Conservatives and the Constitution Ken I. Kersch, 2019-03-28 Since the 1980s a ritualized opposition in legal thought between a conservative originalism and a liberal living constitutionalism has obscured the aggressively contested tradition committed to and mobilization of arguments for constitutional restoration and redemption within the broader postwar American conservative movement *Conservatives and the Constitution* is the first history of the political and intellectual trajectory of this foundational tradition and mobilization By looking at the deep stories told either by identity groups or about what conservatives took to be flashpoint topics in the postwar period Ken I Kersch seeks to capture the developmental and integrative nature of postwar constitutional conservatism challenging conservatives and liberals alike to more clearly see and understand both themselves and their presumed political and constitutional opposition *Conservatives and the Constitution* makes a unique contribution to our understanding of modern American conservatism and to the constitutional thought that has in critical ways informed and defined it

The Desolation Chronicles Theodore J. Nottingham, 2013-03-04 A Prophet had appeared in the early part of the twenty first century the last in a long line of healers visionaries and mystics down through the ages People around the world heard his message of oncoming devastation and his warning that the only shelter that would save them would be their own inner strength and nobility of spirit Religions and technologies had failed humanity Only these few men and women inspired by the wisdom transmitted to them by the Prophet could offer desperate people a path to sanity and renewal But the odds were amassed against them Not only was the planet facing utter destruction from wild weather changes earthquakes volcanoes floods and a dreaded pole shift but the world government considered them their fiercest enemies The time of reckoning was here Everyone would have to face this age of transition in one of two ways in utter horror and despair or with the slim hope that renewal lay on the other side of catastrophic earth changes The second option would vanish entirely if it was known what forces were at the heart of the destruction forces that were darker and more savage than Nature's mightiest upheavals

The Poetry of Francisco Brines Judith Nantell, 1994 Brines's seven poetry collections offer a sustained inquiry into three fundamental philosophical themes knowledge the present moment and non being These themes however are presented as conflictual differences The numerous poetic voices heard throughout his poetry continually wrestle with knowledge perpetually oscillating with ignorance the present moment unceasingly becoming past and human existence endlessly displaying its own finitude In this study the critical interpretation of these themes leads to the critical exploration of language

the signifying process of language and the warring forces of signification The sign is thus viewed as a structure of difference and as such it endlessly displays the duplicitous nature of language engaged in a semantic struggle with itself

Ten Lessons in Theory Calvin Thomas, 2013-08-01 An introduction to literary theory unlike any other Ten Lessons in Theory engages its readers with three fundamental premises The first premise is that a genuinely productive understanding of theory depends upon a considerably more sustained encounter with the foundational writings of Hegel Marx Nietzsche and Freud than any reader is likely to get from the introductions to theory that are currently available The second premise involves what Fredric Jameson describes as the conviction that of all the writing called theoretical Lacan's is the richest Entertaining this conviction the book pays more and more careful attention to the richness of Lacan's writing than does any other introduction to literary theory The third and most distinctive premise of the book is that literary theory isn't simply theory about literature but that theory fundamentally is literature after all Ten Lessons in Theory argues and even demonstrates that theoretical writing is nothing if not a specific genre of creative writing a particular way of engaging in the art of the sentence the art of making sentences that make trouble sentences that make or desire to make radical changes in the very fabric of social reality As its title indicates the book proceeds in the form of ten lessons each based on an axiomatic sentence selected from the canon of theoretical writing Each lesson works by creatively unpacking its featured sentence and exploring the sentence's conditions of possibility and most radical implications In the course of exploring the conditions and consequences of these troubling sentences the ten lessons work and play together to articulate the most basic assumptions and motivations supporting theoretical writing from its earliest stirrings to its most current turbulences Provided in each lesson is a working glossary specific critical keywords are boldfaced on their first appearance and defined either in the text or in a footnote But while each lesson constitutes a precise explication of the working terms and core tenets of theoretical writing each also attempts to exemplify theory as a practice of creativity Foucault in itself
