to use the microbial communities and microbial data literature and the research materials themselves as a test case the Board on Research Data and Information held an International Symposium on Designing the Microbial Research Commons at the National Academy of Sciences in Washington DC on 8 9 October 2009 The symposium addressed topics such as models to lower the transaction costs and support access to and use of microbiological materials and digital resources from the perspective of publicly funded research public private interactions and developing country concerns The overall goal of the symposium was to stimulate more research and implementation of improved legal and institutional models for publicly funded research in microbiology

 microbiologically safe and stable foods The work begins with an overview and then addresses four major areas Principles and
 application of food preservation techniques covers the specific techniques that defeat growth of harmful microorganisms how
 those techniques work how they are used and how their effectiveness is measured Microbial ecology of different types of food
 provides a food by food accounting of food composition naturally occurring microflora effects of processing how spoiling can
 occur and preservation Foodborne pathogens profiles the most important and the most dangerous microorganisms that can
 be found in foods including bacteria viruses parasites mycotoxins and mad cow disease The section also looks at the

economic aspects and long term consequences of foodborne disease Assurance of the microbiological safety and quality of foods scrutinizes all aspects of quality assurance including HACCP hygienic factory design methods of detecting organisms risk assessment legislation and the design and accreditation of food microbiology laboratories Tables photographs illustrations chapter by chapter references and a thorough index complete each volume This reference is of value to all academic research industrial and laboratory libraries supporting food programs and all institutions involved in food safety microbiology and food microbiology quality assurance and assessment food legislation and generally food science and technology
