**Going Soft? The US and China Go Global** Mei Renyi, 2014-04-11 What is soft power How can a country acquire and enjoy it Is it the product of public or private initiatives How significant is soft power in world affairs The concept of soft power the idea that international success depends not just upon weaponry force and military coercion but also on admiration and respect for a country's culture and way of life is winning ever greater global attention As China enjoys ever increasing heft on the global scene many Chinese officials seek to emulate the past success of the United States in dominating the world not simply militarily but in terms of influence and prestige Most are very conscious that soft power can be extremely valuable in terms of supplementing and boosting their country's military and strategic position but are often uncertain as to how to deploy the instruments of propaganda and cultural diplomacy most effectively The essays in this volume largely written by scholars based in mainland China represent an extended effort to debate and assess the theoretical concept of soft power and just what it means and how it works in practice The authors focus upon the practical impact and implications of soft power in diverse settings and situations in the United States past and present How they ask does soft power relate to issues of religion gender race and social equality at home and abroad What do American elections and political rhetoric do for American soft power Will China succeed in rivalling the United States in power whether hard soft or smart And how will soft power feature in US China relations present and future

**Non-Western Theories of International Relations** Alexei D. Voskressenski, 2016-12-16 This book addresses the problem of World Regional Studies and its components regional complexes regional subsystems and global

regions With an increasingly complex international system and the emergence of new actors it is clear that the conceptual framing within the classical disciplines of IR Political Theory International Political Economy or Comparative Politics can no longer fully explain a number of processes originating from a tighter and intricate nexus between local regional and global dimensions World Regional Studies explains the emergence of new phenomena in international relations and world politics on a regional and predominantly non Western regional level How do non Western societies react to the transformations of the global order Is a non Western democracy possible Should we discuss the possibilities for the appearance of a non Western IR theory or a new framework for analyzing de westernized global development This study based on decade long research and teaching post in World Regional Studies at MGIMO University and Russian University of Humanitarian Studies RGGU seeks to answers these questions *Rethinking the Relationship between China and the West through a Focus on Literature and Aesthetics* Qingben Li,2018-10-01 The multi dimensional model of cross cultural research was put forward as an alternative to the model of Sino western dualism which sees China and the West as two entirely different entities In order to break with this dualistic model the spatial dimension should be separated from the temporal dimension allowing the words China and the West to recover their original meaning of spatial dimensions This in turn reconceptualises the equal relationship between China and the West and seeks the possibilities and pathways of cross cultural understanding and dialogue in a global context This book is composed of two parts the spatial dimension of cross cultural research and the temporal dimension of cross cultural research The first discusses globalization and China s cultural identity cross cultural literary research between China and the West a circular model of cross cultural research focusing on literary adaptations integrating Chinese literature into world literature appreciating Chinese poetry from a cross cultural perspective and the three models of nature appreciation In part two the book explores the Book of Changes from the perspective of modern aesthetics original Confucianism literary theory and aesthetics the Han dynasty s Confucianism literary theory and aesthetics New Confucianism literary theory and aesthetic Beijing city s culture and China s short film and socialistic cultural productions *China's Rise and Rethinking International Relations Theory* Chengxin Pan,Emilian Kavalski,2022-02-16 Bringing together leading scholars from Asia and the West this book investigates how the dynamics of China s rise in world politics contributes to theory building in International Relations IR The book demonstrates how the complex and transformative nature of China s advancement is also a point of departure for theoretical innovation and reflection in IR more broadly In doing so the volume builds a strong case for a genuinely global and post Western IR It contends that non Western countries should not only be considered potential sources of knowledge production but also original and legitimate focuses of IR theorizing in their own right *China's Expansion into the Western Hemisphere* Riordan Roett,Guadalupe Paz,2008-11-01 With President Hu Jintao s November 2004 visit to Latin America China signaled to the rest of the world its growing interest in the region Many observers welcome this development highlighting the benefits of increased trade and

investment as well as diplomatic cooperation for both sides But other analysts have raised concerns about the relationship's impact on Latin American competitiveness and its implications for U S influence in Washington's traditional backyard In China's Expansion into the Western Hemisphere experts from Latin America China and the United States as well as Europe analyze the history of this triangular relationship and the motivations of each of the major players Several chapters focus on China's growing economic ties to the region including Latin America's role in China's search for energy resources worldwide Other essays highlight the geopolitical implications of Chinese hemispheric policy and set recent developments in the broader context of China's role in the developing world Together they provide an absorbing look at a particularly sensitive aspect of China's emergence as a world power Contributors include Christopher Alden London School of Economics Robert Devlin ECLAC Francisco Gonz lez Johns Hopkins SAIS Monica Hirst Torcuato Di Tella University Josh Kurlantzick Carnegie Endowment for International Peace Xiang Lanxin Graduate Institute of International Studies Geneva Luisa Palacios Barclays Jiang Shixue Chinese Academy of Social Sciences Barbara Stallings Brown University Juan Tokatli n San Andr s University and Zheng Kai Fudan University

Spellman, 2004-04-01 Monarchies 1000 2000 surveys a form of government whose legitimacy rests not on voluntary consensus but on age old custom heredity and or religious sanction Global in scope and comparative in approach W M Spellman's survey establishes connections between monarchy as idea and practice in a variety of historical and cultural contexts across a millennium when the system was without serious rival Spellman examines the intellectual assumptions behind different models of monarchy tracing the ways in which each of these assumptions shifted in response to historical factors While no human institution has retreated as rapidly in the modern period monarchy's remarkable longevity invites us to weigh the significance of hierarchy subordination and dependence as constants of the human experience

**Sanctions with Chinese Characteristics** Angela

Poh,2025-10-01 The view that China has become increasingly assertive under President Xi Jinping is now a common trope in academic and media discourse However until the end of Xi Jinping s first term in March 2018 China had been relatively restrained in its use of coercive economic measures This is puzzling given the conventional belief among scholars and practitioners that sanctions are a middle ground between diplomatic and military paramilitary action Using a wide range of methods and data including in depth interviews with 76 current and former politicians policy makers diplomats and commercial actors across 12 countries and 16 cities Sanctions with Chinese Characteristics Rhetoric and Restraint in China s Diplomacy examines the ways in which China had employed economic sanctions to further its political objectives and the factors explaining China s behaviour This book provides a systematic investigation into the ways in which Chinese decisionmakers approached sanctions both at the United Nations Security Council and unilaterally and shows how China s longstanding sanctions rhetoric has had a constraining effect on its behaviour resulting in its inability to employ sanctions in complete alignment with its immediate interests **Rethinking Security in East Asia** J. J. Suh,Peter J. Katzenstein,Allen Carlson,2004 Is East Asia heading towards war This text makes a case for a new theoretical approach called analytical eclecticism by the authors to the study of Asian security China's Trade Policy on International Air Transport Chrystal Zhang,Kareem Yarde,2020-08-09 This book is a political economic analysis of China s transformation to become a global aviation power It aims to identify the driving forces that have shaped China s ever evolving international air transport policy direction and goals in the past four decades and further determines how and to what extent these driving forces have shaped China s considerations and strategies when executing its policy goals through bilateral air services negotiations The findings reveal that China s international air transport policymaking has remained in the domain of the country s aviation regulator which has enjoyed an exclusivity to exercise its power on the air transport sector The book argues that China s international air transport policy direction is in alignment with the country s overall strategic mission and its goal is set to support the country s endeavour to realise the China dream It concludes that factors at all levels interact with each other with a far reaching impact on the country s policy direction and goal setting however these factors are constrained by time and circumstances The book is a must read for a wide array of audiences including but not limited to scholars and industry professionals who have an interest in China s political economy policymaking international trade government behaviour corporate political activities air transport aviation liberalisation and bilateral negotiations Rethinking Relation-Substance Dualism Aurélie Névoit,2024-01-16 This book analyses anthropological debates on relationism referring to methodological and theoretical issues and sets out to reconsider these discussions with regards to the notion of substance generally associated with the body Reflecting on the philosophical origins and implications of these two concepts the author aims to bring them to the heart of contemporary anthropological discourse and addresses the erasure or blurring of substance in favour of relation The argument put forward is that the conceptual pairing of substance relation should be substituted for the

nature culture dualism that has been dominant in structural anthropology The chapters engage with the work of scholars such as Philippe Descola Eduardo Viveiros de Castro and Wang Mingming as part of a decentring and questioning of the tradition in which anthropology is rooted The book also considers the role that the anthropology of China plays in the re-evaluation of the relationship between relation and substance The concept of submutance is introduced with Chinese ethnographic material to explore the possibility of moving beyond the relation substance dualism of Western heritage This is valuable reading for scholars interested in the theory and history of anthropology *Rethinking Post-Cold War*

*Russian-Latin American Relations* Vladimir Rouvinski, Victor Jeifets, 2022-06-07 Today there is plenty of evidence that Russia has become a prominent external actor in Latin America and the Caribbean Yet few books have attempted to better understand the reasons behind Russia's return and Moscow's continuous engagement in the region In order to fill the gap this volume offers the first interdisciplinary study of Russian Latin American relations after the end of the Cold War Across 16 chapters leading experts from Russia Europe the United States and Latin America collectively re-examine the Soviet legacy to reveal the conditions in which Russia operates today and identify the key trends of contemporary Russian relations with this part of the world The book then moves on to provide a detailed case study analysis of Russia's bilateral relations with Venezuela Cuba Mexico Brazil Argentina and Colombia identifying the most critical dimensions of Russian engagement *Rethinking Post Cold War Russian Latin American Relations* allows readers to identify the fundamental driving forces of Russia's renewed commitment to the area its strategies and experiences The book will be of interest to readers of international relations and area studies historians of modern Latin America migration studies political economy and any political scientists interested in Russian decision making *Rethinking the 'Coloured Revolutions'* David Lane, Stephen White, 2013-09-13 The communist world was supposed to have had its revolution in 1989 But the demise of the Soviet Union came two years later at the end of 1991 and then perplexingly a series of irregular executive changes began to take place the following decade in countries that were already postcommunist The focus in this collection is the changes that took place in Serbia Georgia Ukraine and Kyrgyzstan between 2000 and 2005 that have together been called the coloured revolutions of no particular colour in Serbia but Rose in Georgia Orange in Ukraine and Tulip in Kyrgyzstan Apart from exploring political change in the coloured revolution countries themselves the contributors to this collection focus on countries that did not experience this kind of irregular executive change but which might otherwise be comparable Belarus and Kazakhstan among them and on reactions to democracy promotion in Russia and China Throughout an effort is made to avoid taking the coloured revolutions at face value however they may have been presented by local leaders and foreign governments with their own agendas and to place them within the wider literature of comparative politics This book was previously published as a special issue of *Journal of Communist Studies and Transition Politics* **Rethinking Sino-Japanese Alienation** Barry Buzan, Evelyn Goh, 2020-01-09 Bitterly contested memories of war colonisation and empire among Japan China and Korea

have increasingly threatened regional order and security over the past three decades In Sino Japanese relations identity territory and power pull together in a particularly lethal direction generating dangerous tensions in both geopolitical and memory rivalries Buzan and Goh explore a new approach to dealing with this history problem First they construct a more balanced and global view of China and Japan in modern world history Second building on this they sketch out the possibilities for a 21st century great power bargain between them Buzan puts Northeast Asia s history since 1840 into both a world historical and a systematic normative context exposing the parochial nature of the China Japan history debate in relation to what is a bigger shared story about their encounter with modernity and the West within which their modern encounter with each other took place Arguing that regional order will ultimately depend substantially on the relationship between these two East Asian great powers Goh explores the conditions under which China and Japan have been able to reach strategic bargains in the course of their long historical relationship and uses this to sketch out the main modes of agreement that might underpin a new contemporary great power bargain between them in a variety of future scenarios for the region The frameworks adopted here consciously blend historical contextualisation enduring concerns with wealth power and interest and the complex relationship between Northeast Asian states evolving encounters with each other and with global international society *Rethinking American Grand Strategy* Elizabeth Borgwardt, Christopher McKnight Nichols, Andrew Preston, 2021-03-01 A comprehensive rethinking about the nature of American grand strategy in the past present and future

**India Redefines its Role** Shekhar Gupta, 2013-09-13 This work offers analytical examination of the facts that will shape the India of the future and determine whether India emerges as Asia s new economic tiger a stabilizing factor in a turbulent region or becomes inward looking militaristic and stagnant **Rethinking Anti-Americanism** Max Paul

Friedman, 2012-08-27 This book reveals how the concept of anti Americanism has been misused for over 200 years to stifle domestic dissent and dismiss foreign criticism Rethinking the Silk Road Maximilian Mayer, 2017-11-05 Focused on the Belt and Road Initiative this book discusses China s opportunities to translate economic leverage into political outcomes The central question is how China s expanding economic influence will transform the Eurasian political landscape Proposed in late 2013 by President Xi Jinping the Belt and Road is the most ambitious foreign policy approach adopted thus far and represents the culmination of China s search for a grand strategic narrative Comparative methods and diverse conceptual frameworks are applied to contextualize and explore the political economic and cultural ramifications of the Belt and Road in order to shed light on its transformative significance risks and opportunities
