Galt, Galt, 2012-02-20 Patient centered care is at the heart of today's pharmacy practice and ASHP's Patient Centered Care for Pharmacists gets to the heart of the subject. Formerly *Developing Clinical Practice Skills for Pharmacists*, this revised resource has been redeveloped to compliment the changing emphasis in pharmacy practice to patient centered care and the contemporary context of healthcare delivery. To understand and treat the whole person and learn to use a realistic approach to time and resources, students must connect their drug science knowledge to actual practice. The expanded role of pharmacists uplifts them to patient care from dispensing and manufacturing or marketing of drugs. Along with doctors and allied health professionals, pharmacists are increasingly recognized as an integral part of the patient care team. Furthermore, colleges of pharmacy need to revise and update their curricula to accommodate the progressively increasing development in the pharmaceutical education and the evolving new roles of practicing pharmacists in patient care settings. This book focuses on the expanded role of the pharmacists in total patient care, including prescribing, dispensing, compounding, administering, and monitoring of drugs at home, hospital, community, hospice, critical care, changeover, and other care settings. The sector is emerging in both developed and under developed countries. Overburdened by patient loads and the explosion of new drugs, physicians turned to pharmacists more and more for drug information, especially within institutional settings. And today's patient care

pharmacists are taking more interests in medication review and reconciliation patient education and counseling creating drug therapy regimen and monitoring compliance The purpose of this book is to guide the pharmacists in their daily interactions with patients and to ensure collaboration with other health professionals The contents are mostly based on recently published articles related to patient care with most recent ideas and activities followed by the patient care pharmacists around the globe However a pharmacist implements the care plan in collaboration with other health care professionals and the patient or caregiver Along with professional guidelines the book discusses the concepts and best practices of patient interaction patient rights and ethical decision making for the professional pharmacist apprentice and student In every chapter the role of pharmacists in that chapter specific issues are detailed explicitly so that a professional pharmacist or a student can figure out his or her do s and don ts in that specific situation Moreover further reading references are listed as future recommendations So the book is an archive of potential references too Among so many books about patient care either doctors or nurses roles are highlighted The proposed book highlights the pharmacists roles and responsibilities to the most separated from those of doctors and nurses with the most recent information obtained from most publications in several journals books bulletins newsletter magazines etc
