**mHealth Ecosystems and Social Networks in Healthcare** Athina A. Lazakidou, Stelios Zimeras, Dimitra Iliopoulou, Dionysios-Dimitrios Koutsouris, 2015-12-16 This book provides a principled approach to classification using the available data in a model which combines information from the social network and the healthcare models. It presents studies from leading researchers and practitioners focusing on the current challenges, directions, trends, and opportunities associated with healthcare delivery systems and their supporting wireless and mobile health technologies. mHealth Ecosystems and Social Networks in Healthcare is divided into two parts. Part I covers the area of mHealth Ecosystems. Chapters include topics on adoption of cloud-based mHealth services, the socio-economic impact of mHealth, as well as self-management of health and disease. In Part II, Social Networks in Healthcare are highlighted. Chapters cover social media and patient support, virtual knowledge sharing and knowledge management, and also web-based applications in health care. Ultimately, this book is an excellent source of comprehensive knowledge and literature on the topics of mobile health ecosystems and social networks in healthcare.

**Impacts of Information Technology on Patient Care and Empowerment** McHaney, Roger W., Reychev, Iris, Azuri, Joseph, McHaney, Mark E., Moshonov, Rami, 2019-09-20 Modern technology has impacted healthcare and interactions between patients and healthcare providers through a variety of means, including the internet, social media, mobile devices, and the internet of things. These new technologies have empowered frustrated, educated, and confused patients by making educational materials more widely available and allowing patients to monitor their own vital signs and self-diagnose. Further analysis of these and future technologies is needed in order to provide new approaches to empowerment, reduce mistakes, and improve overall healthcare. Impacts of Information Technology on Patient Care and Empowerment is a critical scholarly resource that delves into patient access to information and the effect that access has on their relationship with healthcare providers and their health outcomes. Featuring a range of topics such as gamification, mobile computing, and risk analysis, this book is ideal for healthcare practitioners, doctors, nurses, surgeons, hospital staff, medical administrators, patient advocates, researchers, academicians, policymakers, and healthcare students.

Body Area Network Challenges and Solutions R. Maheswar, G. R. Kanagachidambaresan, R. Jayaparvathy, Sabu M. Thampi, 2018-12-18 This book provides a novel solution for existing challenges in wireless body sensor networks (WBAN) such as network lifetime, fault-tolerant approaches, reliability, security, and privacy. The contributors first discuss emerging trends of WBAN in the present health care system. They then provide possible solutions to challenges inherent in WBANs. Finally, they discuss results in working environments. Topics include communication protocols of implanted wearable and nano-body sensor networks, energy harvesting methodologies, and experimentation for WBAN reliability analysis and fault-tolerant architecture for WBAN and handling network failure during critical duration. The contributors consist of researchers and practitioners in WBAN around the world.

**m-Health** Robert S. H. Istepanian, Bryan Woodward, 2016-11-14 Addresses recent advances from both the clinical and technological

perspectives to provide a comprehensive presentation of m Health This book introduces the concept of m Health first coined by Robert S H Istepanian in 2003 The evolution of m Health since then how it was transformed from an academic concept to a global healthcare technology phenomenon is discussed Afterwards the authors describe in detail the basics of the three enabling scientific technological elements of m Health sensors computing and communications and how each of these key ingredients has evolved and matured over the last decade The book concludes with detailed discussion of the future of m Health and presents future directions to potentially shape and transform healthcare services in the coming decades In addition this book Discusses the rapid evolution of m Health in parallel with the maturing process of its enabling technologies from bio wearable sensors to the wireless and mobile communication technologies from IOT to 5G systems and beyond Includes clinical examples and current studies particularly in acute and chronic disease management to illustrate some of the relevant medical aspects and clinical applications of m Health Describes current m Health ecosystems and business models Covers successful applications and deployment examples of m Health in various global health settings particularly in developing countries

development ICT for displaced population and refugees How it helps How it hurts ICT4D for the indigenous by the indigenous and of the indigenous local technical papers pushing the boundaries new research methods theory and philosophy in ICT4D southern driven human computer interaction sustainable ICT informatics education and learning in a turbulent world doing the safari way *mHealth* Donna Malvey, Donna J. Slovensky, 2014-07-14 This book defines the phenomenon of mHealth and its evolution explaining why an understanding of mHealth is critical for decision makers entrepreneurs and policy analysts who are pivotal to developing products that meet the collaborative health information needs of consumers and providers in a competitive and rapidly changing environment The book examines trends in mHealth and discusses how mHealth technologies offer opportunities for innovators and entrepreneurs those who often are industry first movers with regard to technology advancement It also explores the changing dynamics and relationships among physicians patients insurers regulators managers administrators caregivers and others involved in the delivery of health services The primary focus is on the ways in which mHealth technologies are revising and reshaping healthcare delivery systems in the United States and globally and how those changes are expected to change the ways in which the business of healthcare is conducted mHealth Transforming Healthcare consists of nine chapters that addresses key content areas including history to the extent that dynamic technologies have a history projection of immediate evolution and consistent issues associated with health technology such as security and information privacy and government and industry regulation A major point of discussion addressed is whether mHealth is a transient group of products and a passing patient encounter approach or if it is the way much of our health care will be delivered in future years with incremental evolution to achieve sustainable innovation of health technologies Artificial Neural Networks and Structural Equation Modeling Alhamzah Alnoor, Khaw Khai Wah, Azizul Hassan, 2022-11-19 This book goes into a detailed investigation of adapting artificial neural network ANN and structural equation modeling SEM techniques in marketing and consumer research The aim of using a dual stage SEM and ANN approach is to obtain linear and non compensated relationships because the ANN method captures non compensated relationships based on the black box technology of artificial intelligence Hence the ANN approach validates the results of the SEM method In addition such the novel emerging approach increases the validity of the prediction by determining the importance of the variables Consequently the number of studies using SEM ANN has increased but the different types of study cases that show customization of different processes in ANNs method combination with SEM are still unknown and this aspect will be affecting to the generation results Thus there is a need for further investigation in marketing and consumer research This book bridges the significant gap in this research area The adoption of SEM and ANN techniques in social commerce and consumer research is massive all over the world Such an expansion has generated more need to learn how to capture linear and non compensatory relationships in such area This book would be a valuable reading companion mainly for business and management students in higher academic organizations professionals policy makers and planners in the field of

marketing This book would also be appreciated by researchers who are keenly interested in social commerce and consumer research
