

A black and white photograph of a person crouching at the base of a waterfall. The person is wearing a dark shirt and light-colored pants, and is holding a long stick or pole. The waterfall is a wide, powerful cascade of water falling over a rocky ledge. The surrounding area is rocky and appears to be a natural, undeveloped landscape. A blue rectangular text box is overlaid on the right side of the image, containing the title and authors' names in white text.

## **Micro Hydro Design Manual Adam Harvey:**

Micro-hydro Design Manual Adam Harvey, Andy Brown, Priyantha Hettiarachi, Allen Inversin, 1993-01 Micro Hydro Design Manual has grown from Intermediate Technology's field experiences with micro hydro installations and covers operation and maintenance commissioning electrical power induction generators electronic controllers management and energy surveys There is an increasing need in many countries for power supplies to rural areas partly to support industries and partly to provide illumination at night Government authorities are faced with the very high costs of extending electricity grids Often micro hydro provides an economic alternative to the grid This is because independent micro hydro schemes save on the cost of grid transmission lines and because grid extension schemes often have very expensive equipment and staff costs In contrast micro hydro schemes can be designed and built by local staff and smaller organizations following less strict regulations and using off the shelf components or locally made machinery
