GeoSpatial Visual Analytics Raffaele de Amicis,R. Stojanovic,Giuseppe Conti,2009-07-11 Access distribution and processing of Geographic Information GI are basic preconditions to support strategic environmental decision making The heterogeneity of information on the environment today available is driving a wide number of initiatives on both sides of the Atlantic all advocating both the strategic role of proper management and processing of environme related data as well as the importance of harmonized IT infrastructures designed to better monitor and manage the environment The extremely wide range of often multidimensional environmental information made available at the global scale poses a great challenge to technologists and scientists to find extremely sophisticated yet effective ways to provide access to relevant data patterns within such a vast and highly dynamic information flow In the past years the domain of 3D scientific visualization has developed several solutions designed for operators requiring to access results of a simulation through the use of 3D visualization that could support the understanding of an evolving phenomenon However 3D data visualization alone does not provide model and hypothesis making neither it provide tools to validate results In order overcome this shortcoming in recent years scientists have developed a discipline that combines the benefits of data mining and information visualization which is often referred to as Visual Analytics VA
