Dr Ana Ornelas developed an outstanding book that every student and professional clinician should read. It presents the main protocols of CBT in a single volume by conceptualizing the client in their uniqueness. I highly recommend this text. Prof Dr Stefan G Hofmann, Alexander von Humboldt Professor of Clinical Psychology, University of Marburg, Germany. Until recently, cognitive behavioral therapy has been tailored for individual DSM disorders, resulting in numerous treatment protocols. But advances in identifying mechanisms of action of these therapies has led to single interventions that are effective across broad classes of disorders such that they are called transdiagnostic. In this groundbreaking book, leading approaches qualifying as transdiagnostic are described and presented in a way that will be very useful to clinicians in their practice and in their training. Prof Dr David H Barlow, Professor of Psychology and Psychiatry Emeritus, Boston University, USA. Founder of the Center for Anxiety and Related Disorders at Boston University. Some information in this book was originally written in Portuguese and translated into English with the help of artificial intelligence. Subsequent human revisions were done primarily in terms of content.
