

Implementing the Emergency Department Safety Checklist

West of England
Patient Safety
Collaborative

Introduction

Acknowledgements

This toolkit has been based on the ED Safety Checklist and Key Performance Indicators developed and tested by University Hospitals Bristol NHS Foundation Trust (UH Bristol) and the West of England Patient Safety Collaborative.

We would like to thank the team at UH Bristol for their work in the development of this project.

The UH Bristol pilot scheme was funded by the Health Foundation SHINE Innovation programme.

NIHR | Applied Research Collaboration West

NIHR CLAHRC West, now recommissioned as the NIHR Applied Research Collaboration West (ARC West), have completed an independent evaluation of the ED checklist. This toolkit has been updated in August 2019 to incorporate

Adoption and spread

The safety checklist has been adopted by all six hospital trusts and the ambulance service in the West of England, who comprise the Emergency Department Collaborative:

- University Hospitals Bristol NHS Foundation Trust
- North Bristol NHS Trust
- Royal United Hospitals Bath NHS Foundation Trust
- Great Western Hospitals NHS Foundation Trust
- Gloucestershire Hospitals NHS Foundation Trust
- Western Area Health NHS Trust
- South Western Ambulance Service NHS Foundation Trust

Roll out to these other Emergency Departments was financially supported by the West of England Patient Safety Collaborative.

The ED Safety Checklist won **Best Patient Safety Initiative in A&E** award at the 2017 Patient Safety Awards.

The judges felt that this entry had a significant impact on patient safety in period of crowding in ED. It has already spread across multiple organisations and using established tools has potential for wider spread across the UK.

Medical Errors and Patient Safety Jay Kalra, 2011-05-26 Is the reporting of medical errors changing This book shows with real cases from health care and beyond that most errors come from flaws in the system It also shows why they don't get

reported and how medical error disclosure around the world is shifting away from blaming people to a no fault model that seeks to improve the whole system of care The book intends to provide an introduction to medical errors that result in preventable adverse events It will examine issues that stymie efforts made to reduce preventable adverse events and medical errors and will moreover highlight their impact on clinical laboratories and other areas including educational bioethical and regulatory issues Varying error rates of 0.1-9.3% in clinical diagnostic laboratories have been reported in the literature While it is suggested that fewer errors occur in the laboratory than in other hospital settings the quantum of laboratory tests used in healthcare entails that even a small error rate may reflect a large number of errors The interdependence of surgical specialties emergency rooms and intensive care units all of which are prone to higher rates of medical errors with clinical diagnostic laboratories entails that reducing error rates in laboratories is essential to ensuring patient safety in other critical areas of healthcare The author maintains that many such errors are preventable provided that appropriate attention is paid to systemic factors involved in laboratory errors This book identifies possible intelligent system approaches that can be adopted to help control and eliminate these errors It is a valuable tool for physicians clinical biochemists research scientists laboratory technologists and anyone interested in reducing adverse events at all levels of healthcare processes
