

Together with the Inventory module, the Bill of Materials module gives you access to two related functions, Bill of Materials and Kit Item Codes, which allow you to group multiple inventory items into another item or on an invoice.

- **Bills of Materials** allows you to build, assemble, or manufacture any inventory item using other inventory items as parts or components.
- **Kit Item Codes** allows you to specify one code on an invoice, and the system leads multiple invoice lines that can include inventory items and remarks lines.

- You can specify a recipe for pizzas, which would consist of the dough, cheese, tomato paste etc. You then specify the quantity of each of the components that is required to make one pizza. When you manufacture, you specify how many pizzas you are making. The system removes the requisite quantity from each component item and creates the specified number of pizza items.
- You specify how to assemble a computer, which consists of a motherboard, screen, keyboard, memory, etc. You can use service items that have costs to represent labour and other costs, or you can use three additional manufacturing costs that you link to General Ledger codes.
