Thomas (Aquinas), 1988-01-01 **Conservatism, Past and Present** Tristan J. Rogers, 2025-01-31 In *Conservatism Past and Present* A Philosophical Introduction Tristan J Rogers argues that philosophical conservatism is a coherent and compelling set of historically rooted ideas about conserving and promoting the human good Part I *Conservatism Past* presents a history of conservative ideas exploring themes such as the search for wisdom the limits of philosophy reform in preference to revolution the relationship between authority and freedom and liberty as a living tradition Major figures include Aristotle Saint Thomas Aquinas Edmund Burke G W F Hegel and Roger Scruton Part II *Conservatism Present* applies philosophical conservatism to contemporary conservative politics focusing on issues such as nationalism populism the family education and responsibility Rogers shows that conservatism has been defined differently at different times as a loose set of connected ideas reacting against the French Revolution as a kind of disposition or instinct in favor of the status quo and more recently as any ideas opposed to the political left But he also allows a set of questions to guide his argument for conservatism s merits What is conservatism Is it a coherent and attractive philosophy What are conservatives for And how is today s conservatism related to its past In his answers Rogers paints a compelling and coherent picture of an aligned and attractive set of ideas

A History of the Laws of War: Volume 2 Alexander Gillespie, 2011-10-07 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict Thus it is that this work is divided into three substantial parts Volume 1 on the

laws affecting combatants and captives Volume 2 on civilians and Volume 3 on the law of arms control This second book on civilians examines four different topics The first topic deals with the targetting of civilians in times of war This discussion is one which has been largely governed by the developments of technologies which have allowed projectiles to be discharged over ever greater areas and attempts to prevent their indiscriminate utilisation have struggled to keep pace The second topic concerns the destruction of the natural environment with particular regard to the utilisation of starvation as a method of warfare and unlike the first topic this one has rarely changed over thousands of years although contemporary practices are beginning to represent a clear break from tradition The third topic is concerned with the long standing problems of civilians under the occupation of opposing military forces where the practices of genocide collective punishments and or reprisals and rape have occurred The final topic in this volume is about the theft or destruction of the property of the enemy in terms of either pillage or the intentional devastation of the cultural property of the opposition As a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself

A Student's Search for Meaning Melissa Carter, James Fraser, Chelsea Garbell, Amy Wilson, 2023-11-25 This edited volume brings together reflections on how students pursue the search for meaning and purpose in the context of higher education It offers perspectives from humanities professors college chaplains of multiple faiths and observers of the changing shape of the American university as each considers the needs and expectations of today s students The collection address three key lines of inquiry what the student search for meaning looks like in the context of higher education how do presenters understand the dimensions of the search for meaning itself and how do or don t humanities faculty and religious life leaders talk to each other around the common student concerns addressed in both course work and the extracurricular world of religious life programs Together the conversation suggests that students pursue a search for meaning in the context of university life and the academic curriculum but the particular dimensions of this search are yet undefined This is often a contested pursuit because it conflicts with the other purposes of the university which some see as primary A key audience for this book is university administrators who work in the field of chaplaincy and faith based programming as well as department chairs and faculty in the liberal arts who are directly involved in building humanities curriculum

Hopeful Realism Jesse Covington, Bryan T. McGraw, Micah Watson, 2025-01-07 Natural law as a rich tradition of Christian thought has often been neglected by evangelicals But in this time of deep polarization this generous guide brings together robust natural law theory and practical cases for the evangelical concerned with bringing

together their theological commitments to bear on their political judgments *Political Questions* Larry Arnhart, 2015-08-28 In this enhanced edition Larry Arnhart continues to ask thought provoking questions that illuminate the philosophies of some of the most prominent political thinkers throughout history This clear well written guide is an ideal supplement to the original texts he recommends at the beginning of each chapter In addition to his analysis of Plato Aristotle Augustine Aquinas Machiavelli Descartes Rousseau Hegel Marx Nietzsche and Rawls the author's well organized and insightful approach provides an even more comprehensive overview than the earlier editions Supplementing the discussion of Leviathan the chapter on Thomas Hobbes covers Behemoth The chapter on John Locke includes his Letter Concerning Toleration as well as the original discussion of Second Treatise of Government A chapter on Adam Smith has been added which discusses Theory of Moral Sentiments and Wealth of Nations Leo Strauss is featured with an examination of Persecution and the Art of Writing and Natural Right and History A final chapter analyzes Steven Pinker's The Better Angels of Our Nature Social Rights and the Politics of Obligation in History Steven L. B. Jensen, Charles Walton, 2022-01-06 This pioneering volume explores the long neglected history of social rights from the Middle Ages to the present It debunks the myth that social rights are second generation rights rights that appeared after World War II as additions to a rights corpus stretching back to the Enlightenment Not only do social rights stretch back that far they arguably pre date the Enlightenment In tracing their long history across various global contexts this volume reveals how debates over social rights have often turned on deeper struggles over social obligation over determining who owes what to whom morally and legally In the modern period these struggles have been intertwined with questions of freedom democracy equality and dignity Many factors have shaped the history of social rights from class gender and race to religion empire and capitalism With incomparable chronological depth geographical breadth and conceptual nuance Social Rights and the Politics of Obligation in History sets an agenda for future histories of human rights John Locke and Modern Life Lee Ward, 2010-08-23 Recovers a sense of John Locke's central role in the making of the modern world It demonstrates that his vision of modern life was constructed on a philosophy of human freedom that is the intellectual nerve connecting the various strands of his thought By revealing the depth and originality of Locke's critique of the metaphysical assumptions and authoritative institutions of pre modern life this book rejects the notion of Locke as an intellectual anachronism Indeed the radical core of Locke's modern project was the democratization of mind according to which he challenged practically every previous mode of philosophical analysis by making the autonomous individual the sole determinant of truth It was on the basis of this new philosophical dispensation that Locke crafted a modern vision not only of government but also of the churches the family education and the conduct of international relations Freedom Without Violence Dustin Ells Howes, 2016-02-29 There is a long tradition in Western political thought suggesting that violence is necessary to defend freedom But nonviolence and civil disobedience have played an equally long and critical role in establishing democratic institutions Freedom Without Violence explores the long history of political

practice and thought that connects freedom to violence in the West from Athenian democracy and the Roman republic to the Age of Revolutions and the rise of totalitarianism It is the first comprehensive examination of the idea that violence is necessary to obtain defend and exercise freedom The book also brings to the fore the opposing theme of nonviolent freedom which can be found both within the Western tradition and among critics of that tradition Since the plebs first vacated Rome to refuse military service and win concessions from the patricians in 494 B C nonviolence and civil disobedience have played a critical role in republics and democracies Abolitionists feminists and anti colonial activists all adopted and innovated the methods of nonviolence With the advent of the Velvet Revolutions the end of apartheid in South Africa and most recently the Arab Spring nonviolence has garnered renewed interest in both scholarly publications and the popular imagination In this book Dustin Ells Howes traces the intellectual history of freedom as it relates to the concepts and practices of violence and nonviolence Through a critique and reappraisal of the Western political tradition *Freedom Without Violence* constructs a conception of nonviolent freedom The book argues that cultivating and practicing this brand of freedom is the sine qua non of a vibrant democracy that resists authoritarianism imperialism and oligarchy *God and Man in the Law* Robert Lowry Clinton,1997 In a wide ranging study based on legal history political theory and philosophical ideas going all the way back to Plato and Roman law Robert Clinton challenges current faith in an activist judiciary Claiming that a human centered Constitution leads to government by reductive moral theory and illegitimate judicial review he advocates a return to traditional jurisprudence and a God centered Constitution grounded in English common law and its precedents
