The Oxford Handbook of Cities in World History Peter Clark, 2013-02-14 In 2008 for the first time the majority of the planet's inhabitants lived in cities and towns Becoming globally urban has been one of mankind's greatest collective achievements over time and raises many questions How did global city systems evolve and interact in the past How have historic urban patterns impacted on those of the contemporary world And what were the key drivers in the roller coaster of urban change over the millennia market forces such as trade and industry rulers and governments competition and collaboration between cities or the urban environment and demographic forces This pioneering comparative work by leading scholars drawn from a range of disciplines offers the first detailed comparative study of urban development from ancient times to the present day The Oxford Handbook of Cities in World History explores not only the main trends in the growth of cities and towns across the world in Asia and the Middle East Europe Africa and the Americas and the different types of cities from great metropolitan centres to suburbs colonial cities and market towns but also many of the essential themes in the making and remaking of the urban world the role of power economic development migration social inequality environmental challenge and the urban response religion and representation cinema and urban creativity Split into three parts covering Ancient cities the medieval and early modern period and the modern and contemporary era it begins with an introduction by the editor identifying the importance and challenges of research on cities in world history as well as the crucial outlines of urban development since the earliest cities in ancient Mesopotamia to the present

Urban Growth in Ethiopia, 1887-1974 Getahun Benti, 2016-12-20 This book highlights the positive achievements that Imperial Ethiopia made in its journey towards urbanization into the modern era and undertakes a critical assessment of the economic political and social impediments that prevented the country from transitioning into a truly fully fledged modern urbanization It provides a comprehensive history of the growth of towns between 1887 and 1974 It is organized chronologically regionally and thematically divided into three distinct time periods during which Ethiopian towns saw progresses and exposures to limited modern urban features First during 1887-1936 the country saw the creation and growth of a national capital 1887 that coordinated the country's economic and political activities and facilitated the growth of other towns in the empire It introduced new towns the railway modern schools and health centers Rudimentary factories were established in Addis Ababa and Dire Dawa along with motor cars and modern roads which increased trade between cities The next era was the Italian occupation from 1936-1941 which shook the pre-existing process of urban growth by introducing a modern European style

urbanization system Ethiopian cities saw a qualitatively different way of urban growth in both form and content The Italians introduced modern economic and physical planning administration and internal organization People were introduced to modern life in urban areas exposed to modern wage labor system and thus moved to towns to take advantage of the opportunity The Italian occupation left behind many features of modern urbanization and this influenced population exposed to modern consumptive tastes was determined to retain what the Italians introduced Finally the post Italian period saw a new era of urban growth Due to economic and organizational problems resulting from destructions caused by the war the process of urban growth was slowed down in the early 1940s Although the government did not introduce a clear urban policy in the immediate aftermath of the Second World War towns continued to grow progressively from the early 1950s to 1974

Resources in Education ,1998 *Studies in World History Volume 2 (Student)* James P. A. Bayly,Walter Scheidel,2020-12-02 This is the first world history of empire reaching from the third millennium BCE to the present By combining synthetic surveys thematic comparative essays and numerous chapters on specific empires its two volumes provide unparalleled coverage of imperialism throughout history and across continents from Asia to Europe and from Africa to the Americas Only a few decades ago empire was believed to be a thing of the past now it is clear that it has been and remains one of the most enduring forms of political organization and power We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods such as the relatively short age of European colonialism The history of empire as these volumes amply demonstrate needs to be drawn on the much broader canvas of global history Volume Two The History of Empires tracks the protean history of political domination from the very beginnings of state formation in the Bronze Age up to the present Case studies deal with the full range of the historical experience of empire from the realms of the Achaemenids and Asoka to the empires of Mali and Songhay and from ancient Rome and China to the Mughals American settler colonialism and the Soviet Union Forty five chapters detailing the history of individual empires are tied together by a set of global synthesizing surveys that structure the

world history of empire into eight chronological phases *The Cambridge World History of Slavery* David Eltis, Stanley L. Engerman, Keith R. Bradley, Paul Cartledge, Seymour Drescher, 2011 This volume surveys the history of slavery in the ancient Mediterranean world concentrating particularly on the societies of ancient Greece and Rome The Comical Doctrine Rosalind Selby, 2006-10-01 In this wide ranging study Rosalind Selby explores the hermeneutical implications of a Barthian epistemology in which givenness of knowledge talk of God and Scripture and the Church is paramount From this she seeks to develop a hermeneutics of service that challenges both liberal and fundamentalist approaches to theological language and biblical interpretation Selby tackles the issues of knowledge and especially knowledge of God the language used to communicate that knowledge and that language as Scriptural textuality Barth wrote of the comical doctrine that the true exegete has no presuppositions In fact he said no one reads the bible directly we all read it through spectacles In the train of his insight Selby examines the role of community as a prerequisite for knowledge and truth claims before examining the different ways that various communities interpret Scripture focusing on St Mark's Gospel The presuppositions of the different starting places are revealed and the appropriateness of various methodologies discussed The Quest for the Historical Jesus and its struggles to handle the resurrection are used as a test case to show the impact of different hermeneutical strategies The insights in this thought provoking study have implications for issues as wide ranging as the genre Gospel the authority of Scripture the Church as a reading community the plurality of interpretations and the possibility of controlling them the relationship between general and special theological hermeneutics as well as epistemological foundationalism and its alternatives Interdisciplinarity in World History Ahmed Abushouk, Mahjoob Zweiri, 2016-06-22 This book represents selected papers of an international conference convened by the Department of Humanities at Qatar University Doha in March 2013 Its theme was Interdisciplinarity in History An Old Method in New World Context Twelve out of the fifty papers presented at the conference have been thoroughly reviewed revised and compiled in this volume Their contributions emphasize that interdisciplinary in history has become a key term for professional historians who reject the professional identity of history based on its claimed autonomy and the distinctiveness of its research methods and argue that this claim has seriously narrowed the intellectual horizons of the discipline in terms of both teaching and research The chapters also stress that historical research should not be confined to political events as it was by ancient historians but rather be open to other complex issues which require thorough investigation and collaboration between history and other disciplines In this sense interdisciplinarity in history is a process of answering questions solving problems or examining topics that are too broad or multifaceted to be tackled adequately by history as a discipline on its own Therefore history should not be regarded as a stationary subject as Robinson wrote but as a discipline that would transcend the limitations formerly imposed upon the study of the past and integrate with other social science disciplines to widen its methodological scope and investigate many issues that had previously ignored or marginalized **Mongol Court Dress, Identity**

Formation, and Global Exchange Eiren L. Shea, 2020-02-05 The Mongol period 1206-1368 marked a major turning point of exchange culturally, politically, and artistically across Eurasia. The wide-ranging international exchange that occurred during the Mongol period is most apparent visually through the inclusion of Mongol motifs in textile paintings, ceramics, and metalwork among other media. Eiren Shea investigates how a group of newly confederated tribes from the steppe conquered the most sophisticated societies in existence in less than a century, creating a courtly idiom that permanently changed the aesthetics of China and whose echoes were felt across Central Asia, the Middle East, and even Europe. This book will be of interest to scholars in art history, fashion design, and Asian studies. Smashing the Liquor Machine Mark Lawrence Schrad, 2021 When most people think of the prohibition era, they think of speakeasies, gin runners, and backwoods fundamentalists railing about the ills of strong drink. In other words, in the popular imagination, it is a peculiarly American event. Yet as Mark Lawrence Schrad shows in *Smashing the Liquor Machine*, the conventional scholarship on prohibition is extremely misleading for a simple reason: American prohibition was just one piece of a global wave of prohibition laws that occurred around the same time. Schrad's counterintuitive global history of prohibition looks at the anti-alcohol movement around the globe through the experiences of pro-temperance leaders like Thomas Masaryk, founder of Czechoslovakia; Vladimir Lenin; Leo Tolstoy; and anti-colonial activists in India. Schrad argues that temperance wasn't American exceptionalism at all, but rather one of the most broad-based and successful transnational social movements of the modern era. In fact, Schrad offers a fundamental re-appraisal of this colorful era to reveal that temperance forces frequently aligned with progressivism, social justice, liberal self-determination, democratic socialism, labor rights, women's rights, and indigenous rights. By placing the temperance movement in a deep global context, he forces us to fundamentally rethink all that we think we know about the movement. Rather than a motley collection of puritanical American evangelicals, the global temperance movement advocated communal self-protection against the corrupt and predatory liquor machine that had become exceedingly rich off the misery and addictions of the poor around the world, from the slums of South Asia to central Europe to the Indian reservations of the American west. Unlike many traditional dry histories, *Smashing the Liquor Machine* gives voice to minority and subaltern figures who resisted the global liquor industry and further highlights that the impulses that led to the temperance movement were far more progressive and variegated than American readers have been led to believe.
