Passion Craft And Method In Comparative Politics:

Passion, Craft, and Method in Comparative Politics Gerardo L. Munck, Richard Snyder, 2007-07-02 In the first collection of interviews with the most prominent scholars in comparative politics since World War II Gerardo L. Munck and Richard Snyder trace key developments in the field during the twentieth century. Organized around a broad set of themes: intellectual formation and training; major works and ideas; the craft and tools of research; colleagues, collaborators, and students; and the past and future of comparative politics, these in-depth interviews offer unique and candid reflections that bring the research process to life and shed light on the human dimension of scholarship. Giving voice to scholars who practice their craft in different ways yet share a passion for knowledge about global politics, *Passion, Craft, and Method in Comparative Politics* offers a wealth of insights into contemporary debates about the state of knowledge in comparative politics and the future of the field. *Reseña de "Passion, Craft and Method in Comparative Politics" de Gerardo L. Mixed Methods in Comparative Politics D. Berg-Schlosser, 2012-09-26 This book approaches current controversies concerning qualitative and quantitative procedures in the social sciences and incorporates new methods showing how they can supplement each other. It is based on a comprehensive international research project that readers can apply to their findings through the data set provided on the author's home page. Regimes and Democracy in Latin America, 2007-05-10 This volume focuses on democracy in Latin America and both assesses the state of current knowledge on the topic and identifies new research frontiers in the study of Latin American politics. It provides an overview of research agendas and strategies used in the literature over the past four decades. It tackles a series of central questions: What is democracy? Is democracy an absolute value? Are current conceptualizations of democracy adequate? How and why does democracy work or fail in Latin America and spells out the implications of answers to these questions for current research agendas. It distinguishes between qualitative and quantitative approaches to the conceptualization and measurement of democracy and presents a dataset on political regimes and democracy that illustrates how the differences between these two standard approaches might be overcome. Finally, it evaluates the strengths and weaknesses of conventional methods used to generate and test explanations of the causes and consequences of democracy and proposes alternative ways to advance ongoing substantive debates given the current state of theory and data. The contributors are scholars from the United States and Latin America who are experts on Latin America and who have established reputations as theorists and methodologists. The volume will be of interest to readers seeking to understand debates about democracy in developing societies and to grasp the concepts, theories, and methods that are currently being developed to study Latin American politics. **Democratic Theory**

and Causal Methodology in Comparative Politics Mark I. Lichbach, 2013-08-06 Barrington Moore bequeathed comparativists a problem how to reconcile his causal claim of no bourgeoisie no democracy with his normative dream of a free and rational society Lichbach harmonizes causal methodology and normative democratic theory illustrating their interrelationship Using a dialogue among four specific texts Lichbach advances five constructive themes First comparativists should study the causal agency of individuals groups and democracies Second three types of collective agency should be paired with an exploration of three corresponding moral dilemmas ought is freedom power and democracy causality Third at the center of inquiry comparativists should place big P Paradigms and big M Methodology Fourth as they play with research schools creatively combining prescriptive and descriptive approaches to democratization they should encourage a mixed theory and mixed method field Finally comparativists should study pragmatic questions about political power and democratic performance in building a democratic state which democracy under which conditions is best and how might it be achieved
