Never Meant To Survive Never Meant To Survive:

Never Meant to Survive João H. Costa Vargas, 2023-06-14 *Never Meant to Survive* presents a historical political and social assessment of anti black genocide and liberatory struggles that arose to resist it Based on fine grained accounts of community life at the street level Costa Vargas s work presents crucial examples of political resistance and community activism By examining two cities linked by common experiences of Blackness Los Angeles and Rio de Janeiro this book identifies a prevailing genocidal force that organizes individuals and groups across society The 1965 and 1992 riots in Los Angeles the work of the Black Panther Party and favela activists in Brazil and police brutality in struggles between black communities and the state in both L A and Rio de Janeiro all figure importantly in Costa Vargas s compelling account What emerges from this analysis is a call for the destruction of the conditions that foster the marginalization of black communities and a halt to the internal conflicts between black social groups themselves The "Racial" Economy of Science Sandra Harding, 1993-10-22 The classic and recent essays gathered here will challenge scholars in the natural sciences philosophy sociology anthropology and women s studies to examine the role of racism in the construction and application of the sciences Harding has also created a useful text for diverse classroom settings Library Journal A rich lode of readily accessible thought on the nature and practice of science in society Highly recommended Choice This is an excellent collection of essays that should prove useful in a wide range of STS courses Science Technology and Society important and provocative The Women s Review of Books The timeliness and utility of this large interdisciplinary reader on the relation of Western science to other cultures and to world history can hardly be overemphasized It provides a tremendous resource for teaching and for research Ethics Excellent The Reader s Review Sandra Harding is an intellectually fearless scholar She has assembled a bold impressive collection of essays to make a volume of illuminating power This brilliantly edited book is essential reading for all who seek understanding of the multicultural debates of our age Never has a book been more timely Darlene Clark Hine These authors dispute science s legitimation of culturally approved definitions of race difference including craniology and the measurement of IQ the notorious Tuskegee syphilis experiments and the dependence of Third World research on First World agendas Politics of Education Susan Gushee O'Malley, Robert C. Rosen, 1990-01-01 This book brings together thirty of the best essays from *Radical Teacher* The journal is devoted to feminist and socialist approaches to teaching to showing teachers how to democratize the classroom and empower students The articles included here have been chosen for their continuing usefulness to school and college teachers with emphasis on critical pedagogy as well as radical course content These essays provide not only a wealth of ideas for teachers already involved in radical education but also an accessible readable and wide ranging introduction for those new to it **Fear of Math** Claudia Zaslavsky, 1994 The author offers a host of methods drawn from many cultures for tackling real world math problems and explodes the myth that women and minorities are not good at math Identity Poetics Linda Garber, 2001 What do we now know about the origins of plants on land from an evolutionary

and an environmental perspective The essays in this collection present a synthesis of our present state of knowledge integrating current information in paleobotany with physical chemical and geological data

Shoutin' in the Fire Danté Stewart, 2021-10-12 A stirring meditation of being Black and learning to love in a loveless anti Black world Only once in a lifetime do we come across a writer like Dant Stewart so young and yet so masterful with the pen This work is a thing to make dungeons shake and hearts thunder Robert Jones Jr New York Times bestselling author of The Prophets In Shoutin in the Fire Dant Stewart gives breathtaking language to his reckoning with the legacy of white supremacy both the kind that hangs over our country and the kind that is internalized on a molecular level Stewart uses his personal experiences as a vehicle to reclaim and reimagine spiritual virtues like rage resilience and remembrance and explores how these virtues might function as a work of love against an unjust unloving world In 2016 Stewart was a rising leader at the predominantly white evangelical church he and his family were attending in Augusta Georgia Like many young church leaders Stewart was thrilled at the prospect of growing his voice and influence within the community and he was excited to break barriers as the church's first Black preacher But when Donald Trump began his campaign so began the unearthing Stewart started overhearing talk in the pews comments ranging from microaggressions to outright hostility toward Black Americans As this violence began to reveal itself en masse Stewart quickly found himself isolated amid a people unraveled this community of faith became the place where he and his family now found themselves most alone This set Stewart on a journey first out of the white church and then into a liberating pursuit of faith by looking to the wisdom of the saints that have come before including James H Cone James Baldwin and Toni Morrison and by heeding the paradoxical humility of Jesus himself This sharply observed journey is an intimate meditation on coming of age in a time of terror Stewart reveals the profound faith he discovered even after experiencing the violence of the American church a faith that loves Blackness speaks truth to pain and trauma and pursues a truer realer kind of love than the kind we're taught a love that sets us free

Whose Science? Whose Knowledge? Sandra G. Harding, 2016-12-01 Sandra Harding here develops further the themes first addressed in her widely influential book *The Science Question in Feminism* and conducts a compelling analysis of feminist theories on the philosophical problem of how we know what we know Following a strong narrative line Harding sets out her arguments in highly readable prose In Part 1 she discusses issues that will interest anyone concerned with the social bases of scientific knowledge In Part 2 she modifies some of her views and then pursues the many issues raised by the feminist position which holds that women s social experience provides a unique vantage point for discovering masculine bias and and questioning conventional claims about nature and social life In Part 3 Harding looks at the insights that people of color male feminists lesbians and others can bring to these controversies and concludes by outlining a feminist approach to science in which these insights are central Women and men cannot understand or explain the world we live in or the real choices we have she writes as long as the sciences describe and explain the world primarily from the perspectives of the lives of the dominant groups Harding s is a richly informed radical voice that boldly confronts issues of crucial importance to the future of many academic disciplines Her book will amply reward readers looking to achieve a more fruitful understanding of the relations between feminism science and social life

Venus Rising Kaitlin Bevis, 2017-06-09. The final battle Aphrodite is in big trouble this time. She's stranded on the island of the DAMNED without powers and without her beloved Ares. Worse, she knows it's only a matter of time before the demigods figure out she's a goddess. If that happens, she'll wish she were dead. Help arrives in the form of an unlikely ally. But Medea has her own demands, and if Aphrodite wants to survive, not to mention find Hades and the weapons cache, she has to meet them. But all their plans take a back seat when they find themselves in even more pressing danger. When Medea moved the island, she rendered it unstable. Now it's breaking apart and sinking. In the chaos, the demigods have risen up, blaming the gods for their misfortune. Nobody is safe from the demigods, especially a Pantheon sympathizer like Aphrodite. And they've come up with a deadly test to uncover any imposters. Aphrodite knows she can't do this alone. It will take the whole Pantheon to get her out of this mess. Unfortunately, they'll have to find her first. Kaitlin Bevis spent her childhood curled up with a book and a pen. If the ending didn't agree with her, she rewrote it. Because she's always wanted to be a writer, she spent high school and college learning everything she could to achieve that goal. After graduating college with a BFA and Masters in English, Kaitlin went on to write *The Daughters of Zeus* series.

Training for Catastrophe Lindsay Thomas, 2021-03-16 A timely politically savvy examination of how impossible disasters shape the very real possibilities of our world Why would the normally buttoned down national security state imagine lurid future scenarios like a zombie apocalypse In *Training for Catastrophe* author Lindsay Thomas shows how our security regime reimagines plausibility to focus on unlikely and even unreal events rather than probable ones With an in depth focus on preparedness a pivotal emergent national security paradigm since 9 11 she explores how fiction shapes national security Thomas finds fiction at work in unexpected settings from policy documents and workplace training manuals to comics and video games Through these texts as well as plenty of science fiction she examines the philosophy of preparedness interrogating the roots of why it asks us to treat explicitly fictional events as real Thomas connects this philosophical underpinning to how preparedness plays out in contemporary politics emphasizing how it uses aesthetic elements like realism genre character and plot to train people both to regard some disasters as normal and to ignore others *Training for Catastrophe* makes an important case for how these documents elicit consent and compliance Thomas draws from a huge archive of texts including a Centers for Disease Control comic about a zombie apocalypse the work of Audre Lorde and the political thrillers of former national security advisor Richard Clarke to ask difficult questions about the uses and values of fiction A major statement on how national security intrudes into questions of art and life *Training for Catastrophe* is a timely intervention into how we confront disasters
