Buikstra, 2018-10-26 Bioarchaeologists who study human remains in ancient historic and contemporary settings are securely anchored within anthropology as anthropologists yet they have not taken on the pundits the way other subdisciplines within anthropology have Popular science authors frequently and selectively use bioarchaeological data on demography disease violence migration and diet to buttress their poorly formed arguments about general trends in human behavior and health beginning with our earliest ancestors While bioarchaeologists are experts on these subjects bioarchaeology and bioarchaeological approaches have largely remained invisible to the public eye Current issues such as climate change droughts warfare violence famine and the effects of disease are media mainstays and are subjects familiar to bioarchaeologists many of whom have empirical data and informed viewpoints both for topical exploration and also for predictions based on human behavior in deep time The contributions in this volume will explore the how and where the data has been misused present new ways of using evidence in the service of making new discoveries and demonstrate ways that

our long term interdisciplinarity lends itself to transdisciplinary wisdom We also consider possible reasons for bioarchaeological invisibility and offer advice concerning the absolute necessity of bioarchaeologists speaking out through social media

Liminality in Tourism Robert S. Bristow, Ian Jenkins, 2021-09-05 Liminality is not typically associated with tourism even though it can be viewed as an intrinsic element of the social cultural experiences of tourism Liminality in Tourism Spatial and Temporal Considerations aims to build upon the tradition of liminality as expounded in social and anthropological disciplines elaborating on the theoretical principles and concepts found within certain aspects of the tourist journey and tourist product The emergence of post modern society has impelled a change in the tourist gaze towards a more experiential and adventuresome globalised experience An important aspect of the tourist phenomenon of liminality is where a transformative experience is triggered by entering a liminoid tourist space leaving the tourist permanently psychologically transformed before returning to normalised society The narrative provides a new perspective on the tourist experience with a provocative examination into the multidimensional aspects of tourism by exploring tourism within the spatial and temporal aspects of liminal landscapes Covid 19 has further changed the rubric of tourism Until the current pandemic tourism has basically been a fun experience In a post pandemic world however the tourist is now facing an unknown future which will almost certainly affect tourism liminality This book presents the reader with a wealth of examples and case studies closely illustrating the association between tourism and liminal experiences The geographical perspectives explore the more subconscious outcomes of destination and tourist product consumption The book should be a useful reader to tourism geography where the theory of liminality can be synthesized into tourist experiences The chapters in this book were originally published as a special issue of the journal Tourism Geographies

Cultural Heritage and Tourism in the Developing World Dallen J. Timothy, Gyan P. Nyaupane, 2009-05-18 This is the first book of its kind to synthesize global and regional issues challenges and practices related to cultural heritage and

tourism specifically in less developed nations Urban Tourism in the Developing World Gustav Visser, 2017-07-28 Over the past decade the field of urban tourism has consolidated with the appearance of several books that concentrate upon the Western European and North American experience Recently the scope and range of urban research has widened considerably including the welcome appearance of studies that examine the tourism phenomenon in cities outside the Euro American heartland Despite this growing international body of debate and scholarship on tourism and cities particularly in the developed North literature that relates to the developing world as a whole and to Africa in particular remains sparse The task of *Urban Tourism in the Developing World: The South African Experience* is to augment the current international scholarship concerning urban tourism in the developing world More especially the contributors draw attention to a range of case studies from South Africa that provide some starting points to address the uneven scholarly coverage of urban tourism the African context has received to date In addition the research material presented here seeks to contribute toward raising the South African and indeed the African profile within growing international scholarship concerning issues of urban tourism and development This collection aims to expand an emerging South African and African tourism research voice concerning the tourism and development nexus as well as to stem critiques that this body of research appears to have developed in a theoretical vacuum divorced from broader international tourism research discourses This collection of essays not only further develops an independent South African tourism perspective but also presents research that is closely tied to international urban tourism research debates In addition this analysis of urban tourism in the South African context enriches the rather Western oriented theories of urban tourism discourse through its emphasis on how urban tourism is evolving in urban Africa

Timothy, 2020-12-03 Cultural heritage is one of the most important tourism resources in the world This book provides a comprehensive theoretical overview and applied knowledge of the issues practices current debates concepts and management concerns associated with cultural heritage based tourism The second edition has been updated to include timely and emerging topics such as geopolitics conflict solidarity tourism overtourism and climate change It also expands on important areas such as environmental change technology social media heritage economics Indigenous knowledge and co created experiences This edition includes up to date data statistics references case material figures and pedagogical tools It remains an important and accessible text for undergraduate and postgraduate students of cultural and heritage tourism cultural resource management and museum management The Ashgate Research Companion to Heritage and Identity Professor Brian Graham, Professor Peter Howard, 2012-11-28 Heritage represents the meanings and representations conveyed in the present day upon artifacts landscapes mythologies memories and traditions from the past It is a key element in the shaping of identities particularly in the context of increasingly multicultural societies This Research Companion brings together an international team of authors to discuss the concepts ideas and practices that inform the entwining of heritage and identity They have assembled a wide geographical range of

examples and interpret them through a number of disciplinary lenses that include geography history museum and heritage studies archaeology art history history anthropology and media studies This outstanding companion offers scholars and graduate students a thoroughly up to date guide to current thinking and a comprehensive reference to this growing field

Volunteer Tourism Mary Mostafanezhad, 2016-02-17 Crossing disciplinary and chronological boundaries Volunteer Tourism Popular Humanitarianism in Neoliberal Times is the first full length treatment of volunteer tourism from a longitudinal ethnographic perspective Volunteer tourism one of the fastest growing niche tourism markets in the world is a type of tourism in which tourists pay to participate in conservation humanitarian or development oriented projects Volunteer Tourism is a comprehensive and comparative study of the perspectives of Thai host community members NGO practitioners and international volunteer tourists The book thus shines an ethnographic lens onto the complexities and contradictions of the volunteer tourism experience in northern Thailand Drawing on cross disciplinary perspectives in geography and anthropology as well as development tourism and cultural studies Volunteer Tourism illustrates how a focus on sentimentality in the volunteer tourism encounter obscures the structural inequalities on which the experience is based Such a focus situates volunteer tourism within the commodification and sentimentalization of development and global justice agendas which hail the new moral consumer and reframe questions of structural inequality as questions of individual morality As a result albeit inadvertently the practice of volunteer tourism serves the continued expansion of the cultural logics and economic practices of neoliberalism
