Passport To The Cosmos:

Passport to the Cosmos John E. Mack, 2000-11-07 In his groundbreaking follow up to the bestselling Abduction Pulitzer Prize winner John E Mack powerfully demonstrates how the alien abduction phenomenon calls for a revolutionary new way of examining the nature of reality and our place in the cosmos Harvard professor Mack stunned the world when he published the astonishing results of his extensive research involving clients who claimed they had had encounters with alien life forms Writing with the authority and insight that have marked his distinguished career as a psychiatrist and writer Mack used the remarkable stories to show how the abduction phenomenon has the vast potential to transform the foundation of human thought In *Passport to the Cosmos* Mack who has done additional research with abductees in the United States and around the world provocatively asserts that this phenomenon is part of a new age in human consciousness a time in which we must be willing to embrace the idea that alien visitation is real on some level Drawing on the rich tradition of non Western and indigenous cultures which are more accepting of the idea that we live in a multidimensional universe Mack persuasively shows that by broadening our definition of what is real we can begin to explore a phenomenon that has deep and lasting implications for humanity In *Passport to the Cosmos* John Mack further solidifies his reputation as a brave pioneer on the forefront of the science of human experience with an authoritative voice that takes us into the twenty first century **Third**

goal of the aliens among us is not the study of Earth for purely academic purposes It is something more vital to the aliens and more portentous for us The picture that emerges from much research makes sense of several aspects of the alien presence previously quite puzzling They apparently are a dying race inhabiting a dying planet They have undoubtedly mastered physical forces and phenomena of which we have not even dreamed But it has come at a terrible cost Their emotional life has

been all but lost existing only as a faint remnant from a long distant past They may pity our hopelessly primitive technology but they envy us our robust emotional life Like all living things everywhere they live for the perpetuation of their genes They do not hate us nor do they seek our destruction They seek to create a race of hybrids combining their scientifically superior minds with our rich emotional makeup The ridicule of the entire subject by the government and other forces fearful of upheaval in our society has aggravated the suffering of those chosen and victimized by the aliens who apparently seek ineptly sometimes to minimize it The author combines this scholarly approach with an almost folksy narrative style to make Walking Through Walls a very readable and approachable treatise on the phenomena as good as any book on the subject and far more skillfully written than most including those Brener has referenced most frequently Bud Hopkins Intruders and Philip Corso s The Day after Roswell Blue Ink Review Alien Dawn Colin Wilson,2010-09-08 In this classic book on UFOs bestselling author Colin Wilson a renowned authority on the paranormal examines the evidence and develops a definitive theory of the alien contact phenomenon Alien Dawn covers Wilson s investigation into documented evidence of strange and unexplained phenomena including UFOs poltergeists ancient folklore time slips out of body experiences mystical awareness and psychic travel to other worlds The result a fascinating and encyclopedic study of the complex nature of reality This is one of the most comprehensive explorations of the subject undertaken with conclusions sure to shock the reader whether believer or skeptic Features a new introduction by the author **Visionary** Graham Hancock,2022-04-04 The latest archaeology and history redefining book from bestselling author Graham Hancock Fingerprints of the Gods who is featured in Ancient Apocalypse a hit Netflix original docuseries With the original unabridged text of Supernatural I offer the reader an investigation that explores the human experience with psychedelics from the Stone Age to the Space Age and the role of these extraordinary plant medicines as tools to investigate the nature of reality itself Graham Hancock Discover the pathway to the gods Less than 50 000 years ago mankind had no art no religion no sophisticated symbolism no innovative thinking Then in a dramatic and electrifying change described by scientists as the greatest riddle in human history all the skills and qualities that we value most highly in ourselves appeared already fully formed as though bestowed on us by hidden powers In Visionary Graham Hancock sets out to investigate this mysterious before and after moment and to discover the truth about the influences that gave birth to modern human mind His quest takes him on a journey of adventure and detection from the stunningly beautiful painted caves of prehistoric France Spain and Italy to remote rock shelters in the mountains of South Africa where he finds a treasure trove of extraordinary Stone Age art Hancock uncovers clues that lead him to travel to the depths of the Amazon rainforest to drink the powerful plant hallucinogen ayahuasca with Indian shamans whose paintings contain images of supernatural beings identical to the animal human hybrids depicted in prehistoric caves and rock shelters Hallucinogens such as mescaline also produce visionary encounters with exactly the same beings Scientists at the cutting edge of consciousness research have begun to consider the possibility that such hallucinations may be real perceptions of

other dimensions Could the supernaturals first depicted in the painted caves and rock shelters be the ancient teachers of mankind Could it be that human evolution is not just the blind meaningless process that Darwin identified but something more purposive and intelligent something that we have barely even begun to understand Previously published as Supernatural this definitive edition includes a new Introduction by Graham Hancock as well as restored chapters that were omitted from the original paperback release

The Believer Ralph Blumenthal, 2021-03-15 The Believer is the weird and chilling true story of Dr John Mack This eminent Harvard psychiatrist and Pulitzer Prize winning biographer risked his career to investigate the phenomenon of human encounters with aliens and to give credibility to the stupefying tales shared by people who were utterly convinced they had happened Nothing in Mack s four decades of psychiatry had prepared him for the otherworldly accounts of a cross section of humanity including young children who reported being taken against their wills by alien beings Over the course of his career his interest in alien abduction grew from curiosity to wonder ultimately developing into a limitless unwavering passion Based on exclusive access to Mack s archives journals and psychiatric notes and interviews with his family and closest associates The Believer reveals the life and work of a man who explored the deepest of scientific conundrums and further leads us to the hidden dimensions and alternate realities that captivated Mack until the end of his life

THE UFOLOGY BUILDING Diego Kurilo, Of all the

possible and probable stories those of spaceship travel and more if they are driven by beings from other civilizations are among the most fascinating stories there are an infinite number of colors of human psychology to approach all these stories that the person believes or needs to believe in his or her own psychology and frame of mind These kinds of experiences of contact with without programming abductions or even entering an ET type ship consciously create in consciousness a multiplicity of symbols that the person contacted will spend their whole life trying to decipher as if in an enigma Any analysis of the chaotic set of ufology would be to establish a corpus of analysis that contains elements or components that range from religious psychic and even parapsychological elements as well as in some cases of telekinesis to premonitory dreams With this deductive line we can establish that the phenomenon is at the limit of reality and that it is very difficult to establish laws or a certain rational compass Page 10 de 248 The Ufology Building to determine if these stories or ufological evidence are markers of reality if they are they would be of a vast reality far from what we consider ordinary time and space

The Hidden Universe Anthony Peake, 2019-12-10 From aliens or ghosts to the djinn electric voice phenomenon and UFO abductions this book is the most comprehensive and enlightening survey ever made of encounters with the Others Since our very beginnings human beings from all civilisations across the globe have encountered the Others intelligent self-motivated beings that are clearly

not human in their origins This book offers the most comprehensive survey ever made of such otherworldly visitors from gods angels demons and djinns to hobgoblins poltergeists and ghosts to UFOs and aliens In addition to fully detailing the history of these encounters the book attempts a bold explanation never before undertaken of the true nature of these beings The book will explore the increasingly frequent entheogen encounters facilitated by substances such as dimethyltryptamine ayahuasca 5 Meo DMT and LSD as well as the beings encountered by individuals suffering from Alzheimer s related Charles Bonnet Syndrome young children s non corporeal companions and the seemingly independent beings met during lucid dreaming and near death and out of body experiences This book continues Anthony Peake s work in developing a completely original model of reality based upon an amalgamation of ancient belief systems subjective human experiences of the extraordinary and the latest discoveries of neurology neurochemistry quantum mechanics and cosmology This model proposes that consciousness far from being simply an accident of evolution is the actual root source of the material universe It suggests that at its most basic level everything that is seemingly physical is rendered into existence by consciousness *Alien Chic* Neil

Badmington,2004-08-13 *Alien Chic* provides a cultural history of the alien since the 1950s asking ourselves why our attitudes to aliens have shifted from fear to affection and what this can tell us about how we now see ourselves and others Neil Badmington explores our relationship with aliens inscribed in films such as *The War of the Worlds* *Mars Attacks* *Mission to Mars* and *Independence Day* and how thinkers such as Descartes Barthes Freud Lyotard and Derrida have conceptualised what it means to be human and post human *Alien Chic* examines the the concept of posthumanism in an age when the lines between what is human and what is non human are increasingly blurred by advances in science and technology for example genetic cloning and engineering and the development of AI and cyborgs Questioning whether our current embracing of all things alien in the form of extraterrestrial gadgets or abduction narratives for instance stems from a desire to reaffirm ourselves as human this is an original and thought provoking contribution to the study of posthumanism **Death by**
