Online Point Making Sense Everything Between:

ON/OFF Sarah Genner, 2017-01-03 Are you constantly online Or are you offline sometimes Are you offline if you are not interacting with your connected devices Or if no data about you is being collected Do you check Instagram and Twitter during dinner Do you turn off your smartphone at night Do you check work emails on vacation Do you feel you have to disconnect regularly to relax to concentrate or to protect your privacy Or do you feel more relaxed when constantly connected because your loved ones a work emergency or the news are always at your fingertips Why are some people even within networked societies still completely offline given the tremendous opportunities of the Internet And what does it even mean to be online or offline in the age of hyper connectivity In ON OFF Sarah Genner assesses the risks and rewards of the anytime anywhere Internet focusing on digital divides social relationships physical and mental health and data privacy She discusses implications for a variety of decision makers in the world of work in education in families and in politics The author deconstructs the online offline dichotomy and suggests the ON OFF scale as a new theoretical framework for researchers and practitioners

The Space of the World Nick Couldry, 2024-09-17 Over the past thirty years humanity has made a huge mistake We handed over to big tech decisions that have allowed them to build what has become our space of the world the highly artificial space of social media platforms where much of our social life now unfolds This has proved reckless and has huge social consequences The toxic effects on social life young people s mental health and political solidarity are well known but the key factor underlying all this has been missed the fact that humanity allowed business to construct our space of the world at all and then exploit it for profit In the process we ignored two millennia of political thought about the conditions under which a healthy or even a non violent politics is possible We endangered the one resource that is in desperately short supply in the face of catastrophic climate change solidarity Is human solidarity possible in a world of continuous digital connection and commercially managed platforms and what if it isn t In the first book of his trilogy Humanising the Future Nick Couldry offers a radical new vision of how to design our digital spaces so that they build rather than erode both solidarity and community This trenchant and vividly written book stresses that we cannot afford not to care for our space of the world We need to rebuild it together

Using Web and Paper Questionnaires for Data-Based Decision Making Susan J. Thomas, 2004-03-06 Excerpt tribe He had faculties He had also various idiosyncrasies He was undeniably the best hunter and trapper and trainer of dogs to sledge as well as the most expert upon snowshoes of all the Indians living upon the point and he was furthermore one of the dirtiest of them and the biggest drunkard whenever opportunity afforded Fortunately for him and for his squaw Bigbeam as she had been facetiously named by an agent of the company the opportunities for getting drunk were rare for the company is conservative in the distribution of that which makes bad hunters Given an abundance of firewater and tobacco Red Dog was the happiest Indian between the northern boundary of the United States and Lake Gary deprived of them both he hunted vigorously thinking all the while of the coming hour when after a long

journey and much travail he should be in what was his idea of heaven again To day though the rifle bought from the company stood idle beside the ridge pole the sledge dogs snarled and fought upon the snow outside and Bigbeam squat and broad as became her name looked askance at her lord as she prepared the moose meat uncertain of his temper for his face was cloudy Red Dog was in fact perplexed and was planning deeply Good reason was there for Red Dog s thought Events of the immediate future were of moment to him and all his fellows among whom though no chief was formally acknowledged he was recognized as leader for had he not at one time been with the company as a hired hunter Had he not once gone with a fur carrying party even to Hudson s Bay and thence to the far south and even to Quebec And did he not know the ways of the company and could not he talk a French patois which enabled him to be understood at the stations Now as fitting representative of himself and of his clan a great responsibility had come upon him and he was lost in as anxious thought as could come to a biped of his quality Like a more or less

See Me, See You Clarissa Chikiamco ,Cheng Jia Yun,2024-03-26 See

Me See You is the world's first exhibition of early video installation of Southeast Asia spanning the early 1980s to the early 1990s. This catalogue traces the journeys and evolving identities of the ten artists featured in the show and their pivotal experiments with the moving image which incorporate readymade objects and cathode ray tube television monitors as well as performative and participatory elements. Their artworks encapsulate the techniques and materials of their generation and mark the emergence of video installation as a form in the region. The publication features interviews, essays, rare archival images and texts as well as a timeline that highlights the definitive technological moments and inventions that propelled television and video in global and regional contexts. **Chaotic Yesterdays of Impeccable Greed** Seth Kinstle, 2023-01-05

People get a little greedier everyday. They go crazy and things happen that shouldn't. Everyone loses their mind over the simplest of luxuries. So who am I to dwindle in the darkness as if I don't owe the world a little disgust. I was never normal but nothing is ever about me; it's about money. It's about the thrill that pulses through your veins when you're about to show everyone your worth. You might lose your mind but it's just part of the game. The city doesn't care who you are; it swallows all in its wake. Your memories will be taken under as you examine the treacherous path of a bloody mess you left behind. Everyone is the same; it's why we try so hard to be different. So pull up a stepping stool as we disappear into the formally unreachable cabinet in your kitchen to take a peek at your red-soaked cash. It's time to face your chaotic yesterdays of impeccable greed. *Advances in Facet Theory Research: Developments in Theory, Application and Related Approaches*

Paul M. W. Hackett, Yael Fisher, 2019-11-01. In this Research Topic, the two editors bring together a series of articles that use facet theory and allied approaches to research. Since its inception in the work of Louis Guttman in the mid-twentieth century, facet theory has become an established approach within social science research. In addition, over the past 70 years, a wide range of research publications have appeared operating within the theoretical and analytic rubric of facet theory, and for the last two decades, a biennial international conference has been held devoted to facet theory research. When using a facet theory approach, an implicit aim of the research within this framework is to bring together in an explicit manner a clear definition of the content area that is being investigated along with data analysis procedures. Integrating the explicit design of research content, for example, attitudes, values, etc., and its subsequent analysis, for example, to identify the variables that are influential to respondents in relation to the specific area under investigation, allows for the construction of theory relating to the content area and for the meaningful measurement of complex research areas. The clear explication of an area of research content is achieved through the use of a mapping sentence (MS). In a MS, all of the pertinent variables called facets associated with the specific subject matter of the research study are specified in the form of a natural language sentence where facets/variables are arranged to demonstrate how these theoretically relate to each other. Sub-levels of facets are defined in such a way as to capture the relationships of research variables/facets to each other and the overall research domain. Background variables are also stated in the MS along with a specified range over which observations will be made to test the veracity of

the structural hypotheses statements regarding the proposed manner in which variables are related to the study's content implicit in the MS Furthermore by using a MS the researcher is able to select variables that appropriately address the area of content Traditionally facet theory has been used in quantitative research but has recently been applied to the analysis of qualitative and philosophical research which incorporates a declarative mapping sentence in such research and which is included in this Research Topic In order to interrogate these structural hypotheses quantitative data analysis procedures are employed such as Smallest Space Analysis SSA and Partial Order Scalogram Analysis by base Coordinates POSAC In SSA the structure of the content area of interest the variables that have been included in the MS can be interrogated as observations that have been made along the specified outcome range are represented geometrically as partitioned regions in a concept space related to the specific research domain Individual respondents may also be investigated in terms of their profile of facet related scores using POSAC A similar approach is employed when analysing information from qualitative facet theory research which interrogates the structural hypotheses present in the declarative mapping sentence through approaches such as content and narrative analyses This Research Topic presents work from scholars with particular emphasis upon how the approach has developed both theoretically and in terms of its application new areas of application and advances in theory development

Spandrel or Fitrah? An Essay on the Relationship between Cognitive Science of Religion and Fitrah Osman Zahid Çifçi, 2023-03-23 Professorial Dissertation from the year 2023 in the subject Philosophy Theoretical Realisation Science Logic Language grade 1.0 Selçuk University Faculty of Islamic Studies course philosophy and religious studies language English abstract This paper analyzes the two concepts of spandrel and fitrah in the context of the Cognitive Science of Religion and opposed to that evolutionary thinking Despite that the two concepts in this study's title seem to have the same meaning they are understood differently due to differences in perspective Both concepts acknowledge that human beings have certain innate faculties and claim that these faculties predispose them to believe and be moral Spandrel argues that these innate faculties are a result of adaptations that enable us to survive in the evolutionary process while fitrah asserts that these faculties are given by God In the study first the experimental studies proposed by the proponents of the idea of spandrel and the general ideas of the Cognitive Science of Religion CSR are given Then it has been established through experimental tests that these faculties proposed by this theory have similar aspects with the Commonsense Principles put forward by Thomas Reid and his epistemological views have been conveyed According to him we should rely on the information provided by these faculties and accept that they are essential for reasoning After these determinations were made the study argued that the concept of fitrah aligns with the idea of the Cognitive Science of Religion CSR and Thomas Reid's views
