*The Routledge Handbook of the Political Economy of Science* David Tyfield, Rebecca Lave, Samuel Randalls, Charles Thorpe, 2017-04-28 The political economy of research and innovation R I is one of the central issues of the early twenty first century Science and innovation are increasingly tasked with driving and reshaping a troubled global economy while also tackling multiple overlapping global challenges such as climate change or food security global pandemics or energy security But responding to these demands is made more complicated because R I themselves are changing Today new global patterns of R I are transforming the very structures institutions and processes of science and innovation and with it their claims about desirable futures Our understanding of R I needs to change accordingly Responding to this new urgency and uncertainty this handbook presents a pioneering selection of the growing body of literature that has emerged in recent years at the intersection of science and technology studies and political economy The central task for this research has been to expose important but consequential misconceptions about the political economy of R I and to build more insightful approaches This volume therefore explores the complex interrelations between R I both in general and in specific fields and political economies across a number of key dimensions from health to environment and universities to the military The Routledge Handbook of the Political Economy of Science offers a unique collection of texts across a range of issues in this burgeoning and important field from a global selection of top scholars The handbook is essential reading for students interested in the political economy of science technology and innovation It also presents succinct and insightful summaries of the state of the art for more advanced scholars

**Can We Be Happier?** Richard Layard, George Ward, 2020-01-23 From the bestselling author of Happiness and co editor of the annual World Happiness Report Most people now realize that economic growth however desirable will not solve all our problems Instead we need a philosophy and a science which encompasses a much fuller range of human need and experience This book argues that the goal for a society must be the greatest possible all round happiness and shows how each of us can become more effective creators of happiness both as citizens and in our own organizations Written with Richard Layard s characteristic clarity it provides hard evidence that increasing happiness is the right aim and that it can be achieved Its language is simple its

evidence impressive its effect inspiring In this book *Can We Be Happier* which is part of Richard Layard's excellent ongoing exploration of what happiness is and how it can be achieved he provides evidence that if you have peace of mind and are full of joy your health will be good your family will be happy and that happiness will affect the atmosphere of the community in which you live The Dalai Lama *Responsible Business in a Changing World* Belén Díaz Díaz, Nicholas Capaldi, Samuel O. Idowu, René Schmidpeter, 2020-05-11 This book explores the current state of Corporate Social Responsibility CSR from an international perspective the goal being to share ideas and visions for a sustainable future and to provide useful guidelines for academics practitioners and policymakers in the context of the 2030 Agenda for Sustainable Development released by the United Nations Research on CSR has evolved considerably over the last three decades However there are still many unanswered questions concerning the sustainability of business in an increasingly changing world for example If most companies consider CSR to be valuable to their organizations why do only 15% of them systematically implement Social Responsibility initiatives If CSR has been found to be profitable for companies why are they so reluctant to develop an active internal CSR policy Why are there such significant differences in CSR adoption from country to country Why does it take a huge crisis to make politicians react and regulate certain core CSR issues This contributed volume answers these questions presenting a wealth of case studies and new approaches in the process *The World's Search for Sustainable Development* Mukul Sanwal, 2015-11-05 This text traces the evolution of sustainable development and climate change from the time it emerged in international consultations and agreements The three sections of the book focusing on the framework climate change and sustainable development seek to cover the essentials of the politics of natural resource usage at the global level The book explores the evolution of sustainable development and climate change within the framework of the United Nations and the way the concept has been defined through intergovernmental meetings agreements and consensus within the multilateral system It also explores the best ways of reducing the risk to the planet while enabling societies to pursue sustainable development paths The challenges call for a transformation of social systems to facilitate a broadly acceptable change The book also explores the adoption of low carbon models different from the high carbon socio technical systems and related social practices **The Handbook of Globalisation, Third Edition** Jonathan Michie, 2019 The past 30 years are often depicted as an era of globalisation and even more so with the recent rise of global giants such as Google and Amazon This updated and revised edition of *The Handbook of Globalisation* offers novel insights into the rapid changes our world is facing and how best we can handle them **The Soft Power of Non-Western Small States** Sarina Theys, 2024-09-12 This book critically engages with the concepts of small states and soft power and advances a new approach to defining small states a new conceptualisation of soft power and a method for empirically analysing the exercise of soft power It revisits the concepts of small states and soft power with a focus on Bhutan and Qatar and their approach to exercise soft power to achieve their foreign policy goals Building on two main perspectives to define small states the objective approach and the

subjective perspective this book offers an intersubjective approach to define states as small The intersubjective approach requires a shared understanding between states that a certain state is small The book further highlights the importance of deconstructing the meaning of size and to separate the notion of size from the concept of power because size is not always indicative of power It argues that although small states tend to have fewer material resources than large states they nevertheless can have influence through the exercise of soft power Soft power is in this book defined as the ability of an actor to convince another actor that something is true Convincing deals with the beliefs of an actor and is a mental decision rather than a physical action This book argues that the exercise of soft power can be analysed through examining the development projection and reception of identities The findings of this book show that Bhutan was more successful than Qatar in exercising soft power and explains the reasons for this variation Aimed at a multidisciplinary audience this book will be of particular interest to practitioners scholars and students of International Relations Political Power Small States and Area Studies

**Urban Inequalities from Space** Monika Kuffer, Stefanos Georganos, 2024-05-07 Rapid transformation processes occur in the Majority World where most of the global population is living estimated around 3 4 of the global population often deprived of access to infrastructure services exposed to hazards and degrading environmental conditions The continuous urbanization in many African Asian and Latin American cities is coupled with rapid socio economic and demographic changes in urban peri urban and rural areas These changes often increase socio economic fragmentation and existing disparities According to the United Nations of the 36 fastest growing cities with an average annual growth rate of more than 6% seven are located in Africa while 28 are found in Asia On top of the socio economic transformations the increasing impact of climate change is expected to increase local vulnerabilities However data to understand these transformation processes and relationships are either unavailable scarce or come with high degrees of uncertainty Earth Observation information and methods have a great potential to fill data gaps but they are not exploited to their full potential Most urban remote sensing studies in the Majority World focus on the primary cities while not much is known about secondary cities urbanizing zones or peri urban areas Attempting to measure and map environmental and socio economic phenomena through remote sensing is fundamentally different from extracting bio physical parameters In general studies done by researchers of the Minority World do not sufficiently understand the information needs and capacity demands of the Majority World especially related to user requirements and ethical perspectives In this book we aim to provide an outlook on how Remote Sensing can provide tailored solutions to information needs in urban and urbanizing areas of the Majority World e g in terms socio economic environmental and demographic transformation processes We will provide methodological and application pathways in support of local and national information needs as well as in support of sustainable development and specifically supporting the monitoring of the 17 Sustainable Development Goals SDGs The book combines an overview of innovations in applications methodologies and data use showing the capacity of Earth Observation to fill global knowledge gaps *Deepening*

*Democracy* Joseph Tharamangalam, Jos Chathukulam, 2022-12-30 This book examines the renewed interest and commitment that countries across the world have shown in recent decades towards adopting models of decentralising or downsizing the state and moving towards more participatory models of government. It examines systems of decentralised development such as self-managing co-operatives from a global and comparative perspective with a focus on developing countries. Drawing on examples from Kerala and a few other states in India as well as Cuba, Bangladesh and South Africa among other countries, the book offers critical perspectives on the positive impacts of these experiments and the promises these offer for the future. It discusses the challenges of implementing these models, how well these work in coordination with the civil society and the state, issues of transparency and democratic oversight as well as corruption and capture of power due to entrenched structures of inequality. The volume analyses welfare and development models and self-management interventions in countering the effects of the COVID-19 pandemic. It also looks at the merits and demerits of decentralisation in countering the global socioeconomic and environmental crisis and the rise of authoritarian populism in many countries. The book will be of interest to students and researchers of development studies, political science, business, community development, social justice as well as of co-operative management programmes. It will also appeal to students of political economy as well as development professionals, think tanks and policymakers.
