Wave Rider Harrison H. Owen, 2008-10-20 What began twenty years ago as a journey of exploration into the interplay between chaos order and the creative process culminates in this capstone work of Harrison Owen's pioneering career From the creator of Open Space Technology OST *Wave Rider* shows how to apply the fundamental principles of self organization the driving power behind OST's immense success not just to a single event but to the day to day management and leadership of organizations Owen proposes that all systems not only our organizations but indeed the entire cosmos are fundamentally self organizing Control is ultimately an illusion and attempts to assert it are a waste of time and can even be destructive If we want to have truly high performing organizations at some point we need to set aside our preconceived goals and strategies important as they are and align ourselves and our work with the primal force of self organization learn how to ride that wave To that end Owen lays out eight concrete steps for becoming a successful *Wave Rider* derived from the global experience of hundreds of thousands of Open Space events with a clear focus on producing exceptional performance The book includes a real life tale from a genuine *Wave Rider* Dee Hock of VISA International as well as an imagined account of a day in the life of a wave riding manager to show how self organizing principles can deal with specific functions like running a staff meeting managing projects motivating staff and much more *Wave Rider* is another exceptional contribution from one of organizational development's true innovators
