No Nails No Lumber The Bubble Houses Of Wallace Neff:

No Nails, No Lumber Jeffrey Head, 2012-08-10 Imagine a house constructed in less than forty eight hours without using lumber or nails that is more resistant to fire earthquakes and hurricanes than any traditionally built structure This may sound like the latest development in prefab housing or green architecture but the design dates back to 1941 when architect Wallace Neff 1895 1982 developed Airform construction as a solution to the global housing crisis Best known for his elegant Spanish Colonial revival estates in Southern California Neff had a private passion for his dome shaped bubble houses made of reinforced concrete cast in position over an inflatable balloon No Nails No Lumber shows the beauty and versatility of Neff's design in new and vintage photography previously unpublished illustrations and archival material and ephemera

Proceedings of the First Conference of the Construction History Society James Campbell, Nicholas Bill, Karey Draper, Patrick Fleming, Yiting Pan, Wendy Andrews, 2014 The proceedings of the first conference of the Construction History Society which took place on 11 and 12 April 2014 at Queens College Cambridge featuring 48 peer reviewed papers covering a wide variety of subjects on the theme of construction history A Topology of Everyday Constellations Georges Teyssot, 2013-02-22 The threshold as both boundary and bridge investigations of spaces public and private local and global Today spaces no longer represent a bourgeois haven nor are they the sites of a classical harmony between work and leisure private and public the local and the global The house is not merely a home but a position for negotiations with multiple spheres the technological as well as the physical and the psychological In A Topology of Everyday Constellations Georges Teyssot considers the intrusion of the public sphere into private space and the blurring of notions of interior privacy and intimacy in our societies He proposes that we rethink design in terms of a new definition of the practices of everyday life Teyssot considers the door the window the mirror and the screen as thresholds or interstitial spaces that divide the world in two the outside and the inside Thresholds he suggests work both as markers of boundaries and as bridges to the exterior The stark choice between boundary and bridge creates a middle space an in between that holds the possibility of exchanges and encounters If the threshold no longer separates public from private and if we can no longer think of the house as a bastion of privacy Teyssot asks does the body still inhabit the house or does the house evolving into a series of microdevices inhabit the body *Architecture Beyond the Cupola* Alberto Pugnale, Alberto Bologna, 2023-05-24 This book reviews Dante Bini's inventions and designs focusing on his form resistant Binishell and other pneumatic construction systems Dante Bini's double profile of architect and builder underpins the narrative of the entire book It is used to analyse the evolution of the early reinforced concrete Binishell patent into a variety of automated construction systems based on the use of air Dante Bini has always been quite proactive in promoting his work and disseminating the results of his experimentations and achievements via journal articles conference presentations and public talks promotional brochures in multiple languages were also prepared to export and license his patents in various countries from Italy to the Americas and Australia Despite this a

rigorous study of Dante Bini's work is still unavailable and the relevance of this figure to contemporary architecture has yet to be discussed comprehensively. This book fills in this gap and arrives at the right time during the last two decades there has been an exponential interest in shell and spatial structures particularly concerning the use of complex geometries and innovative construction techniques. This book will be of interest to academics in architectural design theory and construction history and practitioners and students interested in expanding their knowledge in the design and construction of shell and spatial structures.

Flexible Forming for Fluid Architecture Arno Pronk, 2021-10-11. This book on flexible formwork for fluid architecture is a multi-faceted research that covers a broad field from design to material and technology and from history to future developments. It offers a pragmatic approach that can be extended with more cases, materials, techniques and methods for fluid architecture and provides a better understanding of the main aspects of fluid architecture and to help them find the most suitable combinations of all aspects. The book is a challenging experience with many new discoveries including two patents: one on moulding of fluid surfaces and one on 3D printing of fibre-reinforced ice. It also features two world records: the largest span 30 meters and the highest thin shell structure 30.5 meters in ice as well as a method for the construction of a fully laminated shell structure in insulated glass.

Maisons-bulles Raphaëlle Saint-Pierre, 2015. Le fonctionnalisme triomphant de l'après-guerre a suscité une multitude de réactions et de propositions destinées à promouvoir une architecture plus humaine ou plus sensuelle. Prolongeant le constat de Gaston Bachelard selon lequel l'homme, l'animal, l'amande tous trouvent le repos maximum dans une coquille, plusieurs architectes installés en France ont simultanément dès la fin des années 1950 des recherches sur le voile de béton, une technique souple qui offre une immense liberté d'expression. Leurs expérimentations principalement sur le programme de la maison individuelle conduisent des créations organiques dont le biomorphisme suppose un nouveau mode d'habiter, une nouvelle poétique de l'espace. C'est un corpus fascinant et en grande partie méconnu que révèle ce premier Carnet d'architecture travers les travaux de Pascal Husermann et Claude Costy. Jean-Louis Chanac, Jacques Coulle, Antti Lovag, Pierre Székely et Henri Mouette. Page 4 de la couverture.
