Scientific American: Presenting Psychology Deborah Licht, Misty Hull, Coco Ballantyne, 2016-01-11 Presenting Psychology is a fresh concise variation of the breakout bestseller Scientific American Psychology combining the communicative style of the world's most respected science magazine with thoughtful immersive learning to help you reach all kinds of students. Authored by longtime community college instructors Deborah Licht and Misty Hull alongside science journalist Coco Ballantyne, the text centers on profiles and video interviews of 25 real people to help students better understand, remember, and relate to psychology's defining concepts. Chapters also feature full-page Scientific American style infographics which guide students through essential, often complex concepts step by step. *Loose-leaf Version for Scientific American: Psychology* Deborah Licht, Misty Hull, Coco Ballantyne, 2014-01-09 In this breakthrough introduction to psychology, two committed tech-savvy professors, Deborah Licht and Misty Hull, combine years of research and teaching insights with the journalistic skill of science writer Coco Ballantyne, who came to this project directly from Scientific American. Together, they have created an introductory textbook and online system that draws on written profiles and video interviews of 27 real people to help students better understand, remember, and relate to psychology's basic ideas. Beautifully designed, the printed text is filled with high-interest examples and features including full-page infographics that help students understand and retain key concepts. Online, additional author-created resources including scaffolded activities and adaptive quizzes provide a seamless learning experience for students and a reliable assessment mechanism for instructors and programs. This innovative collaboration between Worth Publishers and Scientific American reflects a commitment to engaging and educating all students, including those who sometimes seem difficult to engage in the contemporary style of the world's most respected science magazine. *Science Education during Early Childhood* Wolff-Michael Roth, Maria Ines Mafra Goulart, Katerina Plakitsi, 2012-10-12 Children's learning and understanding of science during their pre-school years has been a neglected topic in the education literature, something this volume aims to redress. Paradigmatic notions of science education with their focus on biologically governed development and age-specific accession to scientific concepts have perpetuated this state of affairs. This book offers a very different perspective, however. It has its roots in the work of cultural-historical activity theorists who, since Vygotsky, have assumed that any higher cognitive function existed in and as a social relation. First accepting this precept removes any lower limit we may deem appropriate on children's cognitive engagement with science-related concepts. The authors describe and analyze the ways in which children aged from one to five grapple with scientific concepts and also suggest ways in which pre-service and in-service teachers can be prepared to teach in ways that support children's development in cultural and historical contexts. In doing so, the book affirms the value of cultural-historical activity theory as an appropriate framework for analyzing preschool children's participation in science learning experiences and shows that the theory provides an appropriate framework for understanding learning as well as for planning and conducting
