## TAKING PICTURES

There are two ways to compose your subject: with the viewfinder or using the monitor. Depending upon the shooting situation, there may be advantages to each method. Please refer to the printed Basic Manual for more information.

### a. Taking a Picture with the Viewfinder

- Turn the Mode dial to **[P]** and then turn on the camera.
- Frame your subjects using the AF target mark in the viewfinder.
- Press the shutter button halfway.

The C-50 Zoom Camera confirms the focus and exposure are properly set when the green lamp in the viewfinder lights steadily.

- Press the shutter button completely to take the picture. A short beep confirms your picture has been taken.

### b. Taking a Picture with the Monitor

- Turn the Mode dial to **[P]** and then turn on the camera.
- Press **[Q]** and then frame your subject using the full-color monitor.

Icons representing camera settings appear on the monitor, telling you important information such as the Flash and record modes, battery life, and the number of frames remaining.

- Press the shutter button halfway. The green lamp will light steadily when the focus and exposure are set.
- Press the shutter button completely to take the picture. A short beep confirms your picture has been taken.

### c. Zooming

The C-50 Zoom features a zoom lens, allowing you to get closer to action or capture wide-angle shots and get everything into the picture.

- Push the lever to zoom out and get everything into the picture.
- Push the lever to choose telephoto shooting and get closer to the action.

### d. Flash Modes

The C-50 Zoom features multiple flash modes. Please note that not all flash modes are available depending on the Mode dial position selected.

Icon	Flash Mode	Description
	Auto-Flash	The camera automatically decides if the flash is needed.
	Red-Eye Reduction	Reduces incidence of red-eyes by emitting pre-flashes to break pupil size before firing the main flash. The strobe effect is normal operation for this mode.
	Slow Flash	The flash always fires with every picture.
	Slow Syncronization	Adjusts the flash for special situations requiring slow shutter speeds.
	Slow Syncronization with Red-Eye Reduction	Adjusts the flash for special situations requiring slow shutter speeds when taking portraits.
	Flash Off	Turns the flash off for times when flash photography is prohibited or not desired. The flash never fires.

When the camera Mode dial is set to **[P]**, Auto-Flash, Red-Eye, and Flash Off are available. Press **[F]** to cycle through the available flash modes. While the shutter button depressed halfway, the flash is ready to fire when the orange lamp next to the viewfinder lights steadily. When the orange lamp is blinking, the flash is charging.

### e. Number of Storable Pictures

Your C-50 Zoom Camera package includes a 32MB xD-Picture Card. When set to the default HQ record mode, you have enough capacity to store approximately 26 pictures.

This mode allows you to capture high quality images with medium file sizes. The HQ mode is suitable for most shooting situations.

See the C-50 Zoom Basic Manual for complete descriptions of each record mode and the storable frame capacity for the various resolution modes and xD-Picture Card capacities.

**NOTE:** To find out how many frames you have left, turn on the monitor and look for the number in the lower left corner. Remember, you can always delete unwanted pictures to make room for more. (See Step 5.)

## VIEWING AND ERASING PICTURES

With the C-50 Zoom Camera, you can easily view the photos you want—and delete the ones you don't.

### a. Viewing Pictures

There are two ways to access the Playback mode:

- If the camera is OFF and the lens barrier closed, press **[Q]** once.
- If the camera is in the shooting mode with the lens barrier fully open, press **[Q]** twice in rapid succession (Quick View).

The last picture taken appears in the monitor. Use **[Left]** and **[Right]** to scroll through all the images saved on your xD-Picture Card.

When you are finished reviewing your pictures:

- Press **[Q]** to turn the camera off.
- OR
- To return back to the shooting mode, press the shutter button halfway.

### b. Erasing Pictures

The beauty of digital photography is your ability to keep the photos you want, delete the rest, and reuse empty memory space to take new pictures. The C-50 Zoom Digital Camera offers two ways to permanently erase unwanted digital photos.

**Single-Frame Erase:** Deletes only the picture currently displayed in the monitor.

**Once erased, pictures cannot be restored.**

- With the lens barrier closed, press **[Q]** and use the arrow keys to display the picture you want to erase.
- Press **[Q]**. The erase confirmation screen is displayed.
- Press **[Q]** to select YES, and then press **[Q]**. The picture is now erased.

**NOTE:** Images can also be erased while in the "Quick View" mode described in step 5a. This makes it easy to quickly erase a picture that you just took.

**All-Frame Erase:** Deletes all pictures on the xD-Picture Card in one operation, except for pictures you have protected.

**Once erased, pictures cannot be restored.**

- With the lens barrier closed, press **[Q]**.
- Press **[Q]** then press **[Q]** to select MODE MENU.
- Use **[Left]** and **[Right]** to select the CAMD tab, then press **[Q]** twice to access the CAMD SETUP screen.
- All ERASE should be highlighted. Press **[Q]**.
- As a safeguard, the C-50 Zoom Camera will ask you to select YES or NO to confirm erasing, so this process permanently deletes all unprotected pictures. Select YES and press **[Q]**.
