Fusing Decision Support Systems Into the Fabric of the Context A. Respício, F. Burstein, 2012-06-13 The field of Information Systems has been shifting from an immersion view which relies on the immersion of information technology IT as part of the business environment to a fusion view in which IT is fused within the business environment forming a unified fabric that integrates work and personal life as well as personal and public information In the context of this fusion view decision support systems should achieve a total alignment with the context and the personal preferences of users The advantage of such a view is an opportunity of seamless integration between enterprise environments and decision support system components Thus researchers and practitioners have to address the challenges of dealing with this shift in viewpoint and its consequences for decision making and decision support systems theories and applications This book presents the latest innovations and

advances in decision support systems with a special focus on the fusion view These achievements will be of interest to all those involved and interested in decision making practice and research as well as more generally in the fusion view of modern information systems The book covers a wide range of topical themes including a fusion view of business intelligence and data warehousing applications of multi criteria decision analysis intelligent models and technologies for decision making knowledge management decision support approaches and models for emergency management and medical and other specific domains Operational Research for Health Policy: Making Better Decisions Paul Harper, 2007 ORAHS the Working Group on Operational Research Applied to Health Services is a special interest group of EURO the European Association of OR Societies ORAHS meets every year in a different host country The objectives of the group include communication of ideas knowledge and experience concerning the application of Operational Research approaches and methods to problems in the health services area mutual support between members and collaboration on joint projects The 31st meeting of ORAHS was held in 2005 at the University of Southampton UK A total of forty one scientific papers were presented nineteen of which are contained in this volume The application areas covered include resource allocation performance measurement and disease modelling from within Europe and beyond The approaches used range from mathematical optimization simulation and statistical modelling through to soft OR These proceedings provide a broad perspective on current research in this area across Europe and beyond
