Stephen Phillips

Omnipotence And Other Theological Mistakes By Hartshorne Charles 1984:

The Metaphysics of Meditation Stephen Phillips, 2024-01-25 In this book Stephen Phillips focuses on one of the most important poems about meditation in world literature as understood by two of the greatest philosophers of India one classical one modern Sankara's commentaries on the Upanisads are a core of the Vedanta tradition and Aurobindo is a towering figure of 20th century Hindu thought This is the first time their approaches have been studied together The Isa c 500 BCE an Upanisad belongs to a genre of adhyatmika learning concerning self and consciousness in early Indian literature According to the Ancient Indian tradition of yoga meditation is antithetical to willful bodily and mental action Breathing is all you do In the conception of the Isa Upanisad we are told that the best that comes from meditation is because of what the Lord is In Sankara's interpretation it comes to block out the little you whereas according to Aurobindo it comes as a divine connection an occult Conscious Force belonging to truer part of oneself atman and an opening to that self's native energy Framed around Aurobindo's translation of each of the Isa's eighteen verses along with a translation of each verse Phillips follows a different reading of Sankara as laid out in his commentary All this is done against the backdrop of modern scholarship Convergences and divergences of these streams are the focus throughout Appendix A presents the Upanisad with the two readings side by side This book traces a worldview and consonant yoga teaching common to two authors who are typically taken to be oceans apart not only chronologically but in intellectual stance Addressing a huge gap in the contemporary literature on meditation in the Hindu traditions Phillips presents a compelling new way of thinking about meditation in the Advaita Vedanta philosophy and Upanisad

The Problem of Animal Pain Victoria Campbell, 2024-02-01 In this Element atheists cite animal pain as compelling evidence against the existence of the loving God portrayed in the Judeo Christian Bible William Rowe Paul Draper Richard Dawkins and others claim widespread unnecessary suffering exists in nature and challenge theism with the Evidential Problem of Natural Evil This Element engages the scientific literature in order to evaluate the validity of those claims and offers a theodicy of God's providential care for animals through natural pain mitigating processes

The Orders of Nature Lawrence Cahoon, 2013-01-01 A systematic theory of naturalism bridging metaphysics and the science of complexity and emergence

Integrative Governance: Generating Sustainable Responses to Global Crises Margaret Stout, Jeannine M. Love, 2018-07-20 Dominant governance theories are drawn primarily from Euro American sources including emergent theories of network and collaborative governance The authors contest this narrow view and seek a more globally inclusive and transdisciplinary perspective arguing such an approach is more fruitful in addressing the wicked problems of sustainability including social economic and environmental crises This book thus offers and affirms an innovative governance approach that may hold more promise as a universal framework that is not colonizing in nature due to its grounding in relational process assumptions and practices Using a comprehensive Governance Typology that encompasses ontological assumptions psychosocial theory epistemological concepts belief systems

ethical concepts political theory economic theory and administrative theory the authors delve deeply into underlying philosophical commitments and carry them into practice through an approach they call Integrative Governance The authors consider ways this approach to radical self governance is already being implemented in the prefigurative politics of contemporary social movements and they invite scholars and activists to imagine governance in contexts of social economic and environmental interconnectedness to use the ideal type as an evaluative tool against which to measure practice and to pursue paradigmatic change through collaborative praxis

Relationality and the Concept of God

Henry Jansen, 2025-02-10 Classical theism the dominant tradition in Christian theology has stressed the metaphysical concept of God i e God s ontological transcendence and independence from the world In this century however this concept of God has increasingly met with criticism On the basis of the Bible and new philosophical considerations it is argued that a relational concept of God better answers the fundamental concerns of the Christian faith In this book the author investigates the questions of whether one can conceive of God apart from the metaphysical attributes and whether reflection on the biblical depiction of God leads necessarily to a relational concept of God The author explores the questions by examining the relational concepts of God found in two contemporary German theologians J rgen Moltmann and Wolfhart Pannenberg and uses the divine attribute of immutability as a focus for the discussion He argues that the relational concept of God presupposes another metaphysical conception of God which raises problems as serious as those in classical theism and that the Bible itself because of its nature as a narrative text is ambiguous in many respects as far as God is concerned A truly Christian doctrine of God must take both the metaphysical and relational aspects of God into account

Canonical Theology
John Peckham, 2016 What are the roles of canon and community in the understanding and articulation of Christian doctrine Should the church be the doctrinal arbiter in the twenty first century In *Canonical Theology* John Peckham tackles this complex ongoing discussion by shedding light on issues surrounding the biblical canon and the role of the community for theology and practice Peckham examines the nature of the biblical canon the proper relationship of Scripture and tradition and the interpretation and application of Scripture for theology He lays out a compelling canonical approach to systematic theology including an explanation of his method a step by step account of how to practice it and an example of what theology derived from this canonical approach looks like

The Reenchantment of Science

David Ray Griffin, 1988-05-06 This book describes the move from modern mechanistic science to a post modern organismic science David Ray Griffin gives voice to a revisionary postmodernism based on the work of Whitehead and Hartshorne that contrasts with the relativistic nihilistic postmodernism of Heidegger Derrida and Wittgenstein The book brings together some of today s most creative thinking about science Griffin s introductory essay summarizes the way in which the mechanistic view led to the disenchantment of science and the various reasons for the reversal of this process in our time The essays on physics cosmology biology ecology psychosomatic medicine and parapsychology bring out the various dimensions of the reenchantment of science the

replacement of modern dualism and reductionism with an ecological organismic paradigm the priority of internal relations to external the causal power of experience the presence of experience purpose and intrinsic value throughout nature influence at a distance the laws of nature as habits the presence of a divine whole in all the parts and the history of the universe as a self creative meaningful story This book gives a powerful voice to this emerging movement s proposals for a postmodern science spirituality and world order

Charles Hartshorne's Concept of God S. Sia,2013-03-14 Charles Hartshorne s considerable writings have been influential in contemporary religious and philosophical thought Not only is he regarded as the leading living representative of process thought as well as a much respected interpreter of Whitehead but he has also established himself as an original and creative thinker in his own right The literature on his philosophy has been rapidly increasing His thought and influence have also been the subject of a number of conferences and gatherings of scholars One of Hartshorne s most notable contributions to contemporary philosophy and theology is his concept of God In his writings he has set out to formulate the idea of deity so as to preserve perhaps increase its religious value while yet avoiding the contradictions which seem inseparable from the idea as customarily defined The result of his efforts has been the development of the concept of a dipolar God insofar as contrasting metaphysical predicates e g relative absolute contingent necessary finite infinite and so on are affirmed as applicable to God although always in an eminent way Inasmuch as he has elaborated this concept in close dialogue with classical theism he also refers to it as neo classical Because of the emphasis he places on the reality of change and becoming in his metaphysics which regards God as the chief exemplification of metaphysical principles the term process has likewise been used to describe his notion of God

Evolution and the Problem of Natural Evil Michael Anthony Corey,2000 Is the evolutionary process intelligently designed If so why did the Creator choose such an evil infested means to create the biosphere What is the intrinsic nature of evil itself Is natural evil necessary Is evil compatible with the existence of God Will the world s evils ever be totally redeemed What place does humanity occupy in the cosmic scheme of things Evolution and the Problem of Natural Evil attempts to answer these and other timeless questions by proposing a bold new conceptual synthesis that aggressively marries the tenets of modern developmental psychology to the basic concepts of classical theism The end result of this novel approach is deeply encouraging insofar as it places the problem of evil as well as the general fate of human existence in a much larger and more optimistic context than has traditionally been imagined

The Wonderful Decree Travis James Campbell,2020-01-03 Unconditionally loving Sovereign over all How can God be sovereign over all things and loving towards all people while His creatures possess real freedom and responsibility for their choices Theologians have wrestled with this question for centuries But have our attempted solutions made the problem worse In Wonderful Decree Travis James Campbell suggests we cannot solve the problem by sacrificing either divine sovereignty and goodness on one hand or human responsibility on the other While considering Arminian and Molinist alternatives he concludes that the traditional Augustinian and Calvinist approach best allows these truths to remain

in a healthy and biblically faithful tension Inspired by the example of Spurgeon who preferred biblical mystery over human solutions Campbell encourages readers to trust even delight in the harmony of God's love for all and sovereignty over all

What Caused the Big Bang? Rem B. Edwards, 2021-07-26 This book critically explores answers to the big question What produced our universe around fifteen billion years ago in a Big Bang It critiques contemporary atheistic cosmologies including Steady State Oscillationism Big Fizz Big Divide and Big Accident that affirm the eternity and self sufficiency of the universe without God This study defends and revises Process Theology and arguments for God's existence from the universe's life supporting order and contingent existence

God Interrogated Lynne Renoir, 2023-03-31 Lynne Renoir began life as a devout Christian but after many years she realized that her faith was not working She sought an explanation for her situation by completing postgraduate degrees in psychology and philosophy and carrying out research in quantum theory Drawing on the insights that the universe is multidimensional and that everything is ultimately one Renoir proposes that we too are multidimensional beings She points out that what we believe about anything is generally deemed to be either true or false This approach in her view is applicable to our everyday three dimensional reality but that transformation occurs when what we consciously accept as fact resonates with the oneness that lies at the deepest level of our being

How in the World Does God Act? Herb Gruning, 2000 As the title promises this book investigates the philosophical treatments of the actions of God Opening with a chapter tracing the history of the theme of divine activity the author then pursues explanations of key concepts in chapters two and three including deism primary and secondary causation double agency and the causal joint The work of Alfred North Whitehead is explored throughout chapters four and five The rest of the book deals with how scientific theories affect the understanding of divine action Both the large scale and the small scale world are examined with sections ranging from natural laws to the chaos theory In conclusion Gruning plots different positions on a graph in order to illuminate new relationships between each A thorough treatment of the question of God's activity How in the World Does God Act will be of value to graduate level philosophy students as well as scholars interested in the intersection between science and philosophy

The Work of Love J. C. Polkinghorne, 2001 The development of kenotic ideas was one of the most important advances in theological thinking in the late twentieth century Now a diverse group of acknowledged experts brought together by the Templeton Foundation presents a stimulating interdisciplinary evaluation of these controversial ideas

One Hundred Twentieth-Century Philosophers Stuart Brown, Diane Collinson, Dr Robert Wilkinson, Robert Wilkinson, 2008-02-20 One Hundred Twentieth Century Philosophers offers biographical information and critical analysis of the life work and impact of some of the most significant figures in philosophy this century Taken from the acclaimed Biographical Dictionary of Twentieth Century Philosophers the 100 entries are alphabetically organised from Adorno to Zhang Binglin and cover individuals from both continental and analytic philosophy The entries have an identical four part structure making it easy to compare and contrast information comprising biographical details a bibliography of major works

a listing of relevant secondary and critical literature an appraisal of the philosopher s thoughts and achievements A separate glossary provides an introduction to the origins development and main features of major philosophical schools and movements and offers select bibliographies to guide the reader to further research Will Humanity Survive Religion? W. Royce Clark,2020-06-22 When the human sciences in the West followed the physical sciences in the 18th and 19th centuries with new measurements methods and language the metaphysics of infinity lost its credibility The response of Western religions was to retrench in a stronger authoritarianism especially by the last half of the 19th century While the new human sciences were being extended even to study the history and philosophy of religions those religions themselves placed more emphasis on their understanding of the Absolute or Unquestionable That split became a burden both to those who were religious and to those who were not Here W Royce Clark argues that humanity s survival may depend on the development of a universal or inclusive ethic in which religions move beyond their Absolutes Clark poses the sharp challenge Are religious communities ready to abandon the foundations that until now they have insisted were the only adequate foundation for ethics

The Yoga of Love ,2025-05-19 The idea that something can be present at every place has engendered much discussion both in the past and at present Typically omnipresence is thought to be a divine attribute but the question as to how something can be omnipresent has not been historically confined to the status of a divine being The Oxford Handbook of Omnipresence offers an insight into historical accounts of omnipresence and its developments in ancient medieval modern and contemporary thought It further widens the study of omnipresence by including less widely studied strands of thought on this topic from mystical process theological feminist theological and phenomenological perspectives Additionally whilst the study of omnipresence has typically focused on Christian thinkers the volume broadens the range of voices on this attribute further by including Jewish Islamic Buddhist Sanskrit and Donghak accounts The Handbook provides an introduction to the main facets of omnipresence both historical and contemporary and opens up new avenues for research that are yet to be fully explored **The God Beyond Belief** Nick Trakakis,2006-11-03 This study of Professor William Rowe s defense of atheism on the basis of evil assesses the literature that has developed in response to Rowe s work closely examining two strategies mystery the idea that God may have reasons beyond our comprehension for permitting evil and theodicy explanations as to why God allows evil to flourish The book unearths difficulties in both concluding that the God of theism must be beyond belief

With Gifted Thinkers Mark Manolopoulos,2009 This book is a collection of engaging entertaining and often confronting dialogues with nine thinkers of faith in postmodernity some of them more prominent than others all of them possessing the rare quality or gift of thinking rigorously tentatively passionately John D Caputo Kevin Hart Robyn Horner Richard Kearney Catherine Keller Kate Rigby Mark C Taylor Mark I Wallace and Merold Westphal The project was driven by two ambitions to seek out their thoughts on the question of the gift which has become a hot topic since the early 1990s in philosophy theology and a whole range of academic disciplines and which was the subject of the interviewer s doctoral work and more generally

to examine key elements of these thinkers most important works Hence the dialogues traverse a splendid range of issues philosophical theological ecological hermeneutical biblical scientific and more What s more the dialogical medium has the advantage of casting complex issues in extremely accessible terms thereby making this collection a must read for anyone interested in contemporary Continental theory The Problem of Evil in the Western Tradition Joseph F. Kelly, 2015-03-06

The question of evil presents a profound challenge to humanity why do we do what we know to be wrong This is especially a challenge to religious believers Why doesn t an all good and omnipotent God step in and put an end to evil The Problem of Evil in the Western Tradition examines how Western thinkers have dealt with the problem of evil starting in ancient Israel and tracing the question through post biblical Judaism Early Christianity especially in Africa the Middle Ages the Renaissance the Reformation the Enlightenment and to the twenty first century when science has raised new and important issues Joseph Kelly covers the book of Job the book of Revelation Augustine of Hippo Aquinas Luther Marlow Milton Voltaire Hume Mary Shelley Darwin Jung Flannery O Connor Karl Rahner Teilhard de Chardin and modern geneticists Chapters are Some Perspectives on Evil Israel and Evil The New Adam Out of Africa The Broken Cosmos The Middle Ages Decline and Reform of Humanism The Devil s Last Stand Rationalizing Evil The Attack on Christianity Dissident Voices Human Evil in the Nineteenth Century Science Evil and Original Sin Modern Literary Approaches to Evil Some Scientific Theories of Evil and Modern Religious Approaches to Evil Joseph F Kelly Ph D is professor of religious studies at John Carroll University in Cleveland Ohio He is the author of The World of the Early Christians published by The Liturgical Press
