Biodiversity Hotspots Frank E. Zachos, Jan Christian Habel, 2011-09-15 Biodiversity and its conservation are among the main global topics in science and politics and perhaps the major challenge for the present and coming generations This book written by international experts from different disciplines comprises general chapters on diversity and its measurement human impacts on biodiversity hotspots on a global scale human diversity itself and various geographic regions exhibiting high levels of diversity The areas covered range from genetics and taxonomy to evolutionary biology biogeography and the social sciences In addition to the classic hotspots in the tropics the book also highlights various other ecosystems harbouring unique species communities including coral reefs and the Southern Ocean The approach taken considers but is not limited to the original hotspot definition *sensu stricto* and presents a chapter introducing the 35th hotspot the forests of East Australia While due to a bias in data availability the majority of contributions on particular taxa deal with vertebrates and plants some also deal with the less studied invertebrates This book will be essential reading for anyone involved with biodiversity particularly researchers and practitioners in the fields of conservation biology ecology and evolution

Fortune Favors the Bold Lester C. Thurow,2009-10-13

Bestselling author and renowned economist Lester Thurow argues forcefully that globalization is not a done deal and we must seize the moment now if we are to create a new global economy in which all can prosper In this new book Thurow

examines the newly forming global economy with a special focus on the role of the US and the dangers to our own national well being He examines such questions as What s at stake for us in the global economy Why is it important that the system be equitable and that other countries prosper along with us What should our goals as a nation be long term and short term What are the tough choices that need to be made in our relationship with other countries and world regulatory bodies What role should we be playing globally What are the political economic social choices tradeoffs we will have to confront Thurow contends that the huge and growing US trade deficit poses grave dangers to the value of the dollar and is putting our own economy in jeopardy As the world economy leaps national boundaries its hallmark seems to be a rising instability and a growing inequality between the first and third worlds Financial crises in the third world come ever more frequently and seem to be ever more severe The first world economies seem to be in ever more frantic boom and bust cycles Globalization causes riots throughout the world and is one factor in the rise of terrorism against the West Thurow shows how some nations including Ireland and China have embraced the concept of globalization and placed themselves into a position to prosper with growing and productive national economies He contrasts their positive actions with Japan whose leaders have allowed the nation to drift into stagnation and have destroyed its prosperity He argues that this is the time to choose globalization or be left behind the time to build a global economy that eliminates the defects and he provides plenty of ideas for corporations governments economists and citizens to act upon

Europe for a greater understanding of geographic interrelationships This comprehensive volume is a first stop reference source for the most significant political cultural and economic conflicts in North America and Europe today **Becoming Campesinos** Christopher Robert Boyer,2003 Becoming Campesinos argues that the formation of the campesino as both a political category and a cultural identity in Mexico was one of the most enduring legacies of the great revolutionary upheavals that began in 1910 The author maintains that the understanding of popular class unity conveyed by the term campesino originated in the interaction of post revolutionary ideologies and agrarian militancy during the 1920s and 1930s The book uses oral histories archival documents and partisan newspapers to trace the history of one movement born of this dynamic agrarismo in the state of Michoacán **Non-Aligned Movement Summits** Jovan Cavoški,2022-05-19 Using newly declassified documents from Serbian British Indian Chinese Myanmar U S and Soviet archives Non Aligned Movement Summits shows how the Non Aligned Movement NAM gradually evolved into the third force of Cold War politics enveloping most of the post colonial and non bloc world Jovan Cavo ki follows the evolution of the NAM through its summits and other gatherings during which major political decisions pertaining to the destiny of the Third World were made These events were scrutinized by all major powers and had a corresponding effect on their policies From the Belgrade Conference in 1961 until 1989 all major Third World and non bloc nations met to demonstrate to the Eastern and Western Blocs that they were independent active and respected participants in world affairs Cavo ki shows how these summits were also closely related to events occurring in the relationship between the two blocs providing opportunities for non bloc actors to influence the global balance of power By moving the focus of 20th century international history away from the bloc nations and instead giving developing nations in Africa and Asia due attention this book provides a fresh perspective on Cold War history and fills a significant gap in the literature It is an important study for all students and scholars of the Cold War and international history
