

Step #1: Ask a Question

Have you been wondering about something science?

The first step is to ask a question.

Then you ask a science question.

Step #3: Hypothesize

*Now it's time to answer the question. The hypothesis states what you **think** will happen, based on your background knowledge and research.*

Step #2: Conduct Research

Use the Internet to find out what others know about this question.

Just type the question in the search bar, and add "for kids" to get simpler answers.

Step #4: Design a Fair Test

It's time to plan your experiment!

To make sure your experiment will answer the question, you

Step #5: Make observations

A scientist makes observations.

This involves more than just looking. You use scientific tools to measure carefully.

Step #6: Record Results.

As you observe, you must also record your results.

What does this mean?

You must write down everything you've observed.

Step #7: Draw Conclusions

Now you must think about the question again.

Which will evaporate more, water in an open cup or water in a covered cup?

To draw a conclusion, answer based on your results.

Step #8: Share Results

To share your results with others, you must put them in a format that is easy to understand. For example:

- a table
- a graph
- a report

Jenice Goldston, Laura Downey, 2012-01-18 Designed around a practical practice what you teach approach to methods instruction *Your Science Classroom Becoming an Elementary Middle School Science Teacher* is based on current constructivist philosophy organized around 5E inquiry and guided by the National Science Education Teaching Standards Written in a reader friendly style the book prepares instructors to teach science in ways that foster positive attitudes engagement and meaningful science learning for themselves and their students *Elementary Science Methods* Andrew Martin, David Jerner Martin, 2002-07 This popular text is the first science methods

book to truly practice what it preaches using a constructivist approach to guide students in learning how to teach in a constructivist manner The text includes a wealth of open ended inquiry activities such as Constructing Your Ideas for students to complete in class These activities help students to construct their own personal conceptualizations about teaching science in the elementary school This text also features over 170 process oriented activities for children including Constructing Science in the Classroom and In the Schools each keyed to grade levels and each open ended so teachers can encourage children to develop and perform their own investigations All activities are linked to National Science Education Standards for appropriate content professional development assessment and teaching and the activities contain suggestions of appropriate accompanying children s literature Martin s text takes the approach that it is more important for children to learn how to do science than it is for them to learn about science Children learn how to do science by mastering the scientific processes and applying them in inquiries into scientific questions Employing the constructivist approach teachers help children form personally constructed meanings from their own experience and thought The text is predicated on the reality that teachers of elementary science do not need to know a great deal of science to be good science teachers but need to be co inquirers with their students *A Digest of Investigations in the Teaching of Science* Francis Day Curtis,1926

Discovering Elementary Science Marvin N. Tolman,2002 This book s useful two part structure offers a comprehensive source of methods content and activities for elementary science educators Part I provides background and teaching strategies while Part II explains science concepts followed by activities to teach them Especially useful for preservice and inservice teachers the activities include Teacher Information and For Problem Solvers sections to aid in activity implementation and extensions For preservice and inservice science teachers from Pre K to middle school **Teaching Elementary School Science** Paul Eduard Kambly,John E. Suttle,1963 *Science in Elementary Education: Pearson New International Edition* Joseph M. Peters,David L. Stout,2013-11-01 For Elementary and Middle School Science Methods courses Substantially rewritten to focus on inquiry teaching and learning as espoused in the National Science Education Standards the new edition of Science in Elementary Education Methods Concepts and Inquiries will prepare pre service teachers to plan facilitate adapt and assess inquiry experiences consistent with today s science classroom It accomplishes this by implementing the 6E model of inquiry teaching addressing the planning and needs of inquiry teaching classrooms and describing the materials teachers need to get up and running This practical text includes over 350 Teaching Tips throughout and Twelve Inquiry Units that model constructivist applications build conceptual knowledge and provide a bank of classroom tested lessons to use in science classrooms *The Technique and Value of Project Teaching in General Science* Ralph Knupp Watkins,1923 **Readings in Science Education for the Elementary School** Edward Victor,Marjorie S. Lerner,1967 This book has been produced with two purposes in mind First the current widespread interest and activity in elementary science is rapidly producing new developments in several directs Second it is common practice for instructors of the methods

course in elementary science to distribute reading lists and require outside reading Elementary Science Methods Lauren Madden, 2022-01-12 As teachers and parents we often hear that children are the best scientists Great science teachers tune in to children's interests and observations to create engaging and effective lessons This focus on the innate curiosity of children or humans overall is celebrated and used to justify and support efforts around STEM teaching and learning Yet when we discuss elementary school teachers we often hear many inside and outside the classroom report that these teachers dislike fear and feel uncomfortable with science This is exactly the opposite approach from what is universally recommended by science education scholars This practical textbook meets the immediate contextual needs of future and current elementary teachers by using an assets based approach to science teaching showing how to create inquiry based lessons differentiate instruction and lesson design based on children's developmental ages and needs and providing easy to use tools to advocate for scientific teaching and learning guided by the Next Generation Science Standards NGSS **Constructing Meaning in a Science Methods Course for Prospective Elementary Teachers** Barbara S. Spector, 2016-02-10 How do prospective elementary science teachers think This case study reveals thinking patterns common to preservice elementary teachers identifies their behavioral characteristics while learning to teach science which are not commonly noted in current literature provides change strategies to accelerate preservice elementary teachers embracing the holistic constructivist inquiry practice based paradigm consistent with the standards set by the curriculum The chapters in this book immerse the reader in a sequence of episodes in this science methods course and reveal the adventure of turning theory into practice while analyzing student student student instructor interactions and their outcomes in an inquiry driven flipped classroom Strategies presented empower preservice elementary teachers to implement national and state standards change science learning teaching from business as usual to applying science and engineering practices in the classroom make cognitive and behavioral changes required to shift paradigms and eliminate science anxiety pass through stages of grief inherent in the loss of dominant mechanistic paradigm This book will interest a wide readership including science educators scientists and engineers administrators supervisors and elementary teachers in a clinical education setting preservice elementary teachers and anyone seeking to improve STEM education in elementary schools The Concept Method of Teaching Elementary Science Doris Bagley, 1951 **Elementary Science Methods: A Constructivist Approach** David Martin, 2005-07-22 In this pioneering text Martin uses a constructivist approach to guide students in learning how to teach in a constructivist manner Grounded in the belief that it is more important for children to learn how to do science than it is for them to learn about science this text is predicated on the reality that teachers of elementary science do not need to know a great deal of science to be good science teachers but need to be co inquirers with their students To facilitate your students learning this text features a wealth of exercises for teacher candidates the book includes open ended inquiry activities that help them to construct their own personal conceptualizations about science content and teaching science in the elementary school and it

contains over 170 process oriented open ended activities that teachers can use to encourage children to develop and perform their own investigations The Book Companion CD ROM included with each new copy provides tools and resources such as additional activities and video which students can use both in their college course and later in elementary science classrooms All activities are linked to National Science Education Standards for content professional development assessment and teaching and the activities contain suggestions of appropriate children s literature Important Notice Media content referenced within the product description or the product text may not be available in the ebook version **Elementary**

Science Methods: A Constructivist Approach David Jerner Martin,2008-01-31 As the groundbreaking text that pioneered a constructivist approach to elementary science teaching ELEMENTARY SCIENCE METHODS A CONSTRUCTIVIST APPROACH Fifth Edition is based on two fundamental and complementary ideas it is more important for children to learn how to do science than to learn about science and elementary science teachers do not need to know a great deal of science but rather should be co inquirers with their students This text features a wealth of exercises including open ended inquiry activities that help teacher candidates construct their own personal conceptualizations about science content and teaching methods More than 170 process oriented open ended activities organized by grade level are suggested to encourage children to develop and perform their own investigations The Book Companion DVD available separately provides valuable tools and resources such as additional activities and video clips that students can use both in their college course and later in elementary science classrooms All activities and much of the text content are clearly linked to National Science Education Standards NSES for content professional development assessment and teaching and they contain suggestions of appropriate children s literature to encourage interdisciplinary learning Important Notice Media content referenced within the product description or the product text may not be available in the ebook version **Handbook of Research on Science Teacher**
