**Challenges for the Democratisation Process in Tanzania** Jonas Ewald, 2013-07-24 Tanzania has been independent in 2011 for 50 years While most neighbouring states have gone through violent conflicts Tanzania has managed to implement extensive reforms without armed political conflicts Hence Tanzania is an interesting case for Peace and Development research This dissertation analyses the political development in Tanzania since the introduction of the multiparty system in 1992 with a focus on the challenges for the democratisation process in connection with the 2000 and 2005 elections The question of to what extent Tanzania had moved towards a consolidation of democracy is analysed by looking at nine different institutions of importance for democratisation grouped in four spheres the state the political civil and economic society Focus is on the development of the political society and the role of the opposition in particular The analysis is based on secondary and primary material collected between September 2000 to April 2010 The main conclusion is that even if the institutions of liberal democracy have gradually developed in practice single party rule has continued manifested in the 2005 election when the CCM won 92% of seats Despite impressive economic growth poverty remains deep and has not been substantially reduced On a theoretical level this brings the old debate between liberal and substantive democracy back to the fore Neither the economic nor the political reforms have brought about a transformation of the political and economic system resulting in the poor majority gaining substantially more political influence and improved economic conditions Hence it is argued that the interface between the economic political and administrative reforms has not been sufficiently considered in the liberal democratic tradition Liberal democracy is necessary for a democratic development but not sufficient for democracy to be consolidated For that a substantive democratic development is necessary

Democratization in Africa: Challenges and Prospects Gordon Crawford, Gabrielle Lynch, 2013-09-13 It is two decades since the third wave of democratization began to roll across sub Saharan Africa in the early 1990s This book provides a very timely investigation into the progress and setbacks over that period the challenges that remain and the prospects for future democratization in Africa It commences with an overall assessment of the lack of progress made from 1990 to 2010 exploring positive developments with reasons for caution Based on original research subsequent contributions examine various themes through country case studies inclusive of the routinisation of elections accompanied by democratic rollback and the rise of hybrid regimes the tenacity of presidential powers the dilemmas of power sharing ethnic voting and rise of a violent politics of belonging the role of donors and the ambiguities of democracy promotion Overall the book concludes that steps forward remain greater than reversals and that typically though not universally sub Saharan African countries are more democratic today than in the late 1980s Nonetheless the book also calls for more meaningful processes of democratization that aim not only at securing civil and political rights but also socio economic rights and the physical security of African citizens This book was originally published as a special issue of Democratization

*Populism in Europe and the Americas* Cas Mudde, Cristóbal Rovira Kaltwasser, 2012-05-28 Although populism

has become something of a buzzword in discussions about politics it tends to be studied by country or region This is the first book to offer a genuine cross regional perspective on populism and its impact on democracy By analyzing current experiences of populism in Europe and the Americas this edited volume convincingly demonstrates that populism can be both a threat and a corrective to democracy The contributors also demonstrate the interesting similarities between right wing and left wing populism both types of populism are prone to defend a political model that is not against democracy per se but rather at odds with liberal democracy Populism in Europe and the Americas offers new insights into the current state of democracy from both a theoretical and an empirical point of view

New Challenges for Maturing Democracies in Korea and Taiwan Larry Diamond, Gi-Wook Shin, 2014-01-29 New Challenges for Maturing Democracies in Korea and Taiwan takes a creative and comparative view of the new challenges and dynamics confronting these maturing democracies Numerous works deal with political change in the two societies individually but few adopt a comparative approach and most focus mainly on the emergence of democracy or the politics of the democratization processes This book utilizing a broad interdisciplinary approach pays careful attention to post democratization phenomena and the key issues that arise in maturing democracies What emerges is a picture of two evolving democracies now secure but still imperfect and at times disappointing to their citizens a common feature and challenge of democratic maturation The book demonstrates that it will fall to the elected political leaders of these two countries to rise above narrow and immediate party interests to mobilize consensus and craft policies that will guide the structural adaptation and reinvigoration of the society and economy in an era that clearly presents for both countries not only steep challenges but also new opportunities

promotion is diffuse which in turn makes the EU a particularly flexible but also technical democracy promoter when it comes to implementation. At the same time there are limits to flexibility at the level of concepts and frames. This indicates a distinct character of the substance of EU democracy promotion which can be linked to the nature of the EU polity. This book was published as a special issue of the Cambridge Review of International Affairs. *The Palgrave Handbook of International Development* Jean Grugel, Daniel Hammett, 2016-06-10. **Democratic Transformation and Obstruction** Nelli Babayan, 2014-08-21. Although democracy promotion has become a popular term for policy makers and scholars democratization is rarely a smooth or linear transition. While some countries quickly democratize others lag behind despite a long period of democracy promotion activities. Furthermore while democracy promotion itself has been widely studied there is a paucity of literature available assessing the outcome or the impact of democracy promotion. This book investigates democracy promotion by the European Union and the United States of America and seeks to uncover why intensive democracy promotion has resulted in limited democratic progress. Exploring case studies of Armenia Azerbaijan and Georgia this book examines the conditions in which democracy promotion is more likely to result in democratic transformation. In addition it introduces the concept of the democracy blocker a powerful authoritarian regional actor that is capable of blocking democratization in other countries. This book will be of interest to students and scholars of Political Science Democracy Democratization EU Studies US Politics Comparative Politics and Foreign Policy.

**Religion and Political Change in the Modern World** Jeffrey Haynes, 2015-09-07

The purpose of the book is to ascertain whether there is a generic impact that religion brings to bear on recent political changes in the modern world. Over the last two decades or so there have been increasing numbers of political issues with which various manifestations of religion engage. This impact is not restricted exclusively to countries in the developed or developing world. Instead we seem to be seeing a widespread impact of religion on politics which defies earlier assumptions about secularisation. This presumed that the more modern a country is then the less likely it is that religion will play a significant political role. Recent evidence is however firmly to the contrary: the degree of modernity in a country does not correspond well with the amount of religiosity in a country nor with the role that religion can play in politics. The book focuses on the recent return of religion to politics. It assesses how religion is involved in recent examples of political change in various countries including the impact of religion on democratization. The book features both theoretical chapters and case studies. The case studies examine different countries: Israel, Egypt, Morocco and Iran and regions: Sub-Saharan Africa with a focus on Islam, Judaism and Protestantism and Catholicism. The overall aim is to get a sense of what is happening when religion and politics interact. The chapters in this book were originally published in *Democratization*.
