How to play

Give children a die (D4 or a spinner D12), two different coloured pencil crayons and a number line that has 0 and 10 at the start and end points.

Children take it in turns to roll the dice three times and then use the digits to create a 3-digit number with two decimal places. E.g., if 1 were to roll 4, 3 and then 0.1 could create the number 0.431, 0.341 or 4.31 etc.

Using crayons, children draw marks their number on the number line with their chosen coloured pencil crayons.

The winner is the first person to mark three numbers in a row without their opponent marking a number in between.

Ways to play

There are a few ways to play this game. Please choose the way that will work best for your class.

In pairs

- Children can work collaboratively here and help support and scaffold each other.
- Supplying questioning prompts and questions can help children to think reasoning.

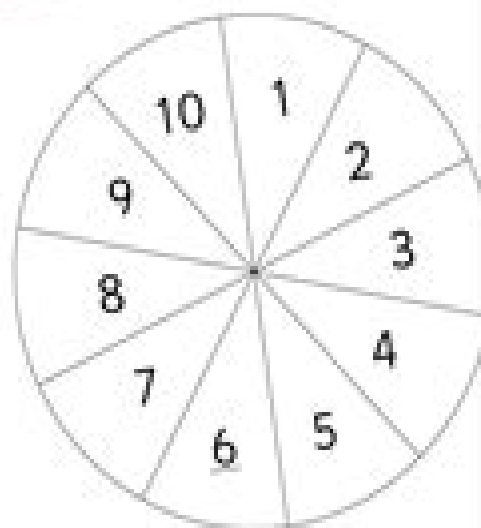

In groups

- Children can work collaboratively here and help support and scaffold each other.
- Supplying questioning prompts and questions can help children to think reasoning.
- Roles: promoter (ask and reasoning in the groups) but can be more challenging. Consider assigning roles if thinking group work so each member is actively participating.

As a whole class discussion on groups and teams

- Children can be chosen to challenge the teacher whilst modelling strategies to increase your chances of winning.
- This is more guided and could be used as a starter into the activity to model if necessary. It would be useful to have or to participate so that each child has the opportunity to actively engage in the activity.

- It can be useful to work as a whole class to group the teams and then ask children to take what they've learned and apply it in pairs.

Instructions

Roll the die three times

Use the numbers to create a 3-digit number

Use a different color to mark the number on the number line
