**On Growth and Form** D'Arcy Wentworth Thompson, 2022-11-21 *On Growth and Form* is a scholarly work by D'Arcy Wentworth Thompson Thompson was a Scottish biologist mathematician classics scholar and a pioneer of mathematical biology Excerpt Of the chemistry of his day and generation Kant declared that it was a science but not science eine Wissenschaft aber nicht Wissenschaft for that the criterion of physical science lay in its relation to mathematics And a hundred years later Du Bois Reymond profound student of the many sciences on which physiology is based recalled and reiterated the old saying declaring that chemistry would only reach the rank of science in the high and strict sense when it should be found possible to explain chemical reactions in the light of their causal relation to the velocities tensions and conditions of equilibrium of the component molecules that in short the chemistry of the future must deal with molecular mechanics by the methods and in the strict language of mathematics as the astronomy of Newton and Laplace dealt with the stars in their courses We know how great a step has been made towards this distant and once hopeless goal as Kant defined it since van't Hoff laid the firm foundations of a mathematical chemistry and earned his proud epitaph Physicam chemiae adiunxit

*Reconciling Science and Religion* Peter J. Bowler,2014-04 Although much has been written about the vigorous debates over science and religion in the Victorian era little attention has been paid to their continuing importance in early twentieth century Britain *Reconciling Science and Religion* provides a comprehensive survey of the interplay between British science and religion from the late nineteenth century to World War II Peter J Bowler argues that unlike the United States where a strong fundamentalist opposition to evolutionism developed in the 1920s most famously expressed in the Scopes monkey trial of 1925 in Britain there was a concerted effort to reconcile science and religion Intellectually conservative scientists championed the reconciliation and were supported by liberal theologians in the Free Churches and the Church of England especially the Anglican Modernists Popular writers such as Julian Huxley and

George Bernard Shaw sought to create a non Christian religion similar in some respects to the Modernist position Younger scientists and secularists including Rationalists such as H G Wells and the Marxists tended to oppose these efforts as did conservative Christians who saw the liberal position as a betrayal of the true spirit of their religion With the increased social tensions of the 1930s as the churches moved toward a neo orthodoxy unfriendly to natural theology and biologists adopted the Modern Synthesis of genetics and evolutionary theory the proposed reconciliation fell apart Because the tensions between science and religion and efforts at reconciling the two are still very much with us today Bowler s book will be important for everyone interested in these issues
