into happiness **The Depths** Jonathan Rottenberg, 2014-02-11 Nearly every depressed person is assured by doctors well meaning friends and family the media and ubiquitous advertisements that the underlying problem is a chemical imbalance Such a simple defect should be fixable yet despite all of the resources that have been devoted to finding a pharmacological solution depression remains stubbornly widespread Why are we losing this fight In this humane and illuminating challenge to defect models of depression psychologist Jonathan Rottenberg argues that depression is a particularly severe outgrowth of our natural capacity for emotion In other words it is a low mood gone haywire Drawing on recent developments in the science of mood and his own harrowing depressive experience as a young adult Rottenberg explains depression in evolutionary terms showing how its dark pull arises from adaptations that evolved to help our ancestors ensure their survival Moods high and low evolved to compel us to more efficiently pursue rewards While this worked for our ancestors our modern environment in which daily survival is no longer a sole focus makes it all too easy for low mood to slide into severe long lasting depression Weaving together experimental and epidemiological research clinical observations and the voices of individuals who have struggled with depression *The Depths* offers a bold new account of why depression endures and makes a strong case for de stigmatizing this increasingly common condition In so doing Rottenberg offers hope in the form of his own and other patients recovery and points the way towards new paths for treatment *Depression* Charles

Foster, Jonathan Herring, 2017-08-25 Depression is amorphous It defies easy generalization and eludes medical and legal categories Is it part of the self or its predator Can a sufferer be held responsible for their actions This edited collection provides a holistic study of a protean illness If the law is to regulate the lives of those who suffer from depression it is vital that lawyers understand the condition Drawing upon a wide ranging expertise this volume looks at depression from four viewpoints that of the sufferer the clinician the ethicist and the lawyer Topics covered include the cultural history of depression causes epidemiology and diagnosis the autonomy debate criminal responsibility public health law depression in the workplace depression and children and assisted suicide First hand accounts from sufferers are followed by contributions from clinicians who say what depression is outline its demography and therapeutic options and indicate the legal and ethical problems that trouble them the most The essays then go on to explore legal and ethical questions in depth This collection is essential reading for lawyers seeking a broader understanding of depression and non lawyers seeking an insight into the difficulty law has engaging with the condition **Conversations in Critical Psychiatry** Awais Aftab, 2024-08-25

Conversations in Critical Psychiatry brings together an edited selection of interviews published in the *Psychiatric Times* from 2019 to 2022 updated with new and previously unpublished material These interviews explore critical and philosophical perspectives in psychiatry by engaging with prominent commentators within and outside the profession who have made meaningful criticisms of the status quo These conversations advance our understanding of psychopathology and offer a pluralistic vision of psychiatric practice The series includes interviews with many leading scholars such as Allen Frances

Anne Harrington Paul McHugh Nassir Ghaemi Dainius P ras Joanna Moncrieff Jonathan Shedler Sanneke de Haan Nev Jones and Kenneth Kendler among others The discussions cover a wide array of philosophical clinical and scientific topics and present a sweeping overview of psychiatry's relationship to critique A detailed introductory essay Psychiatry and the Critical Landscape offers a synthesis of themes and makes the case for mainstream psychiatry to embrace the critical tradition while urging critical psychiatry to engage with a philosophically informed view of psychiatric science Given the accessible and rigorous nature of these conversations this book will be of interest to academics clinicians students service users and general readers alike

psychiatric conditions required by the trainee psychiatrist Throughout the authors emphasize the basic clinical skills required for full assessment and understanding of the patient Discussion of treatment includes not only scientific evidence but also practical problems in the management of patients in a family and social context Full attention to ethical and legal issues is given within the evidence based approach to practice provided in the text Introductory chapters focus on recognition of signs and symptoms classification and diagnosis psychiatric assessment and aetiology Further chapters deal with all the major psychiatric syndromes as well as providing detailed coverage of pharmacological and psychological treatments The book gives equal prominence to ICD and DSM classifications often with direct comparisons making the book relevant to the practice of psychiatry throughout the world Boasting greater use of summary boxes tables and lists within a new modern design the Shorter Oxford Textbook of Psychiatry remains the most up to date secondary level textbook of psychiatry available The extensive bibliography has been brought up to date and there are targeted reading lists for each chapter The Shorter Oxford Textbook of Psychiatry fulfils all the study and revision needs of psychiatric trainees but will also prove useful to medical students GPs qualified psychiatrists and those in related fields who need to be kept informed with current psychiatric practice

Lost Connections Johann Hari, 2018-01-23 The New York Times bestseller from the author of Chasing the Scream offering a radical new way of thinking about depression and anxiety What really causes depression and anxiety and how can we really solve them Award winning journalist Johann Hari suffered from depression since he was a child and started taking antidepressants when he was a teenager He was told that his problems were caused by a chemical imbalance in his brain As an adult trained in the social sciences he began to investigate whether this was true and he learned that almost everything we have been told about depression and anxiety is wrong Across the world Hari found social scientists who were uncovering evidence that depression and anxiety are not caused by a chemical imbalance in our brains In fact they are largely caused by key problems with the way we live today Hari's journey took him from a mind blowing series of experiments in Baltimore to an Amish community in Indiana to an uprising in Berlin Once he had uncovered nine real causes of depression and anxiety they led him to scientists who are discovering seven very different solutions ones that work It is an epic journey that will change how we think about one of the biggest crises in our culture today His TED talk Everything You Think You Know About Addiction Is Wrong has been viewed more than eight million times and revolutionized the global debate This book will do the same

Mind-Society Paul Thagard, 2019-01-30 How do minds make societies and how do societies change Paul Thagard systematically connects neural and psychological explanations of mind with major social sciences social psychology sociology politics economics anthropology and history and professions medicine law education engineering and business Social change emerges from interacting social and mental mechanisms Many economists and political scientists assume that individuals make rational choices despite the abundance of evidence that people frequently succumb to thinking errors such as motivated inference Much of sociology and anthropology is taken over with

postmodernist assumptions that everything is constructed on the basis of social relations such as power with no inkling that these relations are mediated by how people think about each other Mind Society displays the interdependence of the cognitive and social sciences by describing the interconnections among mental and social mechanisms which interact to generate social changes ranging from marriage patterns to wars Validation comes from detailed studies of important social changes from norms about romantic relationships to economic practices political institutions religious customs and international relations This book belongs to a trio that includes Brain Mind From Neurons to Consciousness and Creativity and Natural Philosophy From Social Brains to Knowledge Reality Morality and Beauty They can be read independently but together they make up a Treatise on Mind and Society that provides a unified and comprehensive treatment of the cognitive sciences social sciences professions and humanities
