Education in an Age of Nihilism Nigel Blake, Paul Smeyers, Richard Smith, Paul Standish, 2012-12-06 This book addresses concerns about educational and moral standards in a world increasingly characterised by nihilism On the one hand there is widespread anxiety that standards are falling on the other new machinery of accountability and inspection to show that they are not The authors in this book state that we cannot avoid nihilism if we are simply laissez faire about values neither can we reduce them to standards of performance nor must we return to traditional values They state that we need to create a new set of values based on a critical assessment of contemporary practice in the light of a number of philosophical texts that address the question of nihilism including the work of Nietzsche

Nietzsche's Renewal of Ancient Ethics Neil Durrant, 2022-12-29 Nietzsche s Renewal of Ancient Ethics connects different strands in Nietzsche studies to progress a unique interpretation of friendship in his writings Exploring this alternative approach to Nietzsche s ethics through the influence of ancient Greek ideals on his ideas Neil Durrant highlights the importance of contest for developing strong friendships Durrant traces the history of what Nietzsche termed a higher friendship to the ancient Greek ideal of the Homeric hero In this kind of friendship neither person attempts to tyrannize or dominate the other but rather aims to promote the differences between them as a way of stimulating stronger and fiercer contests Through this exchange they discover new heights new standards of excellence both for themselves and for others Durrant shows how the development of this approach to personal relationships relied on Nietzsche rejecting the Christian ideals of love and compassion to build an ethics which incorporated aspects of evolutionary biology into the ancient Homeric ideals he was himself wedded to The resulting higher friendship is strong enough to include not only love and compassion but also enmity and opposition expanding our notion of what is good and ethical in the process

A New Science of Religion

Gregory W. Dawes, James Maclaurin, 2013 Religious belief once in the domain of the humanities has found a new home in the sciences Promising new developments in the study of religion by cognitive scientists and evolutionary theorists put forward empirical hypotheses regarding the origin spread and character of religious beliefs Different theories deal with different aspects of human religiosity some focus on religious beliefs while others focus on religious actions and still others on the origin of religious ideas While these theories might share a similar focus there is plenty of disagreement in the explanations they offer This volume examines the diversity of new scientific theories of religion by outlining the logical and causal relationships between these enterprises Are they truly in competition as their proponents sometimes suggest or are they complementary and mutually illuminating accounts of religious belief and practice Cognitive science has gained much from an interdisciplinary focus on mental function and this volume explores the benefits that can be gained from a similar approach to the scientific study of religion

Satisficing and Maximizing Michael Byron, 2004-07-19 How do we think about what we plan to do One dominant answer is that we select the best possible option available However a growing number of philosophers would offer a different answer since we are not equipped to maximize we often choose the next best alternative one that is no more than satisfactory This strategy choice is called satisficing a term coined by the economist Herb Simon This new collection of essays explores both

these accounts of practical reason The Northern Cheyenne Exodus in History and Memory James N. Leiker, Ramon Powers, 2012-11-09 The exodus of the Northern Cheyennes in 1878 and 1879 an attempt to flee from Indian Territory to their Montana homeland is an important event in American Indian history It is equally important in the history of towns like Oberlin Kansas where Cheyenne warriors killed more than forty settlers The Cheyennes in turn suffered losses through violent encounters with the U S Army More than a century later the story remains familiar because it has been told by historians and novelists and on film In The Northern Cheyenne Exodus in History and Memory James N Leiker and Ramon Powers explore how the event has been remembered told and retold They examine the recollections of Indians and settlers and their descendants and they consider local history mass media treatments and literature to draw thought provoking conclusions about how this story has changed over time The Cheyennes journey has always been recounted in melodramatic stereotypes and for the last fifty years most versions have featured noble savages trying to reclaim their birthright Here Leiker and Powers deconstruct those stereotypes and transcend them pointing out that history is never so simple The Cheyennes flight they write had left white and Indian bones alike scattered along its route from Oklahoma to Montana In this view the descendants of the Cheyennes and the settlers they encountered are all westerners who need history as a way of explaining the bones and arrowheads that littered the plains Leiker and Powers depict a rural West whose diverse peoples Euro American and Native American alike seek to preserve their heritage through memory and history Anyone who lives in the contemporary Great Plains or who wants to understand the West as a whole will find this book compelling
