From Reversal of Fortune to Economic Resurgence Banji Oyelaran-Oyeyinka,Oyebanke Abejirin,2024-11-05 This book examines Nigeria Africa s largest economy and most populous country and Asia in comparative development and sectoral perspectives We traced the divergent growth in wealth between the two regions It takes a novel approach of matching key growth sectors across five selected Asian countries and Nigeria in a cross regional context We found that state and institutional capabilities underlying the generation and diffusion of industrial and technological knowledge in Asia distinguished it from Africa We employ quantitative and qualitative methods including case studies and statistical

econometric methods to analyze factors that separate the sample countries that made rapid economic progress in catching up and those that tend to be stagnating and falling behind Progress made by Asian countries over the last five decades was due in large part to their pursuit of industrialization technological acquisition underpinned by leadership good governance and policies in the right institutional contexts The four Asian countries compared with Nigeria are Indonesia Malaysia South Korea Vietnam and Bangladesh There was not one grand development formula however the strategy broadly consisted of industrial vertical diversification as well as horizontal diversification in agriculture Building industrial capabilities that enable export competitiveness was critical Again while leadership is not usually included in factors of growth the book devotes a chapter to Leadership and Industrialization and another to State Capacity Industrialization and Economic Growth African countries on the contrary took the low road in exporting minerals and raw agricultural commodities with little value addition in the process Africa experienced a reversal of fortune The African condition is manifestly a Reversal of Fortune because in the 1950s they were ahead of or equal to Asia in per capita income as well as in other development metrics We carried out empirical measurement of Reversal of Fortune manifested in economic social technological and industrial conditions by analyzing the disparities in development metrics particularly the levels and rates of growth of national incomes industrialization rates and Human Development Index HDI The differences are stark **Starborn Code** Dan
