Cruz,2024-10-21 This book offers a philosophical inquiry into the idea of curriculum as confession and considers how it can help us answer questions of justice selfhood and truth It connects the field of curriculum studies and continental philosophy in order to arrive at new ways of thinking through the concept and act of confession Utilising a phenomenological and deconstructive approach to thinking about curriculum the author draws upon scholars including William Pinar Jacques Derrida Madeleine Grumet and Michel Foucault to act as interlocutors for a re thinking of Pinar s statement that we need educational confession The chapters argue that confession communicates the interplay between thinking translation and transformation showing how confession can be conceived of as educative in both instrumental and existential ways An innovative study that explores confession in both religious and secular senses and conceptualises curriculum as a theological and phenomenological text it uniquely explores what confession can reveal how we tell the truth without violating the other and how one does justice to the world they experience It will appeal to scholarly audiences with interests in curriculum studies teacher education philosophy of education religious studies religious education and theology **Fixing Our Schools from the Bottom Up** United States. Committee on the Budget,1999 *Assessing Accomplished Teaching* National Research Council,Division of Behavioral and Social Sciences and Education,Center for Education,Board on Testing and Assessment,Committee on Evaluation of Teacher Certification by the National Board for Professional Teaching Standards,2008-10-04 The mission of the National Board for Professional Teaching Standards NBPTS is to establish high and rigorous standards for what teachers should know and be able to do to certify teachers who meet those standards and to advance other education reforms for the purpose of improving student learning in American schools In response to a request from the U S Congress the National Research Council developed a framework for evaluating programs that award advanced level teacher certification and applied that framework in an evaluation of the impacts of the NBPTS Specifically this book addresses the impacts on students teachers and the educational system in this country *Assessing Accomplished Teaching* finds that teachers who earn board certification are more effective at improving their students achievement than other teachers but school systems vary greatly in the extent to which they recognize and make use of board certified teachers Many of the questions on the evaluation framework could not be answered because the

data have not been collected and the report makes recommendations for the kinds of research that are needed to fully evaluate the impacts of board certification by the NBPTS

Holding Schools Accountable Kris Sloan, 2006-12-30 Sloan explores the varied contours of the educational accountability movement that has swept the United States He describes the historical origins and underlying assumptions of present day accountability measures current issues surrounding accountability relationships between the accountability and the standards movements and the role of standardized testing in each of these movements and provides a critical reading of the seemingly divided literature concerning the effects of accountability on public education This volume also focuses on the implications of accountability measures on parents families and communities including details of the varied efforts by grassroots organizations that have raised concerns over current accountability measures While there has been a substantial amount of parent and community opposition to both state and national accountability policies increasingly these organizations are offering suggestions for ways to make accountability measures better and more responsive to both community and student needs The work concludes by offering valuable suggestions about improving even strengthening accountability measures in ways that are more

responsive and respectful of students their families and local communities Education Reform in Florida Kathryn M. Borman, Sherman Dorn, 2012-02-01 In Education Reform in Florida sociologists and historians evaluate Governor Jeb Bush's nation leading school reform policies since 1999 They examine the startlingly broad range of education policy changes enacted in Florida during Bush's first term including moves toward privatization with a voucher system more government control of public education institutions with centralized accountability mechanisms and a superboard for all public education The contributors arrive at a mixed conclusion regarding Bush's first term education policies while he deserves credit for holding students to higher standards his policies have unfortunately pushed for equality in a very narrow way The contributors remain skeptical about seeing significant and sweeping improvement in how well Florida schools work for all students *School Violence and Vandalism* United States.
