At Work Willem Jan Neutelings, Michiel Riedijk, 2005 Clear geometric forms become sculptural buildings when given a thin skin of decorative patterns by Neutelings Riedijk Architects Their buildings are icons whose facades give surprising views inwards Inside the space is captured as a formgiving element tantalizing the senses this book takes the reader through the many layers in their work past competition entries and from realized to unrealized projects Book jacket **The New Architectural Pragmatism** William S. Saunders, 2007 In response to the contentious process surrounding the selection of a design for the World Trade Center site the use of spectacular buildings to brand cities and institutions and the dizzying transformations of the skylines of Shanghai and Dubai public awareness of architecture and design has perhaps never been higher At the same time architecture itself is undergoing an identity crisis as it confronts fundamental issues the effect of digital technology on design the pervasive impact of global capitalism and whether to embrace or resist popular media and taste The New Architectural Pragmatism collects the most provocative penetrating and influential attempts by leading theorists and practitioners in the field to define what architectural practice should be at the beginning of the twenty first century Written in the aftermath of modernism's utopian impulse and postmodernism's detached playfulness the essays gathered here express and critique a new spirit of cultural and political engagement with contemporary society Interrogating the architect's social responsibility the contributors deliberate about how much we should ask of architecture and suggest that in the coming century architecture must be at once flexible and robust responsive and self directed Contributors Stan Allen George Baird Lucy Bullivant James Corner Hal Foster Kenneth Frampton K Michael Hays Dave Hickey Robert Levit Evonne Levy Reinhold Martin Jorge Silvetti Robert Somol Philippe Starck Roemer van Toorn Sarah Whiting Alejandro Zaera Polo William S Saunders is editor of Harvard Design Magazine and assistant dean for external relations at Harvard University's Graduate School of Design He is the editor of four previous Harvard Design Magazine Readers published by Minnesota Concrete Architecture Catherine Croft, 2004 Inspiration for architects and urban planners this text presents a re evaluation of a material finally coming into its own in the 21st century concrete The text is illustrated with projects from some of the biggest name architects around **At work** Neutelings Riedijk Architecten, 2003 **Architecture** Olof Koekebakker, 2006 Constructing a New Agenda A. Haddad, David Rifkind, 2016-12-05 1960 following as it did the last CIAM meeting signalled a turning point for the Modern Movement From then on architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi and gave rise to the first revisionary movement following Modernism Bringing together leading experts in the field this book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 It consists of two parts the first section providing a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects *10 Jaar Architectonisch Ontwerp Aan de Gerrit Rietveld Academie* Gert Staal, Gerrit Rietveld Academie, 2004 **Basics Interior Architecture 02: Context & Environment** Graeme Brooker, Sally Stone, 2008-08 Basics Interior Architecture Context and Environment examines the ways in which elements based both inside and outside of the host building can influence and affect the interior space The book proposes a method of interpretation evaluation and utilisation of physical factors such as light and orientation the contextual issues of the urban form and the subject of sustainability and their influences on the design of the interior and the remodelling of existing buildings Detailed studies of contemporary work are used to support theory making this book an invaluable reference tool to all students of interior architecture and design Beauty in Architecture Nele De Raedt, Maarten Delbeke, 2025-09-18 Beauty in Architecture brings together the views of architects artists critics historians and philosophers to explore how beauty can again become an integral part of discussions about architecture Despite its recent resurgence in the public debate about the built environment the notion of beauty remains problematic and contested in critical discourse about architecture When the topic is addressed it is either treated with suspicion historicized or contextualised or substituted with other often equally problematic terms such as order legibility atmosphere or character This collection brings together voices from theory scholarship and practice to show that a conversation about beauty in architecture is necessary not only because the general public speaks easily and frequently about beauty in architecture but also because much can be gained from taking it seriously Bringing together a diverse range of perspectives the essays reflect on the themes categories and concepts that should be part of such a conversation and show how talking about beauty engages important reflections on its ontology and what it involves values communities collectives and shared histories environment identity and political or legal mechanisms and institutions A must read for designers and theorists alike this volume allows readers to discover new strategies and concepts to foster the discussion of beauty in architecture **Visions**

of the Real Alexandru Calcatine, 2011 The cultural landscape is what lies around us and has to be understood and learned to deal with The best way to do this is to start from the beginning in order to understand the contemporary iterations of the concept We will not reinvent the concept but we will try to create a new way to see it The operative concept of cultural landscape is part of a reality that is seen and visioned differently by each individual This means that the concept has an almost infinite number of meanings Thus this book presents some of the visions of the surrounding reality through the eyes of an architect
