Sustainable Micro Irrigation Megh R. Goyal, 2014-07-14 This new book Principles and Practices of Sustainable Micro Irrigation is the first in the new series on micro irrigation which offers a vast amount of knowledge and techniques necessary to develop and manage a drip trickle or micro irrigation system Written by experienced scientists from various parts of the world the chapters in this book offer basic principles knowledge and techniques of micro irrigation management which are essential in designing developing and evaluating an agricultural irrigation management system The methods and techniques have worldwide applicability to irrigation management in agriculture The book includes coverage of many important topics in the field including An historical review of micro irrigation The current global status of the field and its potential Basic principles and applications New research on chemigation and fertigation Technologies for specific crops such as sugar cane Irrigation software for micro irrigation design Affordable and low cost micro irrigation solutions for small farms and farms in developing countries Micro irrigation design using Hydrocalc software This book is a must for those interested in irrigation planning and management namely researchers scientists educators and students Micro Irrigation Scheduling and Practices

Megh R. Goyal, Balram Panigrahi, Sudhindra N. Panda, 2017-09-07 Many countries around the world are struggling with the challenges of water scarcity including water for crops Micro irrigation methods are an effective means to make the most efficient use of available water This volume Micro Irrigation Scheduling and Practices continues the efforts of the book series Innovations and Challenges in Micro Irrigation to provide informative and comprehensive knowledge on micro irrigation methods and practices This new book presents some of the latest information and research on micro irrigation and covers the area of performance practices and design focusing particularly on the performance of vegetable fruit and row crops in conjunction with different scheduling and practices Irrigation scheduling is an important water management strategy and this book addresses scheduling methods and issues Design aspects of micro irrigation systems have also been discussed in the book The authors present their research and studies on scheduling practices and design micro irrigation systems with a variety of fruits and vegetables including peppers chili watermelon oranges banana litchi rice sugarcane sorghum and marigolds Micro Irrigation Scheduling and Practices will serve as a valuable reference for researchers water resources professionals agricultural extension agencies farmers and faculty and students **Manuals Combined: 150+**
