Project 2000

Quick Reference Guide

Project Basics and Workflow

A project is a group of coordinated tasks that have a common goal. The chart below gives an overview of the stages involved in creating and managing a project.

Create the Project File

Creating a project file requires dividing the project into clearly defined tasks (see *Creating Tasks*, page 3), then assigning resources to complete those tasks (see *Assigning Resources to Tasks*, page 4).

To create a project file, choose **File>New**. In the **New** dialog box, click the **General** tab, then double-click **Blank Project**. In the **Project Information** dialog box, click **OK** to accept the default settings (the project will start on the current date).

Manage the Project

Managing a project requires you to update task status and resource assignments (see *Maintaining and Monitoring Projects*, page 6), analyze the project's progress using different views (see *Use View List*, page 2), and track actual progress against your original baseline plan (see *Maintaining and Monitoring Projects*, page 6).

Print Reports and Views

Printing reports helps keep team members up to date on important project information. Project provides reports that summarize specific types of information, such as cost reports that identify budget concerns, or activity reports that indicate task progress (see *Printing Reports and Views*, page 2).
