The High Cost of Low Prices David Steven Jacoby, 2017-12-05 This book directly

addresses controversial issues like climate change carbon taxes fracking offshoring urban sprawl globalization income inequality regulation corruption compliance and enforcement providing an informed basis for mapping the way forward Based on his experience consulting on hundreds of industrial mega projects Jacoby reveals dark secrets of international supply chains for familiar products such as coffee bottled water gasoline and electronic devices and explains how government policies and business norms around the world have evolved to allow practices that can deplete natural resources blight native landscapes and tolerate inhumane working conditions Rich in facts and deep with first hand experiences from around the world Jacoby challenges embedded thinking about growth and progress convenience comfort and quality of life The book proposes a bold and realistic new policy framework that is ground breaking and achievable for industry government and consumers and supports the plan with achievable metrics targets and accountabilities While his first book promoted global supply chain optimization based on industry best practices and his second book fine tuned the techniques for oil gas and power companies Jacoby takes a holistic perspective in this third book acknowledging and proposing solutions for the problems caused in part by these optimized global supply chains

Trump, Trade, and the End of Globalization

David Steven Jacoby, 2018-06-15 Provides a roadmap for mature industrialized countries to contribute to and benefit from global trade on new terms Global trade is heading toward chaos Globalization has in part been a zero sum game over the last 20 years as China's middle and upper classes have grown sharply while Western economies have stagnated Wealthy countries most notably the United States and the United Kingdom are now on the brink of abandoning free trade as it includes both the principles and the theories behind it because their economies cannot compete with those of China and some developing countries Prevailing protectionist attitudes and policies are based on short term thinking and will disappoint future generations According to author David S Jacoby a new multilateralism can provide a way out of this impending disaster by preserving innovation and growth while also curbing the impact of countries that manipulate currency disparage the environment and violate human rights Jacoby clearly explains how industrialized nations can compete on a basis of differentiated technology and innovation while letting developing countries compete on a basis of manufacturing components and materials and makes a strong case for why the West should recommit to global trade

From Bogotá to Beijing David Jacoby, 2018-09-15 In two interwoven trips around the globe one in 2010 and another in 2030 this book discovers Bogotá Cartagena Detroit New York Abuja Cairo Dammam Abu Dhabi Marseille Hanover Ho Chi Minh City Kuala Lumpur Shenzhen Beijing and other cities along the way The people and experiences along the way tell a fascinating unique and insightful story The 2010 trip at the height of globalization takes place against a backdrop of frenzied global development As he travels the author observes the pronounced social and environmental footprint of the societies he visits the industries that support them and the people he meets The 2030 trip which follows a similar flight path occurs in a new world On this trip the author discovers how governments businesses and consumers are aligned around renewable energy environmental and aesthetic

balance and respect for self others and the planet A retrospective written in 2050 explains how a different way of thinking about growth and measuring progress enabled the shift to occur It explains how the world passed a tipping point and became both prosperous and sustainable This book is charming and fun while laying out a vision for a new era beyond globalization as we know it Its inspirational message about the importance of respecting the planet and our global neighbors while fulfilling our appetite for growth and wealth will endure
