher Jef Ausloos, 2020-04-27 The right to erasure or right to be forgotten has become a major flashpoint in the courts and public opinion of the potential and limits of data protection law to empower individuals to control their data This is the first book to focus on the right to erasure in the context of Article 17 of the GDPR its theory history and legal scope YSEC Yearbook of Socio-Economic Constitutions 2023 Eduardo Gill-Pedro, Andreas Moberg, 2024-05-06 Artificial intelligence AI has the potential to radically transform our society It may lead to a massive increase in the capabilities of humankind and allow us to address some of our most intractable challenges It may also entail profound disruption to structures and processes that have sustained our society over centuries These developments present a unique challenge to the socio economic constitutional arrangements which govern our world at national regional and international level The deployment of increasingly powerful AI systems able to function with increasing degree of autonomy has led to concerns over loss of human control of important societal processes over the disruption of existing economic social and legal relationships and over the empowerment of some societal actors at the expense of others together with the entrenchment of situations of domination or discrimination It has also made increasingly clear how tremendous the potential benefits that these technologies may bring are to those who successfully develop and deploy them There is therefore great pressure on governments international institutions public authorities civil society organisations industry bodies and individual firms to introduce or adapt mechanisms and structures that will avoid the potentially negative outcomes of AI and achieve the positive ones These mechanisms and structures which have been given the umbrella term AI governance cover a wide range of approaches from individual firms introducing ethical principles which they volunteer to abide by to the European Union legislating an AI Act which will prohibit certain types of AI applications and impose binding obligations on AI developers and deployers The fast pace of innovation in the development of AI technologies is mirrored by the fast pace of development of the emerging field of AI governance where traditional legislation by public bodies is complemented with more innovative approaches such

*Global Technology and Legal Theory* Guilherme Cintra Guimarães, 2019-06-05 The rise and spread of the Internet has accelerated the global flows of money technology and information that are increasingly perceived as a challenge to the traditional regulatory powers of nation states and the effectiveness of their constitutions The acceleration of these flows poses new legal and political problems to their regulation and control as shown by recent conflicts between Google and the European Union EU This book investigates the transnational constitutional dimension of recent conflicts between Google and the EU in the areas of competition taxation and human rights More than a simple case study it explores how the new conflicts originating from the worldwide expansion of the Internet economy are being dealt with by the institutional mechanisms available at the European level The analysis of these conflicts exposes the tensions and contradictions between on the one hand legal and political systems that are limited by territory and on the other hand the inherently global functioning of the Internet The EU's promising initiatives to extend the protection of privacy in cyberspace set the stage for a broader dialogue on constitutional problems related to the enforcement of fundamental rights and the legitimate exercise of power that are common to different legal orders of world society Nevertheless the different ways of dealing with the competition and fiscal aspects of the conflicts with Google also indicate the same limits that are generally attributed to the very project of European integration showing that the constitutionalization of the economy tends to outpace the constitutionalization of politics Providing a detailed account of the unfolding of these conflicts and their wider consequences to the future of the Internet this book will appeal to scholars working in EU law international law and constitutional law as well as those in the fields of political science and sociology
