Words and Music Judith Beniston, Geoffrey Chew, Robert Vilain, Jon Hughes, Modern Humanities Research Association, 2010 The chronological range covered by the individual essays is more than two hundred years from the Classical Enlightenment to the early twenty first century Some of the studies encompassed by this volume undertake the analysis of one composer s settings of a particular poet s work albeit with rather more critical rigour Others trace the ways in which a literary text is modified and adapted before and as it develops as one of the principal components of an opera Several share new insights into the complex relationships of individual works with the literary and musical traditions out of which they emerge or which they transform and renew or set such works in the political contexts of their genesis or reception often using a key historical moment a turning point or a snapshot as the starting point for a wide ranging investigation In some cases the words and the music are

those of the same composer the relationship here shedding light on the process of composition itself Literary works are often scrutinized for the light they shed on a musician's creative processes but the importance of music to writers as audiences but also as amateur or even semi professional practitioners is no less important as an investigative standpoint *The Cambridge Companion to Michael Tippett* Kenneth Gloag, Nicholas Jones, 2013-01-17 This Companion provides a wide ranging and accessible study of one of the most individual composers of the twentieth century A team of international scholars shed new light on Tippett's major works and draw attention to those that have not yet received the attention they deserve
