World Bank Staff Working Paper ,1984 The Journal of Developing Areas ,1976 Trials of Convergence

Arthur van Riel,2021-06-22 For over a century now historians have debated the causes of the lagged industrialization of the Dutch economy during the nineteenth century To this debate Trials of Convergence brings the analytical perspective of prices factor costs and the functioning of markets Its critical insight is that only an approach based on the integrated incentive structure of the economy allows us to delimit the role of alternative explanations Using statistical reconstruction and microdata it shows that the retarded transition resulted from a confluence of forces These ranged from open economy effects and natural endowments to the resilient influence of the institutions of the former Dutch Republic and the fiscal policy adopted in response to Belgian secession At the height of the British Industrial Revolution the Dutch economy slowed triggering a return to the problems of eighteenth century stagnation All this meant that the transition to modern economic growth after 1860 came about only in a changed international context and after a period of politico economic reform

Schemes in India Firdous Ahmad Malik,D. K. Yadav,2022-05-06 The exclusion of the destitute population from the formal financial system is a long standing problem in India This book examines the performance of financial inclusion policies in India to understand their impact on two urban vulnerable groups Slum Dwellers and Beggars This study includes analysis at the national level the variables of the financial inclusion index like Penetration Availability and Usage from 2006 to 2020 from the world bank data set Similarly the authors examine five policies on financial inclusion by conducting a primary level survey on two urban capital cities of Lucknow and Kolkata using a well structured questionnaire for data collection The authors uses two sampling techniques simple random in the case of beggars and stratified random in the case of slum dwellers This book highlights the difference between financial access and non access of household respondents in capturing the impacts of financial inclusion schemes on their socio economic condition and financial behavior The findings indicate that access to these schemes is extremely limited for the underprivileged population such as beggars and slum dwellers The analysis has shown that claims made by the government are not based on real life occurrences This book demonstrates that these programs have a negligible effect on life deprived people This book will be of interest to academia policymakers and
