Counihan, Steven L. Kaplan, 2003-09-02 This volume examines among other things the significance of food centered activities to gender relations and the construction of gendered identities across cultures It considers how each gender's relationship to food may facilitate mutual respect or produce gender hierarchy This relationship is considered through two central questions How does control of food production distribution and consumption contribute to men's and women's power and social position and How does food symbolically connote maleness and femaleness and establish the social value of men and women Other issues discussed include men's and women's attitudes towards their bodies and the legitimacy of their appetites **Epiphany in the Wilderness** Karen R. Jones, 2016-01-02 Whether fulfilling subsistence needs or featured in stories of grand adventure hunting loomed large in the material and the imagined landscape of the nineteenth century West Epiphany in the Wilderness explores the social political economic and environmental dynamics of hunting on the frontier in three acts using performance as a trail guide and focusing on the production of a cultural ecology of the chase in literature art photography and taxidermy Using the metaphor of the theater Jones argues that the West was a crucial stage that framed the performance of the American character as an independent resourceful resilient and rugged individual The leading actor

was the all conquering masculine hunter hero the sharpshooting man of the wilderness who tamed and claimed the West with each provident step Women were also a significant part of the story treading the game trails as plucky adventurers and resilient homesteaders and acting out their exploits in autobiographical accounts and stage shows Epiphany in the Wilderness informs various academic debates surrounding the frontier period including the construction of nature as a site of personal challenge gun culture gender adaptations and the crafting of the masculine wilderness hero figure wildlife management and consumption memorializing and trophy taking and the juxtaposition of a closing frontier with an emerging conservation movement

The Frontiers of Women's Writing Brigitte Georgi-Findlay, 2022-05-10 Although the myth of the American frontier is largely the product of writings by men a substantial body of writings by women exists that casts the era of western expansion in a different light In this study of American women's writings about the West between 1830 and 1930 a European scholar provides a reconstruction and new vision of frontier narrative from a perspective that has frequently been overlooked or taken for granted in discussions of the frontier Brigitte Georgi Findlay presents a range of writings that reflects the diversity of the western experience Beginning with the narratives of Caroline Kirkland and other women of the early frontier she reviews the diaries of the overland trails letters and journals of the wives of army officers during the Indian wars professional writings focusing largely on travel by women such as Caroline Leighton from the regional publishing cultures that emerged in the Far West during the last quarter of the century and late nineteenth and early twentieth century accounts of missionaries and teachers on Indian reservations Most of the writers were white literate women who asserted their own kind of cultural authority over the lands and people they encountered Their accounts are not only set in relation to a masculine frontier myth but also investigated for clues about their own involvement with territorial expansion By exploring the various ways in which women writers actively contributed to and at times rejected the development of a national narrative of territorial expansion based on empire building and colonization the author shows how their accounts are implicated in expansionist processes at the same time that they formulate positions of innocence and detachment Georgi Findlay has drawn on American studies scholarship feminist criticism and studies of colonial discourse to examine the strategies of women's representation in writing about the West in ways that most theorists have not She critiques generally accepted stereotypes and assumptions both about women's writing and its difference of view in particular and about frontier discourse and the rhetoric of westward expansion in general as she offers a significant contribution to literary studies of the West that will challenge scholars across a wide range of disciplines
