EU Law Stories Fernanda Nicola,Bill Davies,2017-05-29 Through an interdisciplinary analysis of the rulings of the Court of Justice of the European Union this book offers thick descriptions contextual histories and critical narratives engaging with leading or minor personalities involved behind the scenes of each case The contributions depart from the notion that EU law and its history should be narrated in a linear and incremental way to show instead that law evolves in a contingent and not determinate manner The book shows that the effects of judge made law remain relatively indeterminate and each case can be retold through different contextual narratives and shows the commitment of the European legal elites to the experience of legal reasoning The idea to cluster the stories around prominent cases is not to be fully comprehensive but to re focus the scholarship and teaching of EU law by moving beyond the black letter and unravel the lawyering techniques to achieve policy results

decide on the investment strategy that might bear systemic risks Due to their financial market potential and in view of the design of financial products these entities admittedly have a strong impact on the financial market development and may jointly be responsible for the realisation of systemic risks of transnational dimensions In particular in the view of a steady credit supply of the real economy the enormous transnational mobility of capital and the global competition of financial market regulations it seems doubtful whether one can identify the fund managers as those responsible for the financial market crisis of 2008 2009 This thesis highlights the history symptoms and supposed core reasons of the financial crisis of 2008 2009 and critically assesses whether the AIFMD can reach its objective to effectively contain systemic risks in the context of a globalised financial system
